RO water purifier with cooler	2016-17	78000	Working
MridaParikshak Soil Testing minilab-kit	2016-17	86000	Working
A/C-2	2016-17	80000	Working
Tractor mounted sprayer	2018-19	13806	Working
Brush cutter	2018-19	24632	Working

1.8. Details of SAC meeting conducted in the year:

The Eleventh Scientific Advisory Committee Meeting of Krishi Vigyan Kendra, NAU, Surat was held at KVK, Surat on 11th January, 2023 to review the progress made by KVK during last year (01-01-2022 to 31-12-2022) and to discuss the future action plan for the next year (January-2023 to December-2023). The meeting was chaired by Dr. Z. P. Patel, Hon'ble Vice Chancellor, Navsari Agricultural University, Navsari. Dr. N. M. Chauhan, Director of Extension Education, NAU, Navsari, Mr. S. B. Gamit, Joint Director of Agriculture, Surat and Mr. N. G. Gamit, DDA (T) & PD, ATMA, Surat graced the meeting.Dr. J. H. Rathod, Member Secretary & Senior Scientist and Head, Krishi Vigyan Kendra, Surat welcomed all the dignitaries, committee members, farmers and other invitees. He presented overall activities and achievements made by the KVK during the mentioned year. Scientists also presented the discipline wise activities & achievements made by them. Activities done by KVK, Surat was appreciated by the house and congratulated the Senior Scientist and Head and his team for addressing the key issues as per the need of the farmers of Surat district. The Action Plan for the next year was also presented before the house and it was approved by the house.

Dr. N. M. Chauhan, Director of Extension Education, NAU, Navsari congratulated team of KVK for good work done during the last year and gave suggestions to give more emphasis on millets and organize the awareness programme on it. He also appreciated the collaboration of Krishi Vigyan Kendra, Surat with other line departments.

Dr. Z. P. Patel, Hon'ble Vice Chancellor appreciated the activities of Krishi Vigyan Kendra, Surat. He wish that Surat-KVK should become model KVK of the country in urban horticulture. He advised Scientists to work for reducing the cost of cultivation in banana and sugarcane crops and also suggested to introduce the new crops in the district.

11.1 Approval of the minutes of tenth Scientific Advisory Committee.

The action taken report of the minutes of tenth SAC meeting (Held on 25.01.2022) was presented before the house and it was approved by the Scientific Advisory Committee.

11.2 Progress made by KVK during 01-02-2022 to 31-12-2022 Senior Scientist and Head and all Scientists of the KVK, NAU, Surat presented the report on progress made by KVK, for the period of 01-01-2022 to 31-12-2022. The committee was satisfied with the activities and achievements made by the KVK.

11.3 Action plan for the period of January 2023 to December 2023.

Discussion was made on the Action Plan for the period of January 2023 to December 2023 which was approved by the house. However, few suggestions were made by the house to strengthen the action plan.

11.3.1	Conduct awareness programme and training on fodder sorghum.
11.3.2	Organize the awareness programme on millets.
11.3.3	Conduct enrich vermicompost unit at KVK
11.3.4	Conduct awareness programme on soil health and fertility.
11.3.5	Take feedback from peri-urban people regarding terrace gardening training.
11.3.6	Reduce the input cost in sugarcane through Single eye bud technique.
11.3.7	Introduce new crops in the district.
11.3.8	Increase the cultivation area of dragon fruit.

The meeting was ended with vote of thanks by Shri S. J. Trivedi, Scientist (Crop Production), KVK, NAU, Surat.

Member Secretary & Senior Scientist and Head Krishi Vigyan Kendra, Athwa Farm, Surat Chairman SAC and Vice – Chancellor Navsari Agricultural University Navsari

Following members and invitees were remained present in 11th Scientific Advisory Committee meeting.

1	Dr. Z. P. Patel	Hon'ble Vice Chancellor, NAU, Navsari	Chairman
2	Dr. N. M. Chauhan	Director of Extension Education, NAU, Navsari	Member
3	Mr. S.B. Gamit	Joint Director of Agriculture, Surat	Member
4	Dr. M. P. Bhimani	Deputy Directorate of Animal Husbandry, District Panchayat, Surat	Member
5	Mr. N. G. Gamit	Dy. Director of Agriculture, Surat & PD, ATMA, Surat	Member
6	Dr. V. P. Usdadia	Professor & Head, Dept. of Agronomy, NMCA, Navsari	Member
7	Dr. S. J. Patil	Professor & Head, Department of Horticulture, NMCA, NAU, Navsari	Member
8	Dr.Santosh M.	I/C Director, RFS, Dhamrod	Member
9	Dr. N. B. Patel	Associate Research Scientist, LRS, NAU, Navsari	Member
10	Dr. R. L. Leva	Associate Professor, ASPEE bio-tech. Colege, Surat	Member
11	Mrs.KuntalSurati	DDM, NABARD, Surat	Member
12	Mr. D. B. Patel	Representative, Horticulture Officer, DDH, Surat	Member
13	Miss C. P. Pavagadhi	Representative, Deputy Director of Fisheries, Surat	Member
14	Dr. H. K. Patel	AGM (Vet.), Sumul Dairy, Surat	Member
15	Mr.ManishbhaiJinjala	Representative, JDA (Extension), Surat	Member
16	Mr. B. R. Chaudhary	Lead District Manager, Bank of Baroda, Surat	Member
17	Mrs. Rama Singh	Director and Managing trustee, Suruchi Centre, Bardoli	Member
18	Gaurang P. Shah	Ideal Image Trust, Surat	Member
19	Mr. Sanjay Khandhar	Programme Manager, Care India, Surat	Member
20	Mr. N. M. Barot	WA, WALMI, Surat	Member
21	Mr. N. M. Gamit	AE, WALMI, Surat	Member
22	Mr. S. Y. Solanki	Farm Assistance, RFS, Dhamrod	Member
23	Mr.RamsingbhaiChaudhary	Progressive Farmer- SahkariMandli	Member
24	Dr.Rekhaben N. Mistry	Terrace gardener	Member
25	Mrs.JamnabenNakum	Progressive Farmer (AH)	Member
26	HinalkumarPradyuman Patel	Progressive Farmer	Member
27	Dr. M. C. Patel	Research Scientist (Cotton), Main Cotton Research Station, NAU, Surat	Special Invitee
28	Dr. B. K. Davda	Research Scientist (Sorghum), Main Sorghum Research Station, NAU, Surat	Special Invitee
29	Dr. J. H. Rathod	Senior Scientist and Head, KVK, Surat	Member Secretary
		All 4 Scientists, KVK, Surat	

2. DETAILS OF DISTRICT / JURISDICTION AREA OF KVK

2.1. Major farming systems/enterprises (based on the analysis made by the KVK)

S. No	Farming system/enterprise	
1	Crop production	
2	Crop production and Horticulture	
3	Crop production and Livestock	
4	Crop production, Horticulture and Livestock	

2.2. Description of Agro-climatic Zone & major agro ecological situations (based on soil and topography) a) Soil type

Taluka (AES)	Soil texture	Rainfall (mm)	Crops	Features
(AES-1) Mandvi (30%), Mangrol (40%), Umarpada	Hilly and highly undulating fine texture, highly erosive	< 1100	Paddy, Maize, Cotton, Sorghum, Pulses	Highly erosive Shallow to medium in depth Poor permeability Low to medium N & P content
(AES-2) Bardoli, Choryasi (75%), Kamrej, Palasana, Surat and Mahuva	Leveled, deep, fine textured	> 1450	Sugarcane, Paddy, Sorghum, Pulses, Orchards	Poor drainage Water logging Very poor permeability Poor soil physical condition Low to medium in N & P content
(AES-3) Mandvi (70%), Mangrol (60%), Olpad (70%)	Deep to medium black	1000 - 1250	Sorghum, Pulses, Paddy, Cotton, Oil Seeds	Moderate to severe erosive Poor soil fertility Poor irrigation facility
(AES-4) Choryasi (25%), Olpad (30%)	Coastal plain, deep, fine texture, salt affected	900-1000	Paddy - Cotton, Sorghum, Pulses, Wheat	High salt accumulation Poor soil physical condition High water table Water logging condition

a) Topography

S. No.	Agro ecological situation	Characteristics
1	(AES-1)	Hilly and highly undulating fine texture, highly erosive
2	(AES-2)	Leveled, deep, fine textured
3	(AES-3)	Deep to medium black
4	(AES-4)	Coastal plain, deep, fine texture, salt affected

2.3 Soil Types

S. No	Soil type	Characteristics	Area in ha
1	Inceptisols	Inceptisols are found on the hilly areas as well as along the hill slopes. These soils are shallow to moderately deep and	
		highly eroded. Their texture varies from loamy to clay. Their water holding capacity is moderate. They are moderate to	
		high in nitrogen, low in phosphoric acid and high in potash content.	
2	Vertisols	Vertisols are found in the midlands and flood plains. These soils are very deep and silty to clay in texture. Their water	
		holding capacity varies with clay content. These soils crack on drying and have poor drainage characteristics. These are	
		moderate in nitrogen, low to medium in phosphoric acid and high in potash content	
3	Coastal saline soils	The soils are sandy clay loam to clay in texture. The soil reaction varies with situation ranging from neutral to highly	
		alkaline. These soils are normally medium in fertility.	

2.4. Area, Production and Productivity of major crops cultivated in the area of jurisdiction of KVK (2023)

S. No	Сгор	Area (ha)	Production (MT.)	Productivity (Qt./ha)
A. Food grains				
1	Paddy	43232	111366	2576

4.1. B. Operational areas details during 2023

S. N.	Major crops & enterprises being practiced in cluster of villages	Prioritized problems in these crops/ enterprise	Extent of area (ha/No.) affected by the problem	Name of Cluster Villages identified for	Interventions (OFT, FLD, Training, extension activity
			in the district	interventions	etc.)*
1	Paddy, Sugarcane, Pointed gourd, Okra, Brinjal, Vegetables, Mango Crop production-Horticulture- Livestock	Use of local variety High seed rate, Imbalance use of fertilizers, No use of bio fertilizer		Umra Vasrai Machhisadada Vadia	OFT, FLD, Training, extension activity
2	Paddy, Sugarcane, Brinjal, Okra, Cluster bean , Vegetables, Pulses, Soybean, Groundnut Crop production- Horticulture- Livestock	Use of local variety in brinjal Imbalance use of fertilizers in crops No use of bio- fertilizers No knowledge about post harvest management and processing Low technical know house regarding green house/ net house and production technology		Amba Parvat Uteva Titoi Gamtalav Khurd	OFT, FLD, Training, extension activity
3	Paddy, Brinjal, Okra, Cotton, Pulses, Soybean, Groundnut	Lack of knowledge about disease and insect pest management. Injudicious use of pesticides		Kadvali Kadavidadra Bilvan	OFT, FLD, Training, extension activity
	Crop production – Livestock	Lack of knowledge about Bio- fungicides		Khotarampura Umarkhadi	
4	Paddy, Sorghum, Cotton, Pulses, Groundnut	Poor dairy management Large number of non-descript animals with low milk production		Balethi Mandan Ghodbar	OFT, FLD, Training, extension activity
	Crop production- Livestock	Poor availability of fodder in hilly area. Poor cultivation of fodder crops High calf mortality due to poor management		Boriya Ognisha	
5	Paddy, Sugarcane, Pointed gourd, Okra, vegetables	In hilly area problem of water conservation In middle canal command area due to		Admor Kuvad Saras	OFT, FLD, Training, extension activity
	Crop production-Livestock	excess irrigation problems of water logging and salinity In coastal area salinity problem		Pinrat	
6	Sugarcane, Banana, Paddy,	Imbalance use of fertilizers lack of		Karjan	OFT, FLD, Training,
	Vegetables	awareness about use of bio-fertilizers		Choryasi	extension activity
	Crop production-Horticulture-			Ghala	
	Livestock			Bhairav	

7	Paddy, Sugarcane, Banana, Brinjal,	Lack of knowledge about value	 Balda	OFT, FLD, Training,
	Okra, Vegetables	addition of locally available	Rajvad	extension activity
		materials	Afva	
	Crop production- Horticulture-	Lack of knowledge, skills regarding	Madhi	
	Livestock	various small scale agricultural based		
		enterprises		
8	Paddy, Pointed gourd, Sorghum,	Imbalance use of fertilizers lack of	 Damka	OFT, FLD, Training,
	Vegetables	awareness about use of bio-fertilizers	Bhatlai	extension activity
			Budia	
	Crop production-Livestock		Vasava	

3.2. Technology Assessment (Kharif 2023, Rabi 2022-23, Summer 2023) A1. Abstract on the number of technologies assessed in respect of **crops**

Thematic areas	Cereals	Oilseeds	Pulses	Commercial Crops	Vegetables	Fruits	Flower	Plantation crops	Tuber Crops	TOTAL
Integrated Nutrient Management	-	-	-	-	-	-	-	-	-	-
Varietal Evaluation	-	-	-	-	-	-	-	-	-	-
Integrated Pest Management	-	-	1	-	1	-	-	-	-	2
Integrated Crop Management	1	1		-	-	-	-	-	-	2
Integrated Disease Management	-	-	-	-	-	-	-	-	-	-
Small Scale Income Generation Enterprises	-	-	-	-	-	-	-	-	-	-
Weed Management	-	-	-	-	-	-	-	-	-	-
Resource Conservation Technology	-	-	-	-	-	-	-	-	-	-
Farm Machineries	-	-	-	-	-	-	-	-	-	-
Integrated Farming System	-	-	-	-	-	-	-	-	-	-
Seed / Plant production	-	-	-	-	-	-	-	-	-	-
Value addition	-	-	-	-	-	-	-	-	-	-
Drudgery Reduction	-	-	-	-	-	-	-	-	-	-
Storage Technique	-	-	-	-	-	-	-	-	-	-
Mushroom cultivation	-	-	-	-	-	-	-	-	-	-
Total	1	1	1	-	1	-	-	-	-	4

A2. Abstract on the number of technologies assessed in respect of livestock enterprises: Nil

Thematic areas	Cattle	Poultry	Piggery	Rabbitry	Fisheries	TOTAL
Evaluation of Breeds	-	-	-	-	-	-
Nutrition Management	-	-	-	-	-	-
Disease of Management	-	-	-	-	-	-
Value Addition	-	-	-	-	-	-
Production and Management	-	-	-	-	-	-
Feed and Fodder	-	-	-	-	-	-
Small Scale income generating enterprises	-	-	-	-	-	-
TOTAL	-	-	-	-	-	-

B. Achievements on technologies Assessed B.1. Technologies Assessed under various Crops

Thematic areas	Crop	Name of the technology assessed	No. of trials	Number of farmers	Area in ha (Per trial covering all the Technological Options)
Integrated Nutrient Management					
Varietal Evaluation					
Integrated Pest Management	Pigeonpea	Management of pigeonpea pod borer	1	5	1.5
	Okra	Management of shoot and fruit borer in okra	1	5	1.5
Integrated Crop Management	Paddy	Assessment different varieties of Paddy	1	10	3
	Sesame	Assessment different varieties of Sesame	1	10	12
Integrated Disease Management					
Small Scale Income Generation Enterprises					
Weed Management					
Resource Conservation Technology					
Farm Machineries					
Integrated Farming System					
Seed / Plant production					
Value addition					
Drudgery Peduction					
Drudgery Reduction					
Storage Technique					
Mushroom cultivation					
Total			4	30	18

B. 2. Technologies assessed under Livestock & fishery assessment: Nil

Thematic areas			he livestock rprise	Name of the technology assessed	No. of trials	No. of farmers	
Evaluation of breeds			-	-	-	-	
Health Management			-	-	-	-	
Dairy Management			-	-	-	-	
Nutrition management			-	-	-	-	
Disease management			-	-	-	-	
Feed and fodder management			_	-	-	-	
Processing & Value addition			-	-	-	-	
Production and management			-	-	-	-	
Composting fish culture			-	-	-	-	
Small scale income generating enterprises			-	-	-	-	
Fish production			-	-	-	-	
Other			-	-	-	-	
Total							
B.3 Technologies assessed under other enterprises: Nil							
Name of Enterprises	Name of the technology assess	sed		No. of trials	No. of farmers		
Mushroom	-			-		-	
Apiary	-	-			-		
Vermicompost	-	-		-			
Tailoring	-	-		-			
Nutrition Garden	-	-		-			
Nursery Management	-	-			-		
Production and Management	-				-		
Eentrepreneurship development	-			-		-	
Engegy consrvation	-			-		-	
storage techniques	-	_			-		
House hold food security	-			-		-	
organic farming	-			-		-	
mechanization	-			-		-	
Bee keeping	-			-		-	
Seed production	_			-		-	
post-harvest management				-		-	
other	-			-		-	

B 4. Technologies assessed under Women empowerment assessment: Nil

Name of Enterprises	Name of the technology assessed	No. of trials	No. of farmers
Drudgery Reduction	-	-	_
Entrepreneurship development	-	-	-
Health and Nutrition	-	-	-
value addition	-	-	-
Kitchen gardening	-	-	-
nutrition security	-	-	-
other	-	-	-

C. 1. Results of Technologies Assessed Results of On Farm Trial

CROP PRODUCTION:

Crop/ enterprise	Farming situation	Problem definition	Title of OFT	No. of trials	Technology Assessed	Parameters of assessment	Data on the parameter	Results of assessment	Feedback from the farmer	Any refinement needed	Justificatio n for refinement
1	2	3	4	5	6	7	8	9	10	11	12
Paddy	Irrigated	Old variety with low yield	Assessment of different varieties of Paddy	1	T1 : Gurjari T2 : GNR-3 T3 : GR-17(Sardar)	Yield & B: C ratio	T1 : Gurjari-55.4 q/ha T2 : GNR-3-62.6 q/ha T3 : GR-17(Sardar)-66.5 q/ha	GR-17 is highest yielder	GR-17 is best variety,fol lowed by GNR-3 and Gurjari	No	No
Sesame	Irrigated	Variety with low yield	Assessment of different varieties of Sesame	1	T1 : Local T2 : GT-3 T3 : GT-5	Yield & B: C ratio	T1 : Local -5.82 q/ha T2 : GT-3-6.68 q/ha T3 : GT-5-7.26 q/ha	GT-5 is highest yielder	GT-5 is best variety,fol lowed by GT-3	No	No

Pigeonpea	Limited irrigation	Infestation of pod borer in pigeonpea	Management of pigeonpea pod borer	1	T1: Farmers practices asinjudicious andindiscriminate use ofpesticides at irregulartime intervalT2: Two sprays ofChlorantraniliprole18.5% SC @0.006% (3 ml/10 litof water) first at 50	1. Pod borer infestation (%) 2. Pod fly infestation (%) 3. Grain yield 4.B:C ratio	T ₁ : Pod borer infestation: 12.00 %, Pod fly infestation: 3.20 %, Grain yield: 13.17 q/ha & BCR: 3.026; T ₂ : Pod borer infestation: 3.20 %, Pod fly infestation: 3.94 %, Grain yield: 18.83 q/ha & BCR: 4.144	Chlorantr aniliprole is highly effective insecticid e for managem ent of pod borer in pigeonpea	Chlorantr aniliprole is highly effective insecticid e against pod borer in pigeonpea	No	No
Okra	Irrigated	Infestation of shoot and fruit borer in okra	Management of shoot and fruit borer in okra	1	 and the second at the	1. Shoot infestation (%) 2. Fruit infestation (%) 3. Yield 4. B:C ratio	T ₁ : Shoot infestation: 6.33 %, Fruit infestation: 7.05 %, Yield: 178.67 q/ha & BCR: 5.118; T ₂ : Shoot infestation: 4.07 %, Fruit infestation: 4.82 %, Yield: 195.50 q/ha & BCR: 5.600; T ₃ : Shoot infestation: 8.80 %, Fruit infestation: 10.14 %, Yield: 160.17 q/ha & BCR: 4.518	Emamecti n benzoate is effective insecticid e followed by Bacillus thuringien sisfor managem ent of shoot and fruit borer in olare	Emamecti n benzoate is effective insecticid e against shoot and fruit borer in okra	No	No
					practices as injudicious and indiscriminate use of pesticides at irregular time interval			in okra			

Contd..

Technology Assessed	Source of Technology	Production	Please give the unit (kg/ha, t/ha, lit/animal, nuts/palm, nuts/palm/year)	Net Return (Profit) in Rs. / unit	B:C Ratio

Technology option 2	T2 : GT-3-JAU	T2 : GT-3-6.68 q/ha		83000	2.41
Technology option 3	T3 : GT-5-JAU	T3 : GT-5-7.26 q/ha		90300	2.62
T ₁ : Farmers practices as injudicious and	Farmers practices	13.17 q/ha	q/ha	59956	3.026
indiscriminate use of pesticides at irregular					
time interval					
T ₂ : Two sprays of Chlorantraniliprole 18.5% SC @ 0.006% (3 ml/10 lit of water) first at 50	NAU, Navsari, Gujarat	18.83 q/ha	q/ha	97144	4.144

per cent flowering stage and second at 50 per					
cent pod formation stage					
T ₁ : Spray Bacillus thuringiensis1% WP @ 50 g	AAU, Anand, Gujarat	178.67q/ha	q/ha	395343	5.118
or 1% AS @ 50 ml in 10 lit water at 15 days					
interval for three times from initiation of shoot					
and fruit borer					
T ₂ : Two sprays of emamectin benzoate 5 % SG	SDAU, Gujarat	195.50q/ha	q/ha	441625	5.600
@ 5 g/10 lit water, first at initiation of damage					
and second at 15 days after the first spray					
T ₃ : Farmers practices as injudicious and	Farmers practices	160.17 q/ha	q/ha	342968	4.518
indiscriminate use of pesticides at irregular	-	_	-		
time interval					

C. 2. Details of each On Farm Trial for assessment to be furnished in the following format separately as per the following details:

CROP PRODUCTION

OFT-1

- 1. Title of Technology Assessed : Assessment of Paddy varieties for yield
- 2. Problem Definition: Low yield due to use of old variety
- 3. Details of technologies selected for assessment : T1: Gurjari (1997)(Farmers practices)

T₂: GNR-3 (2012)

T₃: GR-17(Sardar) (2018)

- 4. Source of technology: NAU, Navsari
- 5. Production system and thematic area : Paddy-Sugarcane, Integrated Crop Management
- 6. Performance of the Technology with performance indicators: T1: Gurjari-55.4 q/ha T2: GNR-3-62.6 q/ha T3: GR-17(Sardar)-66.5 q/ha
- 7. Feedback, matrix scoring of various technology parameters done through farmer's participation / other scoring techniques: GR-17 is best variety giving highest yield
- 8. Final recommendation for micro level situation: GR-17 is best variety giving highest yield in olpad block
- 9. Constraints identified and feedback for research : -
- 10. Process of farmers participation and their reaction : Field visits
- 11. Good Quality Photo in JPG (separate with proper caption)

OFT-2

- 1. Title of Technology Assessed: Assessment of Sesame varieties for yield
- 2. Problem Definition: Low yield due to use of old variety
- 3. Details of technologies selected for assessment: **T1:** Local (Farmers practices)

T₂: GT-3 T₃: GT-5

- 4. Source of technology: JAU, Junagadh
- 5. Production system and thematic area: Paddy-Sesame, Integrated Crop Management
- 6. Performance of the Technology with performance indicators: T1: Local- 5.82 q/ha T2: GT-3-6.68 q/ha T3: GT-5-7.26 q/ha
- 7. Feedback, matrix scoring of various technology parameters done through farmer's participation / other scoring techniques: GT-5 is best variety giving highest yield
- 8. Final recommendation for micro level situation: GT-5 is best variety giving highest yield in Mandvi block

- 9. Constraints identified and feedback for research: -
- 10. Process of farmers participation and their reaction: Field visits
- 11. Good Quality Photo in JPG (separate with proper caption)

PLANT PROTECTION

OFT-3

- 1. Title of Technology Assessed: Management of pigeonpea pod borer
- 2. Problem Definition: Infestation of pod borer in pigeonpea
- 3. Details of technologies selected for assessment:
- T1: Farmers practices as injudicious and indiscriminate use of pesticides at irregular time interval
- T₂: Two sprays of Chlorantraniliprole 18.5% SC @ 0.006% (3 ml/10 lit of water) first at 50 per cent flowering stage and second at 50 per cent pod formation stage
- Source of technology: T₁: Farmers practices T₂: NAU, Navsari, Gujarat
- 5. Production system and thematic area: KharifPigeonpea, Integrated Pest Management
- 6. Performance of the Technology with performance indicators:
- T₁: Pod borer infestation: 12.00 %, Pod fly infestation: 3.20 %, Grain yield: 13.17 q/ha & BCR: 3.026; T₂: Pod borer infestation: 3.20 %, Pod fly infestation: 3.94 %, Grain yield: 18.83 q/ha & BCR: 4.144

- 7. Feedback, matrix scoring of various technology parameters done through farmer's participation / other scoring techniques: Chlorantraniliprole is highly effective insecticide for management of pod borer in pigeonpea
- 8. Final recommendation for micro level situation: Chlorantraniliprole is highly effective insecticide against pod borer in pigeonpea in tribal belt of Surat district
- 9. Constraints identified and feedback for research: -
- 10. Process of farmers participation and their reaction: Field visits
- 11. Good Quality Photo in JPG (separate with proper caption):

OFT-4

- 1. Title of Technology Assessed: Management of shoot and fruit borer in okra
- 2. Problem Definition: Infestation of shoot and fruit borer in okra
- 3. Details of technologies selected for assessment:
 - T1: Spray Bacillus thuringiensis1% WP @ 50 g or 1% AS @ 50 ml in 10 lit water at 15 days interval for three times from initiation of shoot and fruit borer
 - T2: Two sprays of emamectin benzoate 5 % SG @ 5 g/10 lit water, first at initiation of damage and second at 15 days after the first spray
 - T₃: Farmers practices as injudicious and indiscriminate use of pesticides (*e.g.* Chlorpyrifos 20 % EC, Profenofos 40 % + Cypermethrin 04 % EC, Chlorpyrifos 50 % + Cypermethrin 05 % EC) at irregular time interval
- Source of technology: T₁: AAU, Anand, Gujarat T₂: SDAU, Gujarat
 - T₃: Farmers practices
- 5. Production system and thematic area: Okra, Integrated Pest Management
- 6. Performance of the Technology with performance indicators: T₁: Shoot infestation: 6.33 %, Fruit infestation: 7.05 %, Yield: 178.67 q/ha & BCR: 5.118; T₂: Shoot infestation: 4.07 %, Fruit infestation: 4.82 %, Yield: 195.50 q/ha & BCR: 5.600; T₃: Shoot infestation: 8.80 %, Fruit infestation: 10.14 %, Yield: 160.17 q/ha & BCR: 4.518
- 7. Feedback, matrix scoring of various technology parameters done through farmer's participation / other scoring techniques: Emamectin benzoate is effective insecticide against shoot and fruit borer in okra
- 8. Final recommendation for micro level situation: Emamectin benzoate is effective insecticide followed by Bacillus thuringiensis for management of shoot and fruit borer in okra
- 9. Constraints identified and feedback for research: -
- 10. Process of farmers participation and their reaction: Field visits
- 11. Good Quality Photo in JPG (separate with proper caption):

3.3. FRONTLINE DEMONSTRATION

A. Follow-up for results of FLDs implemented during previous years List of technologies demonstrated during previous year and popularized during 2023 and recommended for large scale adoption in the district

S.N.	Сгор	Technology	Feed back
		demonstrated	
1	Paddy	GNRH -2	1. Medium slender grain rice
			2.It is moderately resistant against bacterial leaf blight, leaf
			blast, grain discoloration and sheath rot.
			3. I olerant to insect pest like BPH, wBPH, leaf folder and
			stem borer.
2	Doddy	CP 17(Sorder)	4 Suitable for fice growing aleas of South Gujarat
2	Fauuy	GR -17(Salual)	1. Early maturing, Long bold grann 2 Moderately resistant against bacterial leaf blight leaf blast
			2. Woderatery resistant against bacterial real blight, real blast,
			1 Suitable for transplanted rice growing areas
3	Paddy	GNP 9(1 al Kada Gold)	1. Suitable for transplanted free growing areas.
5	Taddy	ONK -9(Lai-Kada Oold)	2 Die fertified veriety
4	Doddy	CD 24(Novcori Dorimol)	2.Dio-fortified vallety
4	Paddy	GR – 24(Navsari Parimai)	
			2.Early maturing
	D 11		3.Non-Lodging
5	Paddy	GR-18(Devli Kolam)	1.Medium Slender
			2.Medium Resistant to Pest & diseases
			3.Early maturing & Non-lodging
6	Paddy	GR – 16	1.Early maturing upland rice variety
		(Tapi)	2.Long bold variety with good grain quality,
			3. Moderately resistant reaction against leaf blast and insect
			pest like stem borer and sheath mite. Suitable for upland
			rice growing areas.
1	Sorghum	GNJ-1	1.High yielding
0	0 1		2.Less incidence of smut, shoot borer and grain mould
8	Sorghum	Phule Revati	1. Higher yield with less incidence of pest & diseases
0	Carleson	NIDC 27	2. Suitable for Rabi season
9	Soybean	NRC-57	2 Moderately Desistant to Dest & disease
10	Green gram	GM 6	1 Moderate Vield
10	Oreen grann	0141-0	2 Moderately Resistance to YMD
11	Secome	GT 5	1 Moderate vield
11	Sesame	01-5	2. Moderately Resistant to Halicoverna
12	Croundnut		2. Woodratery Resistant to Hencoverpa
12	Groundhut	00-34	2 Tolont to rust and lata tikka disease
			2. I otent to fust and fate tikka disease
	1		s.Lower intestation of trips and jassius

13	Cotton	G.Cot.Hy-10(Bt)	1. Higher yield 2. medium maturing
14	Digaannaa	CNID 2	5.Suitable for rainied and imigated area 4.Resistant to pest & diseases
14	rigeonpea	GINF-2	2. Tolerant to wilt & SMD
15	Digeonnea	GT-104	1 Resistant to wilt and sterility
15	1 igeoilpea	01-104	2 Red flowers & Pods set in clusters
16	Pigeonpea	GT-105	1. Resistant to sterility, early maturing
10	i igeonpeu		2. Yellow flowers
17	Paddy	IPDM	Lower infestation of stem borer, leaf folder in paddy field; lower intensity of Bacterial Leaf
			Blight, blast, grain discoloration and other diseases, increase yield of paddy
18	Sugarcane	IPDM	Lower infestation of borers and sucking pests in sugarcane, less incidence of soil borne
	6		diseases, increase yield of sugarcane
19	Banana	IPDM	Less incidence of wilt, nematodes, less infestation of weevil in banana field, increase vield of
			banana
20	Pointed gourd	IPDM	Less incidence of soil borne and other diseases, less infestation of pests, improve quality and
			production of pointed gourd fruits
21	Brinjal	IPDM	Lower infestation of fruit & shoot borer and sucking pests in brinjal, decrease use of chemical
	5		fertilizers and pesticides; increase quality and yield of brinjal fruits
22	Okra	IPDM	Less infestation of insect pests, decrease use of chemical fertilizers and pesticides; increase in
			yield and quality of fruits in okra
23	Mango	IPDM	Less infestation of fruitfly and incidence of diseases, increase in yield and quality of mango
			fruits
24	Kitchen Garden	Nutrition Management	Kitchen gardening gives continuous supply of fresh vegetables.
			Income is generated by selling extra vegetables grown in kitchen garden.
			Farm women are not applying any pesticides in kitchen garden so they get organic vegetables.
25	Twin wheel hoe	Drudgery Reduction	Twin wheel hoe weeder reduces women drudgery in terms of time and physical hazards (finger
			injuries, wrist pain, muscle stress etc.)
			During weeding, field capacity is increased by using twin wheel hoe weeder as compared to
			local sickle.
26	Rake for collecting	Drudgery Reduction	Rake for collecting garbage/ harvesting increases working efficiency as compared to
	garbage		traditional method.
			Reduces fatigue, backache, muscle stress, wrist pain and pain in shoulders as compared to
			traditional method.
27	Stalk puller	Drudgery Reduction	Stalk puller increases working efficiency as compared to traditional method.
			Stalk puller reduces fatigue, backache, muscle stress, wrist pain and pain in shoulders as
			compared to traditional method.

Success Story of Medicinal Mushroom Cultivation

Name of Farmer	Ravi R Saliya (Pramukh Foods)
Age	32
Education	M.B.A.
Occupation	Mushroom Farming
Address	Survey no. 220, Near Bhakti International School,
	Kathodra, Surat 394326
Agriculture land	0.23 hector

About Mushroom Farming:

Mr. Ravi Saliya has completed his education in MBA marketing and he is having experience in many company like Sheela foam pvt. Ltd, TATA Classedge and others. But as he wanted to do something new and wanted to start his own business he did researching in Google for new business and decided to venture into mushroom business, after doing more research in mushroom he started mushroom business. To further increase knowledge he went to Uttarakhand for Mushroom training for 12 days where he learned about spawn making process, cultivation process, and little bit about medicinal mushroom.

In 2019 he starts construction of his mushroom plant, he started taking production from January 2020. Till the time he searches out the best quality raw material for Ganoderma mushroom, initial he was using teak wood sawdust but somehow he failed, costing more than 20000 bag and surmounting loss of around 10 lakhs. He remained in touch with some farmer, DMR Solan Scientist but they have some limited information because no one is doing large production on Ganoderma in India. After trial, error and experimenting he started bring culture from Canada.

After that he started production in batch of 100 bag where he got success. Taking in account he increased their production and got success in production, in 2020-21 he got around 900 kg dry material of Ganoderma mushroom. Through self-hard work for marketing and they found the buyers who took all his stock in just 3 months. Next year he increased capacity of plant from 100 to 200 kg month production and which he is successfully running right now.

His company "Pramukh Foods" is always reedy to share knowledge of mushroom to students and mushroom. They have client all our India right now, having good reputation in Indian medicinal mushroom farming. Due to Limited market of Ganoderma mushroom in India, 50% of clients are using Pramukh Food's Ganoderma Mushroom. Right now capacity is 200 kg dry material production per month. Asides, Pramukh foods is also successfully growing Oyster Mushroom, Lions-mane Mushroom, King Oyster mushroom.

Whenever they have any problem they get guidance from Waghai College of Agriculture, Navsari Krushi university and Krishi Vigyan Kendra, Surat. They also help other college students and mushroom farmer to visit their farm. Anand University and Waghai college students all visited their farm. Among these students 2 students are doing research in their farm for projects. They always help mushroom lover who want to start business.

Year	Production (KG)	Total income(Rs.)	Total cost (Rs.)	Net profit (Rs.)
2019-2020	210	1106137	648986	457151
2020-2021	686	2174842	1246074	928768
2021-2022	960	3575775	2505599	1070176

Year Wise Production

Success Story: 2

Name of Farmer: Pratibhaben Mansinh Gohil Village: Mouvachhi Taluka: Bardoli District: Surat Education: B.Sc. (microbiology) Mobile No: 9558757537

Introduction:

- Adopted natural farming since 2014.
- Cultivated sugarcane and turmeric during Rabi season for value added Products by Natural farming.
- Prepared and used Beejamrit for seed treatment and Jivamrit for nutrition management.
- Prepared and used Dusparni ark, Brahmastra, Neemastra and Agniastra for controlling Pests.

Training and guidance of KVK

- Used ICT mechanism (WhatsApp and face book).
- Participated in exhibitions / workshops and forums regularly.
- Regular trainings to the farmers

Practices adopted

- Practiced natural farming and cultivated sugarcane and turmeric
- Used Beejamrit for seed treatment.
- Used various types of natural inputs like Jivamrit and Ghanjivamrit
- Used various types of natural pesticides like Neemastra, Agniastra, Brahamastra, Dusparni ark etc.
- Used various types of natural methods of insect-pest controller like Pheromone traps,
- Cultivated mixed crops and used border crops for managing insects.
- Used live mulch and dead mulch.
- Participated in district and state level natural farming trainings

Comparison between Natural Farming and Conventional Farming

Parameters	Natural Farming	Conventional Farming
	(Area in ha)	(Area in ha)
Name of Crop		
Sugarcane	0.5	1.0
Turmeric	0.5	0
Cost of cultivation (Rs)	320000	175000
Production (q)	Sugarcane: 70 ton	Sugarcane: 100 ton
	Turmeric: 19 ton	
Gross return (₹)	1060000	300000
Net return (₹)	740000	125000
BC ratio	3.31	1.71

Benefits and achievements

- Reduced input cost.
- Reduced cost of cultivation.
- Resulted in higher yields with good turmeric quality, size and increased shelf life.
- Increased net income with the use of natural fertilizers and insecticides.
- Consumed and sold chemical-free food to the community.
- Improved soil health with high earthworm count.

Impact of the Technology

- Cost of Cultivation reduced
- Net Profit Increased
- Soil health improved.
- Quality of produce improved
- Many farmers visited his farm and started Natural Farming

Fig: Turmeric Production through Natural Farming

Success Story: 3

Name of Farmer: Manharbhai Ishvarbhai Lad Village: Karanj Taluka: Olpad District: Surat Education: M.com Mobile No: 9925242049

Introduction:

- Adopted natural farming since 2018.
- Earlier he was doing cotton and Pointed Gourd by chemical farming.
- He has 0.68 ha land under Natural farming.
- Adopted natural farming and used Beejamrit, Jivamrit and Ghanjivamrit for managing nutrients. He also follows mulching practice.
- Used Neemastra and Brahmastra for controlling pests and diseases.

Training and guidance of KVK

- Used ICT mechanism (WhatsApp and face book).
- Participated in exhibitions / workshops and forums regularly.
- Regular trainings & visit by KVK scientists.

Practices adopted

- Adopted natural farming since 2018.
- Cultivated Greengram, Carrot & Maize crop under Natural farming.
- Cultivated Banana ,Guava , Moringa etc. in jungle model of Natural Farming
- Prepared and used Beejamrit and Jivamrit.
- Prepared and used Dusparni ark, Brahmastra, Neemastra and Agniastra for controlling pests & diseases

Comparison between Natural Farming and Conventional Farming

Parameters	Natural Farming	Conventional Farming
Name of Crop	Mango, Lemon, Drumstick, Guava, Banana,	Cotton and Pointed Gourd
(Five Layer Model)	Jamun, Pomegranate, Ryan, Mulberry, Aonla,	
	Litchi, Fig, Apple, Turmeric Pointed Gourd,	
	Papaya, Custard apple, Fenugreek, Palak,	
	Coriander, Brinjal, Tomato etc	
(Area in ha)	0.68	0.68
Cost of cultivation (Rs)	70000	800000
Production (q)		Cotton:12 Qtl.
		Pointed Gourd: 25 Qtl.
Gross return (₹)	200000	35000+50000=85000
Net return (₹)	130000	50000
BC ratio	2.86	1.06

Benefits and achievements

- Utilized crop residues for mulching.
- Improved soil health.
- Value addition by making Jiggery from natural farming.

• Consulted by many famers for natural farming.

Impact of the Technology:

- Cost of Cultivation reduced
- Net Profit Increased
- Soil health improved.
- Quality of produce improved
- Many farmers visited his farm and started Natural Farming

Fig: Mango, Banana, Guava etc. Production through Natural Farming

E. Give details of innovative methodology or innovative technology of Transfer of Technology developed and used during the year:

Technology transfer - OLN-Novel, Novel plus, Novel prime, Bio-fertilizers

F. Give details of indigenous technology practiced by the farmers in the KVK operational area which can be considered for technology development (in detail with suitable photographs)

S.	Crop /	ITK Practiced	Purpose of ITK
No.	Enterprise		
1	Caster	Soak seed with sour butter milk overnight to control the catterpiller in caster	Plant Protection
		crop and may be used in other crops too.	
2	Paddy	Removed of tips in Paddy and other seedlings to enhance drought tolerance	Agronomy
		and also sustained to water logging/ flowing condition.	

5.1. Indicate the specific training need analysis tools/methodology followed for

A. Practicing Farmers

- a) Group discussion
- b) Power point presentation
- c) Method demonstration
- d) Film show

B. Rural Youth

- a) Group discussion
- b) Power point presentation
- c) Method demonstration
- d) Film show
- C. In-service personnel
- a) Group discussion
- b) Power point presentation
- c) Method demonstration
- d) Film show

5.2. Indicate the methodology for identifying OFTs/FLDs: As per methodology mentioned in Table No. 2.7

5.3. Field activities: As mentioned in Table No. 2.7 and 3.1 B

6. LINKAGES

A. Functional linkage with different organizations

Name of organization	Nature of linkage	
ATMA	Training, Exhibitions, Best ATMA Award Participation,	
	Meeting	
Line departments (Horticulture & Agriculture)	Training, Seminar, Exhibition and Shibir	
Animal Husbandry	Pasupalan Shibir	
NABARD	Trainings, FLD distribution, Exhibition	
Ambuja Cement Foundation	Meeting, Special Day Celebration	
Forest	Shibir	
Care India	Trainings, Special Day Celebration, Shibir	
KVSVS	Trainings, Special Day Celebration	
ICDS	Training, Exhibition, Millets Recipe Competition	

B. List special programmes undertaken by the KVK and operational now, which have been financed by State Govt./Other Agencies

Name of the scheme	Date/ Month of initiation	Funding agency(State Govt./Other Agencies)	Amount (Rs.)
Training and Capacity building programme for women in dairy farming sector in Surat district	December-2022 to March-2023	National Commission for women Government of India New Delhi	480000

C. Details of linkage with ATMA

a) Is ATMA implemented in your district Yes/No

If yes, role of KVK in preparation of SREP of the district?

Coordination activities between KVK and ATMA

D. Give details of programmes implemented under National Horticultural Mission

S. No.	Programme	Nature of linkage	Funds received if any Rs.	Expenditure during the reporting period in Rs.	Constraints if any
-	-	-	-	-	-

E. Nature of linkage with National Fisheries Development Board

S. No.	Programme	Nature of linkage	Funds received if any Rs.	Expenditure during the reporting period in Rs.	Remarks
-	-	-	-	-	-

F. Details of linkage with RKVY

S. No.	Programme	Nature of linkage	Funds received if any Rs.	Expenditure during the reporting period in Rs.	Remarks
-	-	-	-	-	-

G. Details of linkage with PKVY (Paramparagat Krishi Vikas Yojana)

S. No.	Programme	Nature of linkage	Funds received if any Rs.	Expenditure during the reporting period in Rs.	Remarks
-	-	-	-	-	-

H. Details of linkage with NFSM

S. No.	Programme	Nature of linkage	Funds received if any Rs.	Expenditure during the reporting period in Rs.	Remarks
-	-	-	-	-	-

I. Details of linkage with SMAF (Sub-mission on Agroforestry)

S. No.	Programme	Nature of linkage	Funds received if any Rs.	Expenditure during the reporting period in Rs.	Remarks
-	-	-	-	-	-

7. Convergence with other agencies and departments:

8. Innovative Farmers Meet

S. No.	Particulars	Details
	Have you conducted Farm Innovators meet in your district?	No

9. Farmers Field School (FFS)

S. No	Thematic area	Title of the FFS	Budget proposed in Rs.	Expenditure	Brief report
-	-	-	-	-	-

10.1. Technical Feedback of the farmers about the technologies demonstrated and assessed:

S.N.	Сгор	Technology demonstrated	Feed back
1	Paddy	GNRH -2	 Medium slender grain rice It is moderately resistant against bacterial leaf blight, leaf
			blast, grain discoloration and sheath rot.
			3. Tolerant to insect pest like BPH, WBPH, leaf folder and
			Stem borer. 4 Suitable for rice growing areas of South Guiarat
2	Paddy	GR -17(Sardar)	1 Farly maturing Long hold grain
2	1 addy	OK -17(Sardar)	2. Moderately resistant against bacterial leaf blight, leaf blast.
			grain discoloration, sheath rot, WBPH and leaf folder
			1. Suitable for transplanted rice growing areas.
3	Paddy	GNR -9(Lal-	1.Red Kernel
	-	Kada Gold)	2.Bio-fortified variety
4	Paddy	GR – 24(Navsari	1.Long Slender
	-	Parimal)	2.Early maturing
			3.Non-Lodging
5	Paddy	GR-18(Devli	1.Medium Slender
	-	Kolam)	2.Medium Resistant to Pest & diseases
			3.Early maturing & Non-lodging
6	Paddy	GR – 16	1.Early maturing upland rice variety
		(Tapi)	2.Long bold variety with good grain quality,
			3. Moderately resistant reaction against leaf blast and insect
			pest like stem borer and sheath mite. Suitable for upland
			rice growing areas.
7	Sorghum	GNJ-1	1.High yielding
	0 1		2.Less incidence of smut, shoot borer and grain mould
8	Sorgnum	Phule Revati	2. Suitable for Pabi season
9	Sovhean	NRC-37	1 Moderate yield 2 Early maturing
	Soybean	NRC-37	3 Moderately Resistant to Pest & disease
10	Green gram	GM-6	1.Moderate Yield
	e		2.Moderately Resistance to YMD
11	Sesame	GT-5	1.Moderate yield
			2. Moderately Resistant to Helicoverpa
12	Groundnut	GG-34	1.Higher yield with bold grain
			2. Tolent to rust and late tikka disease
			3.Lower infestation of trips and jassids
13	Cotton	G.Cot.Hy-10(Bt)	1.Higher yield 2.medium maturing
1.4	D'		3.Suitable for rainfed and irrigated area 4.Resistant to pest & diseases
14	Pigeonpea	GNP-2	1. Seed is round, Pods are of light green colour
15	Diggonnag	CT 104	2.1 Olerant to will and starility
15	Figeolipea	01-104	2 Red flowers & Pods set in clusters
16	Pigeonnea	GT-105	1 Resistant to sterility early maturing
10	1 igeoilpeu	01 105	2.Yellow flowers
17	Paddy	IPDM	Lower infestation of stem borer, leaf folder in paddy field:
			lower intensity of Bacterial Leaf Blight, blast, grain
			discoloration and other diseases, increase yield of paddy
18	Sugarcane	IPDM	Lower infestation of borers and sucking pests in sugarcane. less
	8		incidence of soil borne diseases, increase vield of sugarcane
19	Banana	IPDM	Less incidence of wilt, nematodes, less infestation of weevil in
			banana field, increase vield of banana
20	Pointed gourd	IPDM	Less incidence of soil borne and other diseases. less infestation
-			of pests, improve quality and production of pointed gourd fruits
21	Brinjal	IPDM	Lower infestation of fruit & shoot borer and sucking pests in
L		1	

			brinjal, decrease use of chemical fertilizers and pesticides;
			increase quality and yield of brinjal fruits
22	Okra	IPDM	Less infestation of insect pests, decrease use of chemical
			fertilizers and pesticides; increase in yield and quality of fruits
			in okra
23	Mango	IPDM	Less infestation of fruitfly and incidence of diseases, increase in
	_		yield and quality of mango fruits
24	Kitchen	Nutrition	Kitchen gardening gives continuous supply of fresh vegetables.
	Garden	Management	Income is generated by selling extra vegetables grown in
			kitchen garden.
			Farm women are not applying any pesticides in kitchen garden
			so they get organic vegetables.
25	Twin wheel	Drudgery	Twin wheel hoe weeder reduces women drudgery in terms of
	hoe	Reduction	time and physical hazards (finger injuries, wrist pain, muscle
			stress etc.)
			During weeding, field capacity is increased by using twin wheel
			hoe weeder as compared to local sickle.
26	Rake for	Drudgery	Rake for collecting garbage/ harvesting increases working
	collecting	Reduction	efficiency as compared to traditional method.
	garbage		Reduces fatigue, backache, muscle stress, wrist pain and pain in
			shoulders as compared to traditional method.
27	Stalk puller	Drudgery	Stalk puller increases working efficiency as compared to
		Reduction	traditional method.
			Stalk puller reduces fatigue, backache, muscle stress, wrist pain
			and pain in shoulders as compared to traditional method.

10.2. Technical Feedback from the KVK Scientists (Subject wise) to the research institutions/universities:

11. Technology Week celebration during 2023: No

Other Details

Types of Activities	No. of	Number of	Related crop/livestock technology
~	Activities	rarmers	
Gosthies	-	-	-
Lectures organized	-	-	-
