

## Future Programmers :

- 1 Strengthening research in Niger crop (1988)**  
**Budget Head: 12009-5**

  - Evaluation of high yielding, fertilizer responsive, drought tolerant and disease-insect resistant varieties for *kharif* rain-fed and *rabi* unirrigated (on residual moisture) and *rabi* irrigated condition.
  - To work out the appropriate cropping system for *kharif* as well as *rabi* Niger (keeping Niger as the base crop).
- 2 Agronomic research on rain- fed/ dry farming crops in tribal area of South Gujarat (1997)**  
**Budget Head: 12129**

  - Development of high yielder & wide adaptable promising genotypes of rainfed oilseed crops *viz.*, Sesame, Safflower, linseed, Sunflower etc.
- 3 All India coordinated Research Project on Niger (2009)**  
**Budget Head: 2052**

  - The evaluation of high yield and oil potential varieties/populations of niger coupled with disease and pest resistance through various breeding methods are being made available for the farmers in the coming soon years.
- 4 Tribal Sub Plan /Front Line Demonstration on Niger by AICRP**  
**Budget Head: 2076**

  - The newly released variety of Niger for Western Zone is being popularized through conducting Tribal Sub plan (TSP)/ Front Line Demonstrations (FLD) in farmers fields. The agricultural inputs *viz.*, fertilizers, seed, pesticides and small implements beneficial to farmers are also being distributed for the betterment of tribal peoples life.
