Floriculture, Landscape Gardening and Value Addition of Flowers

EXTRA - CURRICULAR ACTIVITIES

Campus to corporate Programme

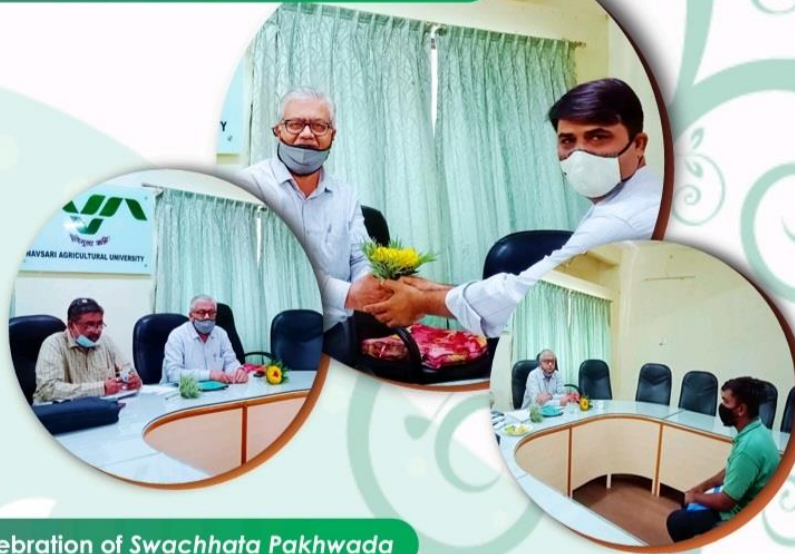

Dignitaries visit

Orientation Programme

Campus interview arranged by Placement cell

Celebration of Swachhata Pakhwada

Yoga shibir

Well Maintained Farm

Success Story of our passed out student

I am Himanshu Dilipbhai Mahyavanshi from **Gadat** village of **Tapi** district. I belong to middle class farming community of tribal area. After passing my SSC in 2010, I got admission in Horticulture Polytechnic, Navsari. The guidance of all the faculties during those three years of college imparted lots of horticultural knowledge to me, especially in the third year of experiential learning programme (HPWE), I learned so many new things of practical horticulture that helps me a lot.

After completion of diploma horticulture, I cleared entrance exam of Diploma to Degree programme as a result of the efforts made by the teachers through extra coaching classes. As a result of these efforts, I got admission in B. Sc. (Hons.) Horticulture at ASPEE College of Horticulture and Forestry, NAU, Navsari and completed my graduation in the year 2016. Then after I had attended interviews of many companies and also got a job in one of them but didn't join any as my goal was to become a government officer. I continued my preparation for all the competitive examinations and also attended coaching classes being given by faculties of Horticulture Polytechnic, Navsari. The guidance of all the faculties and my continuous efforts made me able to crack the agricultural assistant exam and joined as an agricultural assistant in 2017 at Polytechnic in Agriculture, Vyara. Selection on this post didn't make me satisfied and I continued work harder and harder for GPSC exam and cleared both theory and interview and joined my second government job as Horticulture officer (Class - II) at Chhota Udepur in the year 2018.

As stated earlier I belong to farmer community, I hereby assure the whole community to give technical knowledge and encouraging them by benefiting financial support through implementing government schemes.

I would like to thank God, my parents, friends, brothers, sisters and especially to all my teachers who guided me for all the way of life. I could not forget the days of my life that I spent in Horticulture Polytechnic, Navsari as well as ASPEE College of Horticulture and Forestry, Navsari or rather I would say Navsari Agriculture University, Navsari.
