- Import / Export the subscribed Users
- Block the user to avoid receiving newsletter

**FAQ (ADMIN AND USER FUNCTIONALITY)**

- Admin can view all the FAQ's
- Admin can Add any number of FAQ's
- Admin can Edit / Delete the existing FAQ's
- Admin can published / Unpublished the existing FAQ's
- Admin can change the order of existing FAQ's display in the frontend
- FAQ's base support Images
- User can view all the list of FAQs
- FAQ's support the Accordion Effects in the frontend

**SEO FRIENDLY URL (ADMIN AND USER FUNCTIONALITY)**

- Generate SAFE URLs
- Advanced SAFE URL management
- Generate and manage metadata (component - based)
- Sitemap generation
- Keywords management
- Duplicates management

- Multilingualism support and URL localization
- UTF-8 URLs support
- URL caching
- Editing access capability
- URL variables filtering option - prevent URL code injections! With custom filter definitions
- URL source tracing to help allocate problematic code
- 301 Redirections management
- 404 Page Not Found customization

**General Implementations and requirements**

- Integration with NAU SSO portal
- Integration with NAU – CMU portal
- Integration with NAU – Analytics system
- Integration with NAU – URP system to fetch the various details needed in experiment and reports.
- Delivered product must be compatible with NAU’s Ubuntu servers
- Developer must need to deploy their source code to NAU’s Dedicated GIT server each and every time when code changes and must deploy to the live environment from GIT repository only.
- CSRF protection
- SQL Injection protection
- OWASP top – 10 implementation
- No data should be permanently deleted from the system Log of each user activity. And history of each record should be tracked.

**3**

**Krishi KIOSK 2.0 Portal**

**Scope of work**

The scope of the project is to design and develop the KIOSK portal to ensure that information dissemination to Grass Root Level especially to the remote Villages is made easy through Digital and online Kiosks, the proposed Multifunctional Kiosk Software and Web Dashboard is expected to have the following features embedded in it.

**This scope of work defined in the document is the main requirements and common features that comes in portal. The final requirements of the project will be shred time to time after the project is started. The features are subject to change in terms of adding new features and removing any features that are not needed based on the requirements.**

**Modules Included:**

- Administrator
- KIOSK Manager

**KIOSK Features:**

**UNIQUE FEATURES:**

- Easy To Use
- Integrated SEO
- Turn-Key Solution
- Unlimited KISOK Types
- Fully-Automated
- Email Management

- 100% Customizable

**The kiosk should be dynamic so that administrator can add as many kiosks as they want and assign KIOSK manager to manage that kiosk. Each dynamically created KIOSK should have following features by default which can be enabled or disabled based on requirement by the KIOSK MANAGER**

**KIOSK information:**

- For what the KIOSK is
- Type of KIOSK and kiosk Categories
- Based on the kiosk categories kiosk manager can add the kiosk information
- Agri Market Intelligence

**Weather forecasting.**

- To provide weather updates to farmers regarding the rainfall, temperature etc.
- Integration with NAU-Website and NAU-meteorology department's hardware devices based on requirements.

**Video Calling Facility**

- To ensure that farmers gain valuable knowledge / suggestions from Agri Scientists it is proposed to make available Video calling facility in Kiosks. The respective District Resource Centres and Integrated Call Centre to be connected with Kiosks during Video call.
- **This feature is required to be integrated with NAU-Video Streaming Software which is a portal to stream live videos and video conferences.**

**News**

- News must be visible to farmers through the Multifunctional KIOSK application. News can be multilingual.

**Advertisement to generate revenue**

- The proposed multifunctional KIOSK application must also include Advts provision as per requirement in the Multifunctional Kiosk software. The Advts publication, timings, content etc are to be managed from the Dashboard

**Banners**

- The proposed multifunctional KIOSK application must allow four banners at the top to display Dept programme. The Banner images to be controlled and updated through Dashboard.

**Text to Voice Feature**

- The software application should allow Text to Voice feature with screen reader access.

**NEWSLETTER MANAGEMENT**

**NEWSLETTER – USER FUNCTIONALITY**

- Subscribe module for user subscription
- Subscriber email extended validation
- Subscription acknowledgment for email confirmation
- Activate the subscriber using email activation.
- User Unsubscribe option, when the user no need to receive the newsletter

**NEWSLETTER – ADMIN FUNCTIONALITY**

- Creating Newsletter using Html Editor
- Sending bulk newsletter in Batch wise (to avoid the spam)
- Newsletter Template Creation, we can use the template at any time for sending the newsletter

- Synchronize the user from the registered User, means convert the registered user into Newsletter subscriber in single click
- Import / Export the subscribed Users
- Block the user to avoid receiving newsletter

#### **FAQ (ADMIN AND USER FUNCTIONALITY)**

- Admin can view all the FAQ's
- Admin can Add any number of FAQ's
- Admin can Edit / Delete the existing FAQ's
- Admin can published / Unpublished the existing FAQ's
- Admin can change the order of existing FAQ's display in the frontend
- FAQ's base support Images
- User can view all the list of FAQs
- FAQ's support the Accordion Effects in the frontend

#### **SEO FRIENDLY URL (ADMIN AND USER FUNCTIONALITY)**

- Generate SAFE URLs
- Advanced SAFE URL management
- Generate and manage metadata (component - based)
- Sitemap generation
- Keywords management
- Duplicates management
