

OBJECTIVES

NON-PLAN	Research in Fruit Crops (BH 5014) Start Year: 1985
Objectives	▪ To evolve alternate and economically viable crops and cropping systems for grassland of this region. ▪ To develop agro techniques for mango fruit crop.

NON-PLAN	Establishment of Water Management (BH 7027) Start year 1986
Objectives	▪ To determine the water requirements of different fruit crops grown under command area of Daman Ganga project. ▪ To determine the fertilizer requirement and cropping pattern of the traditional crops. ▪ To find out the proper method of irrigation in different soils for higher crop production and to maintain the soil fertility.

PLAN	National Agriculture Research Project Phase-2 (BH 12091-2) Start year 1989
Objectives	▪ Strengthening of research work on fruit and vegetable crops of this region, including mango. ▪ To conduct demonstrations of release technologies in vegetable and fruit crops and training program for tribal farmers.

PLAN	Strengthening of Water Management Scheme (BH 12027) Start year 1989
Objectives	▪ To determine the water fertilizer requirement of different fruit crops grown under command area of Daman Ganga project. ▪ To develop the system of conservation for rain water. ▪ To determine the cropping pattern of the command area of Daman Ganga project.

ICAR	AICRP-Cashew (BH 2048) Start year 2009-10
Objectives	▪ Standardizing agro techniques for cashew crop under different agro climatic situations of South Gujarat. ▪ Evolving cost effective and efficient pest and disease management practices. ▪ Evolving high yielding varieties with export grade kernels, tolerance/ resistance to pest and diseases

ICAR	AICRP on Fruits (BH 2014-5) Start year 1993
Objectives	▪ Collection, evaluation, documentation and utilization of the genetic resources. ▪ Improvement through breeding. ▪ Standardization of propagation techniques and rootstocks. ▪ Standardization of agro-techniques and use of bio-regulators. ▪ Management of pests, diseases and other disorders.
