

Navsari Agricultural University, Navsari

A vital aspect of any university is its placement & counselling activities. We at, **the Director of Students' Welfare (DSW) office of the Navsari Agricultural University (NAU), Navsari**, are well aware of the fact that the ultimate value of a progressive university offering higher education programmes would be the acceptability of its students in the corporate/outer world. In addition to this, Placements has always been a prime consideration for the students and their parents in selecting a particular course, institute and university as well. Considering this, we have already established a vibrant and successful ***"University Placement & Counselling Cell"***.

To instill a spirit of professionalism in the working of this cell, since 22nd June, 2012; our *Internationally Acclaimed HRD expert* **Dr. Mehul G. Thakkar** – **Associate Professor in HRM & TPO of our constituent college – ASPEE Agribusiness Management Institute (AABMI)** has been assigned the charge of this cell in the capacity of *"University Placement Head"*. Later on, since 1st January, 2013; in the best interest of the students of all the colleges/institutes of the University and to consolidate the University Placement & Counselling Cell by utilizing the professional HRD expertise, he has assigned the additional responsibility in the capacity of *"University Counselling Head"*.

This University Placement & Counselling Cell, working under the able guidance of **the honorable Director of Students' Welfare Dr. R. M. Naik in the capacity of the Chairman of the Cell**, has been established with a clear view to have an integrated linkage with renowned industries and others. This cell is actively involved in counselling the students for possible areas of career opportunities and enhancing student employability in the globally competitive scenario. Apart from providing assistance for project placement and final job placement to the students and assisting in publishing separate Placement Brochure of each institute annually; the cell is determined for overall professional development of the students through regular training and development interventions; industry-academia interaction, field/industrial visits and such other activities. So, the focus is not only on providing lucrative job opportunities to the interested and eligible students; but also on instilling lifetime confidence for career and life.

Under the direction and support of this University Placement & Counselling Cell, each of our college/institute is also having fully functional and active *"Placement & Counselling Cell"* at the Institute Level headed by Placement Officer of the respective institute and supported by a team of Placement Assistants.

So, along with the University Placement & Counselling Cell, we have 14 Institute Level Placement & Counselling Cells; which are actively working in the direction of ensuring holistic development of students and lucrative placement to them.
