આણંદ કૃષિ યુનિવર્સિટી  
આણંદ

**વિષય:** બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં National Cadet Corps /National Service Scheme કોર્ષને નોન ગ્રેડીઅલ (Non-gradial) કોર્ષ તરીકે સમાવેશ કરવા બાબત.

**સંદર્ભ:** કુલસચિવશ્રી, આણંદ કૃષિ યુનિવર્સિટી, આણંદની કચેરીના પત્રકમાંક આક્યુ/૨જી/પરિક્ષા/યુજી-૨/ ૬૯૧૭ -૨૮/ ૨૦૨૫, તા. ૦૬/૧૨/૨૦૨૫.

માનનીય સાહેબશ્રી,

સવિનય ઉપરોક્ત વિષય અને સંદર્ભ અન્વયે જણાવવાનું કે, આઈસીએઆરના છઠ્ઠા ડિન્સ કમીટીના રીપોર્ટ મુજબ વિવિધ વિદ્યાશાખામાં મંજૂર થયેલ જુદા જુદા નવા કોર્ષ સિલેબસનું અમલીકરણ સને ૨૦૨૪-૨૫માં પ્રથમ સેમેસ્ટરથી અમલવારી કરવામાં આવેલ છે. આઈસીએઆરના છઠ્ઠા ડિન્સ કમીટીના રીપોર્ટ મુજબ ફક્ત પ્રથમ અને બીજા સેમેસ્ટરમાંજ National Cadet Corps/National Service Scheme કોર્ષનો ગ્રેડીઅલ (Gradial) કોર્ષ તરીકે સમાવેશ કરેલ છે. આથી વિદ્યાર્થીઓનો હિત માટે ત્રીજા અને ચોથા સેમેસ્ટર બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં National Cadet Corps/National Service Scheme કોર્ષનો નોન ગ્રેડીઅલ (Non-gradial) કોર્ષ તરીકે સમાવેશ કરવાનું નક્કી કરવામાં આવેલ છે. (તા.૦૫/૧૨/૨૦૨૫ના રોજ યોજાયેલ ઓનલાઈન બેઠકની કાર્યવાહીની નોંધ નક્યુ/અશબી/એકેડેમીક/૨૦૩૭/૨૦૨૫, તા.૦૬/૧૨/૨૦૨૫).

વધુમાં પ્રથમ સેમેસ્ટરથી આઠમાં સેમેસ્ટર સુધીનો છઠ્ઠા ડિન્સ કમીટીના રીપોર્ટ મુજબ બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રી કોર્ષમાં નવા કોર્ષ નંબર, ટાઈટલ અને ક્રેડીટ, સિલેબસ વગેરે તૈયાર કરી અપનાવવામાં આવેલ છે (એનેક્ષર ૧ અને ૨). જે આ સાથે સામેલ રાખી આગળની કાર્યવાહી માટે મોકલી આપવામાં આવે છે.

સામેલ: ઉપર મુજબ

નોડલ/કો-ઓર્ડિનેટર બાયોટેકનોલોજી વિદ્યાશાખા અને  
આચાર્ય અને ડીન

નકલ રવાના સવિનય રવાના:

૧. કુલસચિવશ્રી, નવસારી કૃષિ યુનિવર્સિટી, નવસારીને જાણ થાવ સારું.
૨. આચાર્ય અને ડીનશ્રી, કોલેજ ઓફ બેઝીક સાયન્સ એન્ડ હ્યુમાનીટીઝ, સરદારકૃષિનગર દાંતીવાડા કૃષિ, યુનિવર્સિટી, સરદારકૃષિનગરને જાણ થાવ સારું.

ત્રીજા અને ચોથા સેમેસ્ટર બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં National Cadet Corps /National Service Scheme કોર્સને નોન ગ્રેડીઅલ (Non-gradial) કોર્સ તરીકે સમાવેશ કરવા તેમજ 6<sup>th</sup> Deans' Committee રીપોર્ટ મુજબ બાયોટેકનોલોજી વિદ્યાશાખામાં ત્રીજા સેમેસ્ટરથી આઠમાં સેમેસ્ટરના કોર્સના સિલેબસની અમલવારી કરવા અંગે તા.૦૫/૧૨/૨૦૨૫ ના રોજ મળેલ બેઠકની કાર્યનોંધ

ગુજરાત રાજ્ય કૃષિ યુનિવર્સિટીઓમાં શૈક્ષણિક વર્ષ ૨૦૨૪-૨૫ થી ત્રીજા અને ચોથા સેમેસ્ટર બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં National Cadet Corps /National Service Scheme કોર્સને નોન ગ્રેડીઅલ (Non-gradial) કોર્સ તરીકે સમાવેશ કરવા તેમજ 6<sup>th</sup> Deans' Committee રીપોર્ટ મુજબ બાયોટેકનોલોજી વિદ્યાશાખામાં ત્રીજા સેમેસ્ટરથી આઠમાં સેમેસ્ટરના કોર્સના સિલેબસની અમલવારી કરવા અંગે જરૂરી ચર્ચા વિચારણા માટે તા.૦૫/૧૫/૨૦૨૫ના રોજ બપોરે ૦૩:૦૦ કલાકે યોજાયેલ ઓનલાઇન બેઠકની કાર્યવાહીની નોંધ.

આ બેઠકમાં નાચે જણાવેલ અધિકારીશ્રીઓ હાજર હતા.

Sr. No.	Name	Designation
1	Dr. Sanjay Jha	Principal & Dean, ASBI, NAU, Surat
2	Dr. H. S. Bhadoriya	Principal & Dean, CBSH, SDAU, Sardarkrushinagar
3	Dr. C. J. Patel	Professor, ASBI, NAU, Surat
4	Dr. V. A. Joshi	Academic In-charge, CBSH, SDAU, Sardarkrushinagar
5	Dr. H. V. Patel	Academic In-charge, ASBI, NAU, Surat

બેઠકની શરૂઆતમાં ડૉ. એચ. વી. પટેલ, એકેડેમી ઈન્ચાર્જ, અશબી, નકુયુ, સુરત બેઠકમાં હાજર અધિકારીશ્રીઓનું સ્વાગત કરી આવકાર્યા હતા. ત્યાર બાદ નીચે જણાવેલ વિગતે મુદ્દાસર ચર્ચા કરી નીચે મુજબના નિર્ણયો લેવામાં આવ્યા.

મુદ્દા નં.-૧	ત્રીજા અને ચોથા સેમેસ્ટર બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં National Cadet Corps /National Service Scheme કોર્સને નોન ગ્રેડીઅલ (Non-gradial) કોર્સ તરીકે સમાવેશ કરવા બાબત			
	ગુજરાત રાજ્યની ચારેય કૃષિ યુનિવર્સિટીમાં કાર્યરત એગ્રીકલચર કોર્સમાં ત્રીજા અને ચોથા સેમેસ્ટરમાં National Cadet Corps /National Service Scheme કોર્સને નોન ગ્રેડીઅલ (Non-gradial) કોર્સ તરીકે સમાવેશ કરેલ છે (કાર્યવાહીની નોંધ એસીએન/પુજી/સી-૧/૮૧૯૦-૯૩/૨૦૨૫, તા.૧૦/૦૬/૨૦૨૫). સદરહુ મુદ્દા અન્વયે વિસ્તૃત ચર્ચા વિચારણાના અંતે ત્રીજા અને ચોથા સેમેસ્ટર બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં National Cadet Corps/National Service Scheme કોર્સને નોન ગ્રેડીઅલ (Non-gradial) કોર્સ તરીકે સમાવેશ કરવાનું સર્વાનુમતે નક્કી કરવામાં આવેલ હતા. સદર કોર્સ માટે નીચે મુજબ કોર્સ નામ, કોર્સ નંબર અને કોર્સ ક્રેડિટ નક્કી કરી અપનાવવામાં આવેલ છે. જેની ભલામણ/અમલીકરણ ચાલુ વર્ષ ૨૦૨૫-૨૬થી કરવાનું સર્વાનુમતે નક્કી કરવામાં આવ્યું. સદર બાબત આગળની કાર્યવાહી કૃષિ યુનિવર્સિટીના નિયમાનુસાર કરવામાં આવશે.			
	સેમેસ્ટર	કોર્સ નામ	કોર્સ નંબર	કોર્સ ક્રેડિટ
	ત્રીજુ સેમેસ્ટર	National Cadet Corps III OR National Service Scheme III	NCC III OR NSS III	0+1 (Non-gradial)
	ચોથુ સેમેસ્ટર	National Cadet Corps IV OR National Service Scheme IV	NCC IV OR NSS IV	0+1 (Non-gradial)
મુદ્દા નં.-૨	6 <sup>th</sup> Deans' Committee રીપોર્ટ મુજબ બી. ટેક. (બાયોટેકનોલોજી) ડિગ્રીમાં ત્રીજા સેમેસ્ટરથી આઠમાં સેમેસ્ટરના કોર્સના સિલેબસની અમલીવાર કરવા બાબત			
	સદર મુદ્દા અન્વયે તા.૧૬/૦૧/૨૦૨૫ના રોજ બપોરે ૦૩:૦૦ કલાકે યોજાયેલ ઓનલાઇન બેઠકની કાર્યવાહીની નોંધ નકુયુ/અશબી/એકેડેમીક/6 <sup>th</sup> Deans/૧૭૩/૨૦૨૫, તા.૨૧/૦૧/૨૦૨૫ મુજબ સર્વાનુમતે નક્કી કરવામાં ત્રીજા સેમેસ્ટરથી આઠમાં સેમેસ્ટર સુધીમાં આવેલ કોર્સ નંબરની સાથે કોર્સ સિલેબસ અપનાવવામાં આવેલ છે.			

બેઠકના અંતે ડૉ. સિરેન વી. પટેલ દ્વારા સદર બેઠકમાં હાજર રહેલ સર્વ અધિકારીશ્રીઓનો આભાર વ્યક્ત કરીને બેઠકને પૂર્ણ જાહેર કરી.

			<b>20</b>
<b>Fourth Semester</b>			
1	BI 401	Introductory Bioinformatics	4(3+1)
2	PB 401	Molecular Marker Technology	2(2+0)
3	AB 401	Biodiversity and Its Conservation	2(2+0)
4	BS 401	Basic Biochemistry	4(3+1)
5	GC 401	Human Ethics	1(1+0)
6	MDC-III	Agriculture Marketing and Trade	3(2+1)
7	VAC-II	Agriculture Informatics and Artificial Intelligence	3(2+1)
8	PB 402	Practices in Molecular Marker Technology	2(0+2)
			<b>21</b>
<b>Fifth Semester</b>			
1	MEB 501	Microbial Genetics	4(3+1)
2	AB 501	Molecular Genetics	3(3+0)
3	AB 502	Nanobiotechnology	4(3+1)
4	AB 503	Animal Biotechnology	3(2+1)
5	AB 504	Genomics and Proteomics	3(3+0)
6	AB 505	Enzymology and Enzyme Technologies	3(2+1)
7	MEB 502	Immunology	3(2+1)
8	EDU TOUR 501	Educational Tour	2(0+2)NG
			<b>23+ 2 NG</b>
<b>Sixth Semester</b>			
1	BI 601	Molecular Diagnostics	3(2+1)
2	MEB 601	Industrial Biotechnology	3(3+0)
3	BI 602	Epigenetics and Gene Regulation	2(2+0)
4	BI 603	IPR, Biosafety and Bioethics	2(2+0)
5	BI 604	Computational Biology	3(2+1)
6	AS 601	Introduction to Animal Breeding	3(2+1)
7	BS 601	Biostatistics	2(1+1)
8	GC 602	Food Science and Processing	3(2+1)
			<b>21</b>
<b>Seventh Semester</b>			
	<b>Elective I. Plant Biotechnology</b>		
1	PB 701	Applications of Genomics and Proteomics	4(3+1)
2	PB 702	Principles of Molecular Breeding	4(3+1)

3	PB 703	Principles and Procedures of Plant Tissue Culture	3(2+1)
4	PB 704	Molecular Breeding in Field and Horticultural Crops	3(2+1)
5	PB 705	Seed Biology, Biotechnology, Production and Management	3(2+1)
6	PB 706	Plant Genetic Transformation	3(2+1)
			<b>20</b>
<b>Elective II. Animal Biotechnology</b>			
1	AB 701	Principles and Procedures of Animal Cell Culture	4(3+1)
2	AB 702	Animal Genomics	4(3+1)
3	AB 703	Transgenic Animal Production	3(3+0)
4	AB 704	Molecular Virology and Vaccine Production	3(2+1)
5	AB 705	Embryo Transfer Technologies	3(2+1)
6	AB 706	Animal Reproductive Biotechnology	3(2+1)
			<b>20</b>
<b>Elective III. Microbial and Environmental Biotechnology</b>			
1	MEB 701	Fundamentals of Molecular Pharming and Biopharmaceuticals	4(3+1)
2	MEB 702	Microbial Biotechnology	4(3+1)
3	MEB 703	Bioprospecting of Genes and Molecules	3(3+0)
4	MEB 704	Molecular Ecology and Evolution	3(3+0)
5	MEB 705	Food Biotechnology	3(2+1)
6	MEB 706	Green Biotechnology	3(2+1)
			<b>20</b>
<b>Elective IV. Bioinformatics</b>			
1	BI 701	Programming in Bioinformatics	4(2+2)
2	BI 702	Bioinformatics Tools and Biological Databases	3(2+1)
3	BI 703	Structural Bioinformatics	3(2+1)
4	BI 704	Pharmacogenomics	3(2+1)
5	BI 705	Metabolomics and Systems Biology	4(3+1)
6	BI 706	Computational Methods for Data Analysis	3(2+1)
			<b>20</b>
<b>Eighth Semester</b>			
1	SR 801	Student READY (RAW/industry attachment/experiential learning/hands on training/project work/internship) in the area of Plant Biotechnology, Animal Biotechnology, Microbial and Environmental Biotechnology and Bioinformatics	20(0+20)

NG 801	MOOCs/Online Courses	0+10 (NG)
Total credits	<b>171 (167+4 NG) +10 (MOOCs/Online Courses)</b>	

**Online course:** The students have to **complete online courses of ten (10) credits preferably in 3<sup>rd</sup> and 4<sup>th</sup> year.** For this purpose, with the intimation to the college, he/she will have to get registered for the online course, undergo it and clear it satisfactorily.

# BIOTECHNOLOGY

## Course Curricula for Undergraduate Programme in Biotechnology UG-Certificate in Biotechnology UG-Diploma in Biotechnology B. Tech. Biotechnology

### INTRODUCTION

Biotechnology encompasses a range of tools and techniques aimed at comprehending the molecular biology of plants and animals to facilitate precise enhancements. Recent advancements in these methodologies have enabled remarkable progress in manipulating macromolecules such as DNA, RNA, and proteins, ultimately benefiting both plants and animals. It is crucial to equip undergraduates with skills in Biotechnology to address the increasing global demand. Recognizing this need, the VI Deans' Committee has undertaken the task of restructuring the Biotechnology course curriculum. The core tenets of the National Education Policy (NEP) have been integrated into the curriculum. Alongside fundamental coursework, students now have access to Skill Enhancement Courses (SECs), which are meticulously crafted to instill proficiency in various facets of Biotechnology. Furthermore, a *Deeksharambh* (Foundation Course) along with the Multi-Disciplinary Courses (MDCs), Value Added Courses (VAC), Ability Enhancement Courses (AECs) and internships have been included. During their final year (first semester of fourth year), students will have the flexibility to select elective courses. These elective courses are structured around four primary themes: Plant Biotechnology, Animal Biotechnology, Microbial and Environmental Biotechnology, and Bioinformatics.

This report reflects the outcomes of extensive consultations and discussions with Deans' and educators from diverse Universities across the country. It is my earnest belief that students will immensely benefit from the amalgamation of theoretical knowledge and practical skills embedded within these restructured program.

### Highlights

- The B.Tech. (Biotechnology) program is designed over 4 years, covering 167 credit hours of coursework. Additionally, students to register in 4 credit hours of non-gradual courses and 10 credit hours of MOOCs/Online Courses.
- The coursework consists of 112 credit hours, comprising 80 credits in major courses (including 20 credit hours of elective courses) and 32 credits in minor courses, 9 credit hours of MDC, 6 credit hours of VAC, 8 credit hours of AEC, 12 credit hours of SEC, and 20 credit hours of student READY activities. Two credit hours of non-gradual courses and 10 credit hours of (massive open online courses) MOOCs/Online Courses.
- Upon completing the first year and undertaking a 10-credit (10-week) industry/institute training or internship, students qualify for the first-level exit with a UG-Certificate in Biotechnology. However, students advancing to the second year of the program will not participate in this industry or institute training/internship.
- Upon completing the first and second years and undertaking a 10-credit (10-week) industry/institute training or internship, students are eligible for the second level exit with a UG-Diploma in Biotechnology. However, students progressing to the third year of the program will not participate in this industry or institute training/internship.
- During the fifth and sixth semesters in the third year, the students will be offered with specialized and advanced courses in Biotechnology and related disciplines. In the fifth semester, students participate in an Educational Tour spanning two weeks (10-14 days), designated as a non-gradual course.
- A selection of courses categorized under four elective themes is proposed to provide a total of 20 credits in the seventh semester. Institutes may choose to adjust this selection to include additional specialized and advanced courses in areas such as Plant Biotechnology, Animal Biotechnology, Microbial and Environmental Biotechnology, and Bioinformatics.
- In the eighth semester, the student READY including in-plant training (RAWE/industry attachment/experiential learning/hands on training/project work/internship) will be taken up by the students.
- Students will enroll MOOCs/Online Courses totaling 10 credit hours during the four years (preferably during the third and fourth years) through approved portals with prior notification to the Head of the Institution.

### Entry and Exit Options

The entry and exit options for the UG program in Biotechnology are shown in the Figure 1.

\*Equivalent programme as decided as per the norms of University /UGC/ICAR.

Figure 1. Entry and exit options for the UG program in Biotechnology.

#### Exit options

1. **UG-Certificate in Biotechnology:** Exit after the first year and completion of a 10-week internship.
2. **UG-Diploma in Biotechnology:** Exit after the second year and completion of a 10-week internship.
3. **B. Tech. Biotechnology:** On successful completion of four-year degree requirements.

**Eligibility Criteria:** 10+2 or intermediate with Physics, Chemistry, Mathematics, Biology from a recognized Board/University or as per the criteria decided by the ICAR/ SAU.

**ACADEMIC PROGRAM**  
**Four-Year B. Tech. Biotechnology**

3.	Bioprospecting of Genes and Molecules	3 (3+0)	
4.	Molecular Ecology and Evolution	3 (3+0)	
5.	Food Biotechnology	3 (2+1)	
6.	Green Biotechnology	3 (2+1)	
<b>Elective IV. Bioinformatics</b>			
1.	Programming in Bioinformatics	4 (2+2)	<b>20 (13+7)</b>
2.	Bioinformatics Tools and Biological Databases	3 (2+1)	
3.	Structural Bioinformatics	3 (2+1)	
4.	Pharmacogenomics	3 (2+1)	
5.	Metabolomics and Systems Biology	4 (3+1)	
6.	Computational Methods for Data Analysis	3 (2+1)	
<b>Semester VIII</b>			
1.	Student READY (RAWE/industry attachment/experiential learning/hands on training/project work/internship) in the area of Plant Biotechnology, Animal Biotechnology, Microbial and Environmental Biotechnology and Bioinformatics	20 (0+20)	<b>20 (0+20)</b>

### Department-Wise Course Breakup

Sl. No	Department-wise Courses	Credit Hours
<b>Agriculture Courses</b>		
1.	Farming Based Livelihood Systems	3 (2+1)
2.	Introduction to Plant Breeding	3 (2+1)
3.	Fundamentals of Crop Protection	3 (2+1)
4.	Agriculture Marketing and Trade	3 (2+1)
<b>Animal Science Courses</b>		
1.	Livestock Production and Management	3 (2+1)
2.	Anatomy and Physiology of Livestock	3 (2+1)
3.	Livestock Product Technology	3 (2+1)
4.	Introduction to Animal Breeding	3 (2+1)

Sl. No	Department-wise Courses	Credit Hours
<b>Basic Science Courses</b>		
1.	Plant Physiology	3 (2+1)
2.	Biomathematics	2 (2+0)
3.	Basic Biochemistry	4 (3+1)
4.	Enzymology and Enzyme Technologies	3 (2+1)
5.	Immunology	3 (2+1)
6.	Biostatistics	2 (1+1)
<b>Biotechnology Core Courses</b>		
1.	Molecular Biology	3 (3+0)
2.	Introductory Cell Biology	3 (3+0)
3.	Fundamentals of Genetics	3 (3+0)
4.	Practices in Plant Tissue Culture	2 (0+2)
5.	Practices in Animal cell Culture	2 (0+2)
6.	Laboratory Management and Instrumentation	2 (0+2)
7.	Introduction to Biotechnology	3 (3+0)
8.	Elementary Microbiology	2 (1+1)
9.	Basic Techniques of Molecular Biology and Biotechnology	2 (0+2)
10.	Bioinformatics and Biocomputation	2 (0+2)
11.	Recombinant DNA Technology	2 (2+0)
12.	Classical and Molecular Cytogenetics	3 (2+1)
13.	Methods in Recombinant DNA Technology	2 (0+2)
14.	Introductory Bioinformatics	4 (3+1)
15.	Molecular Marker Technology	2 (2+0)
16.	Biodiversity and Its Conservation	2 (2+0)
17.	Practices in Molecular Marker Technology	2 (0+2)
18.	Microbial Genetics	4 (3+1)
19.	Molecular Genetics	3 (3+0)
20.	Nanobiotechnology	4 (3+1)
21.	Animal Biotechnology	3 (2+1)
22.	Genomics and Proteomics	3 (3+0)
23.	Molecular Diagnostics	3 (2+1)
24.	Industrial Biotechnology	3 (3+0)
25.	Epigenetics and Gene Regulation	2 (2+0)
26.	IPR, Biosafety and Bioethics	2 (2+0)
27.	Applications of Genomics and Proteomics	4 (3+1)
28.	Principles of Molecular Breeding	4 (3+1)
29.	Principles and Procedures of Plant Tissue Culture	3 (2+1)
30.	Molecular Breeding in Field and Horticultural Crops	3 (2+1)
31.	Seed Biology, Biotechnology, Production and Management	3 (2+1)

Sl. No	Department-wise Courses	Credit Hours
32.	Plant Genetic Transformation	3 (2+1)
33.	Principles and Procedures of Animal Cell Culture	4 (3+1)
34.	Animal Genomics	4 (3+1)
35.	Transgenic Animal Production	3 (3+0)
36.	Molecular Virology and Vaccine Production	3 (2+1)
37.	Embryo Transfer Technologies	3 (2+1)
38.	Animal Reproductive Biotechnology	3 (2+1)
39.	Fundamentals of Molecular Pharming and Biopharmaceuticals	4 (3+1)
40.	Microbial Biotechnology	4 (3+1)
41.	Bioprospecting of Genes and Molecules	3 (3+0)
42.	Molecular Ecology and Evolution	3 (3+0)
43.	Food Biotechnology	3 (2+1)
44.	Green Biotechnology	3 (2+1)
45.	Programming in Bioinformatics	4 (2+2)
46.	Bioinformatics Tools and Biological Databases	3 (2+1)
47.	Structural Bioinformatics	3 (2+1)
48.	Pharmacogenomics	3 (2+1)
49.	Metabolomics and Systems Biology	4 (3+1)
50.	Computational Methods for Data Analysis	3 (2+1)
<b>Deficiency/Remedial Courses</b>		
1.	Basic Mathematics	2 (2+0)
2.	Basic Botany	2 (2+0)
3.	Basic Zoology	2 (2+0)
<b>General Courses</b>		
1.	National Cadet Corps I/ National Service Scheme I	1 (0+1)
2.	Communication Skill	2 (1+1)
3.	Entrepreneurship Development and Business Management	3 (2+1)
4.	Environmental Studies and Disaster Management	3 (2+1)
5.	National Cadet Corps II/ National Service Scheme II	1 (0+1)
6.	Personality Development	2 (1+1)
7.	Physical Education, First Aid and Yoga Practice	2 (0+2)
8.	Human Ethics	1 (1+0)
9.	Agriculture Informatics	3 (2+1)
10.	Computational Biology	3 (2+1)
11.	Food Science and Processing	3 (2+1)
<b>Student READY</b>		<b>20 (0+20)</b>
<b>Non-gradual Courses</b>		
1.	Deeksharambh (Foundation Course)	2 (0+2)

Sl. No	Department-wise Courses	Credit Hours
2.	Educational Tour	2 (0+2)
<b>MOOCs/Online Courses</b>		<b>10 (0+10)</b>

### Summary of Credit Hours for Different Categories of Courses

Sl. No.	Major Courses	Credit Hours	Total Credit Hours
1	Molecular Biology	3 (3+0)	<b>60 (51+9)</b>
2	Introductory Cell Biology	3 (3+0)	
3	Fundamentals of Genetics	3 (3+0)	
4	Introduction to Biotechnology	3 (3+0)	
5	Introduction to Plant Breeding	3 (2+1)	
6	Elementary Microbiology	2 (1+1)	
7	Livestock Production and Management	3 (2+1)	
8	Recombinant DNA Technology	2 (2+0)	
9	Classical and Molecular Cytogenetics	3 (2+1)	
10	Introductory Bioinformatics	4 (3+1)	
11	Molecular Marker Technology	2 (2+0)	
12	Biodiversity and Its Conservation	2 (2+0)	
13	Microbial Genetics	4 (3+1)	
14	Molecular Genetics	3 (3+0)	
15	Nanobiotechnology	4 (3+1)	
16	Animal Biotechnology	3 (2+1)	
17	Genomics and Proteomics	3 (3+0)	
18	Molecular Diagnostics	3 (2+1)	
19	Industrial Biotechnology	3 (3+0)	
20	Epigenetics and Gene Regulation	2 (2+0)	
21	IPR, Biosafety and Bioethics	2 (2+0)	
<b>Minor Courses</b>			
1	Basic Mathematics/Basic Botany/Basic Zoology	2 (2+0)	<b>32 (23+9)</b>
2	Plant Physiology/Anatomy and Physiology of Livestock	3 (2+1)	
3	Fundamentals of Crop Protection/Livestock Product Technology	3 (2+1)	
4	Biomathematics	2 (2+0)	
5	Basic Biochemistry	4 (3+1)	
6	Human Ethics	1 (1+0)	
7	Enzymology and Enzyme Technologies	3 (2+1)	
8	Immunology	3 (2+1)	

9	Computational Biology	3 (2+1)	
10	Introduction to Animal Breeding	3 (2+1)	
11	Biostatistics	2 (1+1)	
12	Food Science and Processing	3 (2+1)	
<b>Multi-Disciplinary Courses</b>			
1	Farming Based Livelihood Systems	3 (2+1)	<b>9 (6+3)</b>
2	Entrepreneurship Development and Business Management	3 (2+1)	
3	Agriculture Marketing and Trade	3 (2+1)	
<b>Value Added Courses</b>			
1	Environmental Studies and Disaster Management	3 (2+1)	<b>6 (4+2)</b>
2	Agriculture Informatics	3 (2+1)	
<b>Ability Enhancement Courses</b>			
1	National Cadet Corps I/ National Service Scheme I	1 (0+1)	<b>8 (2+6)</b>
2	Communication Skill	2 (1+1)	
3	National Cadet Corps II/ National Service Scheme II	1 (0+1)	
4	Personality Development	2 (1+1)	
5	Physical Education, First Aid and Yoga Practice	2 (0+2)	
<b>Skill Enhancement Courses (SEC)</b>			
1	SEC 1: Practices in Plant Tissue Culture/ Practices in Animal Cell Culture	2 (0+2)	<b>12 (0+12)</b>
2	SEC 2: Laboratory Management and Instrumentation	2 (0+2)	
3	SEC 3: Basic Techniques of Molecular Biology and Biotechnology	2 (0+2)	
4	SEC 4: Bioinformatics and Biocomputation	2 (0+2)	
5	SEC 5: Practices in Recombinant DNA Technology	2 (0+2)	
6	SEC 6: Practices in Molecular Marker Technology	2 (0+2)	
<b>Elective Courses in Plant Biotechnology</b>			
1	Applications of Genomics and Proteomics	4 (3+1)	<b>20 (14+6)</b>
2	Principles of Molecular Breeding	4 (3+1)	
3	Principles and Procedures of Plant Tissue Culture	3 (2+1)	
4	Molecular Breeding in Field and Horticultural Crops	3 (2+1)	
5	Seed Biology, Biotechnology, Production and Management	3 (2+1)	
6	Plant Genetic Transformation	3 (2+1)	
<b>Elective Courses in Animal Biotechnology</b>			
1	Principles and Procedures of Animal Cell Culture	4 (3+1)	<b>20 (15+5)</b>
2	Animal Genomics	4 (3+1)	
3	Transgenic Animal Production	3 (3+0)	
4	Molecular Virology and Vaccine Production	3 (2+1)	

5	Embryo Transfer Technologies	3 (2+1)	
6	Animal Reproductive Biotechnology	3 (2+1)	
<b>Elective Courses in Microbial and Environmental Biotechnology</b>			
1	Fundamentals of Molecular Pharming and Biopharmaceuticals	4 (3+1)	<b>20 (16+4)</b>
2	Microbial Biotechnology	4 (3+1)	
3	Bioprospecting of Molecules and Genes	3 (3+0)	
4	Molecular Ecology and Evolution	3 (3+0)	
5	Food Biotechnology	3 (2+1)	
6	Green Biotechnology	3 (2+1)	
<b>Elective Courses in Bioinformatics</b>			
1	Programming in Bioinformatics	4 (2+2)	<b>20 (13+7)</b>
2	Bioinformatics Tools and Biological Databases	3 (2+1)	
3	Structural Bioinformatics	3 (2+1)

Note: The credit hours indicated represent the combined total of theory and practical components.

- (1) Farming Based Livelihood Systems
- (2) National Cadet Corps I/ National Service Scheme I
- (3) Communication Skill
- (4) Practices in Plant Tissue Culture/ Practices in Animal Cell Culture
- (5) Laboratory Management and Instrumentation
- (6) *Deeksharambh* (Foundation Course)
- (7) Entrepreneurship Development and Business Management
- (8) Environmental Studies and Disaster Management
- (9) National Cadet Corps II/ National Service Scheme II
- (10) Personality Development
- (11) Basic Techniques of Molecular Biology and Biotechnology
- (12) Bioinformatics and Biocomputation
- (13) Internship for those exiting with UG-Certificate in Biotechnology
- (14) Physical Education, First Aid and Yoga Practice
- (15) Practices in Recombinant DNA Technology
- (16) Agriculture Marketing and Trade
- (17) Agriculture Informatics
- (18) Practices in Molecular Marker Technology
- (19) Internship for those exiting with UG-Diploma in Biotechnology
- (20) Educational Tour

### Summary of Credit Distributions

Categories of Courses		Credit Hours
Core Courses (Major and Minor)	:	92
Common Courses (MDC+VAC+AEC)	:	23
Skill Enhancement Courses (SEC)	:	12
Elective Courses	:	20
Student READY	:	20
MOOCs/Online Courses (Non-gradual)	:	10**
<b>Grand Total</b>	<b>:</b>	<b>167+10**</b>

## DETAILED SYLLABI

### Semester I

#### *Deeksharambh* (Foundation Course)

2 (0+2)

#### Objective

- Aims at creating a platform for students to help for cultural Integration of students from different backgrounds, know about the operational framework of academic process in university, instill life and social skills, social awareness, ethics and values, team work, leadership, creativity, etc. and identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

The details of activities will be decided by the parent universities. The structure shall include, but not restricted to:

- i. Discussions on operational framework of academic process in University, as well as interactions with academic and research managers of the University.
- ii. Interaction with alumni, business leaders, perspective employers, outstanding achievers in related fields, and people with inspiring life experiences.
- iii. Group activities to identify the strength and weakness of students (with expert advice for their improvement) as well as to create a platform for students to learn from each other's life experiences.
- iv. Activities to enhance cultural Integration of students from different backgrounds.
- v. Field visits to related fields/ establishments.
- vi. Sessions on personality development (instilling life and social skills, social awareness, ethics and values, team work, leadership, etc.) and communication skills.

### **Molecular Biology**

**3 (3+0)**

#### **Objectives**

1. To study the principles and techniques of molecular biology
2. To study the central dogma of life
3. To study the tools in molecular biology

#### **Theory**

History of molecular biology. Central dogma of life. Structure of DNA and RNA. Gene structure and function. DNA replication and transcription. Genetic code and translation. Structure of prokaryotic and eukaryotic nuclear and organelle genomes. Gene regulation in prokaryotes. Lac operon concept and tryp operon concept.

Introduction to microbial genetics; conjugation, transformation and transduction. Tools in molecular biology. Role of enzymes in molecular biology. Principles of Polymerase Chain Reaction and electrophoresis.

#### **Suggested Reading**

1. Cooper GM and Hausman RE, 2018, The Cell: A Molecular Approach. Sinauer Associates Inc, 8<sup>th</sup> edn.
2. Lewin B, 2017, Gene XII, Oxford University Press.
3. Nelson DL and Cox MM, 2017, Lehninger Principles of Biochemistry. 7<sup>th</sup> edn. W. H. Freeman.
4. Satyanarayana U and Chakrapani U, 2021, Essentials of Biochemistry, Elsevier.

### **Introductory Cell Biology**

**3 (3+0)**

#### **Objectives**

##### **Students will understand-**

1. the structures and purposes of basic components of prokaryotic and eukaryotic cells, especially macromolecules, membranes, and organelles

2. how these cellular components are used to generate and utilize energy in cells
3. the cellular components underlying mitotic cell division
4. apply their knowledge of cell biology to selected examples of changes or losses in cell function. These can include responses to environmental or physiological changes, or alterations of cell function brought about by mutation.

### Theory

Origin and evolution of cell. Introduction to microscopy. Sub-cellular structure of prokaryotic and eukaryotic cells. Membrane structure and function: plasma membrane, cell wall and extracellular matrix. Structural organization and function of intracellular organelles and organelle biogenesis. Nucleus, mitochondria, endoplasmic reticulum, golgi apparatus, lysosomes, peroxisomes, plastids and vacuoles.

Structure and function of the cytoskeleton and its role in motility. Cell membrane transport. Introduction to cell signalling. Cell growth, cell cycle and its control. Cell death and cell renewal.

### Suggested Reading

1. Verma PS and Agarwal VK, 2016, Cell Biology, Genetics, Molecular Biology, Evolution and Ecology. S Chand and Sons.
2. Cooper GM and Hausman RE, 2018, The Cell: A Molecular Approach. Sinauer Associates Inc.

### Fundamentals of Genetics

**3 (3+0)**

### Objectives

1. To study the history of genetics
2. To study inheritance and variation
3. To study chromosomes and cell division
4. To study the genetic basis of traits

### Theory

History of Genetics. Mendel's principles and rediscovery. Cell division. Chromosome structure and function. Chromosome theory of inheritance. Sex-linked, sex-limited and sex-influenced inheritance. Sex determination and sex differentiation.

Multiple allelism. Linkage and crossing-over. Gene-gene interaction. Genetic analysis in prokaryotes and eukaryotes. Extra chromosomal inheritance. Mutations. Hardy-Weinberg law. Quantitative inheritance. Introduction to human genetics. Genetic basis of evolution.

### Suggested Reading

1. Brah GS, 2014, Animal Genetics: Concepts and Implications, 2<sup>nd</sup> edn, Kalyani Publishers.
2. Gardener EJ, Simmons MJ and Snustad DP, 1991, Principles of Genetics. John Wiley and Sons, Inc, New York, USA.

**Basic Mathematics****2 (2+0)****Objectives**

1. To study the basic principles and functions in mathematics like limits and continuity
2. To study differentiation and integration
3. To study matrices and determinants

**Theory**

Functions; Limit: Introduction, left-handed and right-handed limits, general rules for the calculation of limits Standard limits. Continuity: Definition of continuity, continuity of algebraic functions. Continuity of trigonometric and exponential functions.

Differentiation: Differentiation by the first principle, sum, difference, product and quotient formulae, differentiation using the chain rule, differentiation of functions in parametric and implicit form, logarithmic differentiation, geometrical interpretation of derivative. Successive differentiation, geometrical interpretation of derivative, maxima and minima, tangent and normal.

Integration: Integration by substitution, integration by partial fractions, integration by parts, integration by trigonometric substitution.

Matrices and Determinants: Definition of matrix, addition, subtraction and multiplication, inverse of matrix. Solution of linear equations; by Cramer's rule and inverse of matrix.

**Suggested Reading**

1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
2. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.

**Basic Botany****2 (2+0)****Objectives**

1. To study the basic taxonomy and classification of plants
2. To study the features of plant kingdom and morphology
3. To study the internal structure of plants

**Theory**

Plant kingdom and features of each group. Morphology, modifications and functions of root, stem, leaf, flower and inflorescence. Pollination and fertilization. Fruit types. Structure of dicot and monocot seed, and seed germination.

Cell structure. DNA, chromosome and genes. Cell and tissue types. Internal structure of root, stem and leaf.

Plant taxonomy, systems of classification. Characteristics and economic importance of Poaceae, Brassicaceae, Fabaceae, Malvaceae, Rutaceae, Rosaceae, Asteraceae and Solanaceae families.

**Suggested Reading**

1. Bendre AM and Kumar A, 1999, Textbook of Practical Botany. Vol. 2, 7<sup>th</sup> edn, Rastogi Publications.

2. Bendre AM and Pande PC, 2009, Introduction to Botany, Rastogi publications.
3. Bhatia K.N. and Tyagi M.P. 2020 Elementary Biology. A truemen publication
4. David M Hillis; H Craig Heller; Sally D Hacker; David W Hall; David E Sadava. 2020. Life: the science of biology 12<sup>th</sup> edn, Sunderland publication. eBook
5. Dutta AC, 1995, A Class Book of Botany, 16<sup>th</sup> edn, Oxford University Press.
6. NCERT 2021. Biology of Class XI. NCERT, India.
7. Pande PC and Jain DK, 2022, A textbook of Botany Angiosperm. S. Chand publications.

### Basic Zoology

2 (2+0)

#### Objectives

1. To study cells and biomolecules
2. To study animal kingdom and nomenclature
3. To study the organization of mammalian systems

#### Theory

Introduction to Zoology. Structure and functions of cell and cell organelles. Difference between prokaryotic and eukaryotic cell. Structure and function of biomolecules. Types of simple and compound tissues.

Binomial nomenclature. Classification and general survey of the animal kingdom. Functional organization of various systems of a mammal; digestive, circulatory, respiratory, excretory, nervous and reproductive. Laws of inheritance. Multipleallelism - blood groups. Genetic disorders in human and their inheritance.

#### Suggested Reading

1. Bhatia KN and Tyagi MP, 2020, Elementary Biology, A Truemen Publication.
2. Chopra G and Dhama PS, 2021, A Text Book of Biology, Pradeep Publications.
3. David MH, Craig HH, Sally DH, David WH and David ES, 2020, Life: the science of biology, 12<sup>th</sup> Ed, Sunderland Publication.
4. NCERT, 2022, Biology of Class XI, 2022-23. NCERT, India.

### Farming Based Livelihood Systems

3 (2+1)

#### Objectives

1. To make the students aware about farming based livelihood systems in agriculture
2. To disseminate the knowledge and skill how farming based systems can be a source of livelihood

#### Theory

Status of agriculture in India and different states. Income of farmers and rural people in India. Livelihood-definition, concept and livelihood pattern in urban and rural areas. Different indicators to study livelihood systems. Agricultural livelihood systems (ALS); meaning, approach, approaches and framework. Definition of farming systems and farming based livelihood systems prevalent farming systems in India contributing to livelihood. Types of traditional and modern farming

systems. Components of farming system/ farming-based livelihood systems- crops and cropping systems, livestock, (dairy, piggery, goatry, poultry, duckry etc.). Horticultural crops, agroforestry systems, aquaculture, duck/poultry cum fish, dairy cum fish, piggery cum fish etc. Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers. Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones. Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country. Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems. Schemes and program by central and state government, public and private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21<sup>st</sup> century in view of circular economy, green economy, climate change, digitalization and changing life style.

### Practical

Survey of farming systems and agriculture-based livelihood enterprises. Study of components of important farming-based livelihood models/ systems in different agro-climatic zones. Study of production and profitability of crop based, livestock based, processing based and integrated farming-based livelihood models. Field visit of innovative farming system models. Visit of agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and study of agri-enterprises involved in industry and service sectors (value chain models). Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis. Case study of start-ups in agri-sectors.

9. Singh JP, Ravisankar N, Prusty AK, Sikka AK and Gangwar B, 2016, Region Specific Synthesized Integrated Farming System Models for Improved Production, Profitability and Nutrition (Series 1). IIFSR Bulletin No. 2016-1, AICRP on Integrated Farming Systems, ICAR-Indian Institute of Farming Systems Research, Modipuram, Meerut, pp. 1-88.
10. Walia SS and Walia US, 2020, Farming System and Sustainable Agriculture, Scientific Publishers, Jodhpur, Rajasthan.

### **National Cadet Corps**

**I(0+1)**

#### **Objectives**

1. To develop qualities of character, courage, comradeship, discipline, leadership, secular outlook, spirit of adventure and sportsmanship and the ideals of selfless service among the youth to make them useful citizen
2. To create a human resource of organized trained and motivated youth to provide leadership in all walks of life including the Armed Forces and be always available for the service of the nation

#### **Practical**

Aims, objectives, organization of National Cadet Corps (NCC) and NCC song. DG's cardinals of discipline. Drill- aim, general words of command, attention, stands at ease, stand easy and turning. Sizing, numbering, forming in three ranks, open and close order march, and dressing. Saluting at the halt, getting on parade, dismissing, and falling out. Marching, length of pace, and time of marching in quick/slow time and halt. Side pace, pace forward and to the rear. Turning on the march and wheeling. Saluting on the march. Marking time, forward march, and halt. Changing step, formation of squad and squad drill. Command and control, organization, badges of rank, honours, and awards.

Nation Building- cultural heritage, religions, traditions, and customs of India. National integration. Values and ethics, perception, communication, motivation, decision making, discipline and duties of good citizens. Leadership traits, types of leadership. Character/personality development. Civil defense organization, types of emergencies, firefighting, protection. Maintenance of essential services, disaster management, aid during development projects. Basics of social service, weaker sections of society and their needs, NGO's and their contribution, contribution of youth towards social welfare and family planning. Structure and function of human body, diet and exercise, hygiene and sanitation. Preventable diseases including AIDS, safe blood donation, first aid, physical and mental health. Adventure activities. Basic principles of ecology, environmental conservation, pollution and its control.

### **National Service Scheme-I**

**1 (0+1)**

#### **Objective**

- Evoking social consciousness among students through various activities viz., working together, constructive, and creative social work, to be skillful in executing democratic leadership, developing skill in program, to be able to seek self-employment, reducing gap between educated and uneducated, increasing awareness and desire to help sections of society

**Practical**

Orientation: history, objectives, principles, symbol, badge; regular programs under National Service Scheme (NSS). Organizational structure of NSS, Code of conduct for NSS volunteers, points to be considered by NSS volunteers' awareness about health. NSS program activities. Concept of regular activities, special camping, day camps, basis of adoption of village/slums, conducting survey, analyzing guiding financial patterns of scheme, youth program/ schemes of GoI, coordination with different agencies and maintenance of diary. Understanding youth. Definition, profile, categories, issues and challenges of youth; and opportunities for youth who is agent of the social change. Community mobilization. Mapping of community stakeholders, designing the message as per problems and their culture; identifying methods of mobilization involving youth-adult partnership. Social harmony and national integration. Indian history and culture, role of youth in nation building, conflict resolution and peace- building. Volunteerism and *shramdaan*. Indian tradition of volunteerism, its need, importance, motivation, and constraints; shaman as part of volunteerism. Citizenship, constitution, and human rights. Basic features of constitution of India, fundamental rights and duties, human rights, consumer awareness and rights and rights to information. Family and society. Concept of family, community (PRIs and other community-based organizations) and society.

**Communication Skills****2 (1+1)****Objective**

To acquire competence in oral, written and non-verbal communication, develop strong personal and professional communication and demonstrate positive group communication

**Theory**

Communication process: the magic of effective communication. Building self-esteem and overcoming fears. Concept, nature and significance of communication process. Meaning, types and models of communication. Verbal and non-verbal communication. Linguistic and non-linguistic barriers to communication and reasons behind communication gap/ miscommunication.

Basic communication skills. Listening, speaking, reading and writing skills. Precise writing/ abstracting/summarizing. Style of technical communication. Curriculum vitae/resume writing. Innovative methods to enhance vocabulary, analogy questions.

Structural and functional grammar. Sentence structure, modifiers, connecting words and verbal. Phrases and clauses. Case: subjective case, possessive case, objective case. Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles. Agreement of verb with the subject: tense, mood, voice. Writing effective sentences. Basic sentence faults.

**Practical**

Listening and note taking. Writing skills; precise writing, summarizing and abstracting. Reading and comprehension (written and oral) of general and technical articles. Micro-presentations and impromptu presentations. Feedback on presentations. Stage manners; grooming, body language, voice modulation, speed. Group discussions. Public speaking exercises; vocabulary building exercises. Interview techniques. Organization of events.

**Suggested Reading**

1. Allport, GW, 1937, Personality: A Psychological Interpretation. Holt, New York.
2. Brown M and Gyles B, 1994, How to Interview and be Interviewed, Sheldon Press, London.
3. Carnegie D, 1997, The Quick and Easy Way to Effective Speaking, Pocket Books, New York.
4. Francis Peter SJ, 2012, Soft Skills and Professional Communication, Tata McGraw Hill, New Delhi.
5. Kumar S and Pushpa Lata, 2011, Communication Skills, Oxford University Press.
6. Neuliep JW, 2003, Intercultural Communication A Contextual Approach. Houghton Mifflin Co Boston.
7. Pease, A, 1998, Body Language, Sudha Publications, Delhi.
8. Raman M and Singh P, 2000, Business Communication, Oxford University Press.
9. Seely J, 2013, Oxford Guide to Effective Writing and Speaking, Oxford University Press.
10. Thomson AJ and Martinet AV, 1977, A Practical English Grammar, Oxford University.

**Practices in Plant Tissue Culture****2 (0+2)****Objectives****This course aims at**

1. Imparting hands-on training on the calculation of per cent solutions, molarity, molality, normality; and preparation of buffers
2. Studying basic equipments used in plant molecular biology and cell culture laboratories; washing, packing and sterilization of glass and plastic wares for cell culture
3. Studying preparation of media and reagents for cell culture, primary culture technique, culture and sub-culturing of continuous cell lines, viability assay by trypan blue dye exclusion method, micropropagation, haploid production, embryo rescue, cryopreservation of primary cultures and cell lines
4. Studying preparation of phytohormones and sterilization
5. Studying tissue culture laboratory management

**Practical**

Laboratory safety and aseptic techniques, sterilization methods for equipment and media, media preparation, preparation of solid and liquid media, pH adjustment and sterilization of media. Culture initiation and explant selection. Selection of explants: meristem, node, leaf, embryo etc. Surface sterilization of plant material. Techniques for explant preparation and inoculation on to culture media. Callus induction and subculture. Subculture techniques: transfer of cultures to fresh media, monitoring and maintenance of cultures, organogenesis and embryogenesis. Micropropagation. Genetic transformation. Cryopreservation and conservation. Project Work: students design and conduct a small-scale tissue culture project. They will choose a plant species, select appropriate explants, culture them in vitro, and document the progress and results.

**Suggested Reading**

1. Bhojwani SS and Razdan MK, 1996, Plant Tissue Culture: Theory and Practice, Elsevier.

2. Reinert J and Bajaj YPS (Ed), 1989, Applied and Fundamental Aspects of Plant Cell, Tissue, and Organ Culture, Springer-Verlag.

### Practices in Animal Cell Culture

2 (0+2)

#### Objectives

To learn-

1. Washing of glasswares, packing and sterilization of glass and plasticware for cell culture
2. Preparation of media and reagents for cell culture.
3. Primary culture technique. Culture and sub-culturing of continuous cell lines. Viability assay by trypan blue dye exclusion method. Cryopreservation of primary cultures and cell lines.
4. Tissue culture laboratory management.

#### Practical

Laboratory safety and aseptic techniques. Cell culture media and supplements. Composition of cell culture media: DMEM, RPMI, MEM, etc. Serum and serum-free media formulations. Preparation and sterilization of media supplements. Cell culture initiation and maintenance. Cell line authentication and characterization, Thawing and subculturing of cells. Monitoring cell growth and viability. Cell passaging and cryopreservation. Cell line development and authentication. Methods for establishing new cell lines. Authentication techniques: STR profiling, isoenzyme analysis, quality control measures in cell culture. Cell-based assays. Principles of cell-based assays: viability, proliferation, apoptosis, techniques for measuring cell responses: MTT assay, flow cytometry, ELISA. Application of cell-based assays in drug screening and toxicity testing. Transfection (lipofection, electroporation) and gene expression, 3D-cell culture and tissue engineering, cell culture project. Students design and conduct a small-scale cell culture project. They will choose a specific cell line or assay, culture cells accordingly, perform experiments, analyze data, and present their findings.

#### Suggested Reading

1. Al-Rubeai M (Ed), 2015, Animal cell culture. Springer International Publishing, ISBN: 978-3-319-10319-8, 978-3-319-10320-4.
2. Bhatia S, Naved T and Sardana S, 2019, Introduction to animal tissue culture science, IOP Publishing Ltd.
3. Butler M, 2004, Animal cell culture and technology, Taylor and Francis, ISBN: 9781859960493, 1859960499.

5. Michael B, 2003, Animal Cell Culture and Technology, THE BASICS (Garland Science).

### Laboratory Management and Instrumentation

2 (0+2)

Objectives

1. To study the establishment and management of different molecular biology laboratories
2. To impart hands-on training on good laboratory practices, calculation of per cent solutions, molarity, molality, normality; and preparation of buffers

3. To study basic equipments used in animal molecular biology and cell culture laboratories, record keeping, teamwork, and SOP of different instruments of the labs
4. Safe disposal of laboratory chemicals and reagents as per the biosafety guidelines.

### Practical

Importance of laboratory safety and regulatory compliance. Quality management systems: ISO 9001, GLP, GMP, laboratory safety and regulatory compliance. Risk assessment and hazard identification. Inventory management and equipment maintenance. Principles of laboratory inventory management. Equipment calibration and preventive maintenance. Documentation and record-keeping for regulatory compliance. Quality assurance and control. Introduction to quality assurance (QA) and quality control (QC). Quality control checks for laboratory reagents and instruments, Troubleshooting common laboratory errors and deviations. Spectroscopy and spectrophotometry, applications in quantitative analysis and molecular biology. Chromatography techniques, microscopy and imaging. Molecular biology techniques. Instrumentation project: students design and conduct a small-scale project using one of the laboratory instruments covered in the course. They will collect data, analyze results, and present their findings.

4. Kreuzer H and Massey A, 2008, Molecular biology and biotechnology: a guide for students 3<sup>rd</sup> edn, ASM Press.
5. Rapley R and Whitehouse D, (Eds), 2015, Molecular biology and biotechnology, Royal Society of Chemistry.

## Semester II

### Introduction to Biotechnology

3 (3+0)

#### Objectives

1. To understand the basic concepts of molecular biology and methods used in the manipulation of nucleic acids to isolate and characterize genes
2. To understand how molecular tools are used to modify an organism. To study the history, concepts and scope of biotechnology
3. To study the applications of biotechnology

#### Theory

Introduction to genetic material, history of genetic material, physical and chemical basis of genetic material. Structure of DNA and RNA, scope and importance of Biotechnology. Plant, microbial, animal, medical, environmental, industrial. Marine, agricultural and food biotechnology. Nanobiotechnology.

Introduction to recombinant DNA technology. Vectors, DNA manipulating and modifying enzymes, gene cloning. Introduction to genomics and proteomics. Molecular markers, DNA sequencing. Genetic transformation and transgenic organisms. Bioinformatics. Biosafety guidelines.

### Suggested Readings

1. Chawla HS, 2024, Introduction to Plant Biotechnology, 4<sup>th</sup> edn, CBS Publishers and Distributors Pvt. Ltd.
2. Singh B, Gautam SK, Chauhan MS and Singla SK, 2015, Textbook of Animal Biotechnology, The Energy and Resources Institute, TERI.
3. Singh BD, 2020, Biotechnology Expanding Horizons, Kalyani publishers.
4. Thieman W and Palladino M, 2018, Introduction to Biotechnology (What's New in Biology), 4<sup>th</sup> edn, Pearson ISBN 0134650190, 9780134650197

### Introduction to Plant Breeding

3 (2+1)

#### Objectives

To study the-

1. development and goals of plant breeding
2. modes of reproduction
3. methods of plant breeding

#### Theory

History, aims and objectives of plant breeding. Role of related sciences in plant breeding. Modes of reproduction - sexual, asexual, apomixes and significance in plant breeding. Modes of pollination, genetic consequences, differences between self- and cross-pollinated crops. Germplasm resources and their utilization.

Methods of breeding: introduction and acclimatization. Selection: mass selection, Johannesen's pureline theory, genetic basis, pure-line selection. Hybridization: aims and objectives, types of hybridization. Methods of handling segregating generations. Pedigree method, bulk method, back cross method. Heterosis, inbreeding depression, various theories of heterosis, exploitation of hybrid vigour. Hardy Weinberg law, selection in cross-pollinated crops. Population improvement program. Synthetics and composites. Methods of breeding vegetatively propagated crops.

Incompatibility and male sterility and their utilization in crop improvement. Mutation breeding. Ploidy breeding. Wide hybridization and its significance in crop improvement. Procedure for release of new varieties.

#### Practical

Classification of plants. Botanical description and floral biology of field crops: rice, sorghum, maize, wheat, bajra, sugarcane, brassicas, groundnut, sunflower, sesamum, red gram, bengal gram, green gram, soybean, black gram, cotton. Study of megasporogenesis and microsporogenesis. Fertilization and life cycle of an angiosperm plant. Hybridization techniques and precautions to be taken. Selfing, emasculation and crossing techniques. Study of male sterility and incompatibility.

**Suggested Reading**

1. Allard RW. 1960. Principles of Plant Breeding, John Wiley and Sons.
2. Chahal GS and Gosal SS, 2002, Principles and Procedures of Plant Breeding: Biotechnological and Conventional Approaches, Narosa Publishers.
3. Singh P, 2014, Essentials of Plant Breeding, Kalyani Publishers.
4. Singh BD, 2009, Plant Breeding: Principles and Methods, Kalyani Publishers.

**Elementary Microbiology****2 (1+1)****Objectives**

To study the-

1. History of microbiology and major groups of eukaryotes and prokaryotes
2. Preservation methods and repositories
3. Bacterial growth and metabolism
4. Applications of microbes

**Theory**

History of microbiology and its applied areas. Microorganisms and their role in health and environment. Control and prevention measures against microorganisms/diseases. Introduction to eukaryotic and prokaryotic cells. Major groups of eukaryotes; fungi, algae and protozoa. Major groups of prokaryotes; bacteria, archaebacteria, rickettsia and chlamydia. Preservation of microorganisms, microbial repositories at national and international level.

Bacterial growth. Metabolism in bacteria, ATP generation, chemoautotrophy, photoautotrophy, respiration, fermentation. Viruses and Bacteriophages, structure and properties, lytic and lysogenic cycles, viroids, prions.

Beneficial microorganisms in agriculture, biofertilizers, microbial pesticides. Microbes in composting and biodegradation. Microbiology of water and food.

**Practical**

Microscope and other instruments in a microbiological laboratory. Media preparation, sterilization and aseptic methods for isolation, identification, preservation and storage. Identification of bacteria by staining methods. Enumeration of bacteria by pour plate and spread plate methods. Micrometry.

**Suggested Reading**

1. Woolverton CJ, Sherwood LM, and Willey JM, 2016, Prescotts Microbiology, McGraw-Hill Education.

**Entrepreneurship Development and Business Management****3 (2+1)****Objectives**

1. To provide student an insight into the concept and scope of entrepreneurship
2. To expose the student to various aspects of establishment and management of a small business unit
3. To enable the student to develop financially viable agribusiness proposal

## Theory

Development of entrepreneurship, motivational factors, social factors, environmental factors, characteristics of entrepreneurs, entrepreneurial attributes/competencies. Concept, need for and importance of entrepreneurial development. Evolution of entrepreneurship, objectives of entrepreneurial activities, types of entrepreneurs, functions of entrepreneurs, importance of entrepreneurial development, and process of entrepreneurship development. Environment scanning and opportunity identification need for scanning-spotting of opportunity-scanning of environment- identification of product / service – starting a project; factors influencing sensing the opportunities. Infrastructure and support systems- good policies, schemes for entrepreneurship development; role of financial institutions, and other agencies in entrepreneurship development. Steps involved in functioning of an enterprise. Selection of the product / services, selection of form of ownership; registration, selection of site, capital sources, acquisition of manufacturing know how, packaging and distribution. Planning of an enterprise, project identification, selection, and formulation of project; project report preparation, Enterprise Management. Production management – product, levels of products, product mix, quality control, cost of production, production controls, Material management. Production management – raw material costing, inventory control. Personal management – manpower planning, labour turn over, wages / salaries. Financial management / accounting – funds, fixed capital and working capital, costing and pricing, long term planning and short-term planning, book keeping, journal, ledger, subsidiary books, annual financial statement, taxation. Marketing management- market, types, marketing assistance, market strategies. Crisis management- raw material, production, leadership, market, finance, natural etc.

## Practical

Visit to small scale industries/agro-industries, Interaction with successful entrepreneurs/ agric-entrepreneurs. Visit to financial institutions and support agencies. Preparation of project proposal for funding by different agencies.

## Suggested Reading

1. Charantimath PM, 2009, Entrepreneurship Development and Small Business Enterprises. Pearson Publications, New Delhi.
2. Desai V, 2015, Entrepreneurship: Development and Management, Himalaya Publishing House.

11. Desai V, 1997, Small Scale Industries and Entrepreneurship. Himalaya Publication House.

**Environmental Studies and Disaster Management****3 (2+1)****Objective**

- To expose and acquire knowledge on the environment and to gain the state-of-the-art - skill and expertise on management of disasters

**Theory**

Introduction to environment; environmental studies. Definition, scope and importance, multidisciplinary nature of environmental studies. Segments of environment, spheres of earth; lithosphere, hydrosphere, atmosphere. Different layers of atmosphere. Natural resources; classification. Forest resources. Water resources. Mineral resources. Food resources. Energy resources. Land resources. Soil resources. Ecosystems. Concept of an ecosystem; structure and function of an ecosystem. Energy flow in the ecosystem. Types of ecosystems. Biodiversity and its conservation: Introduction, definition, types. Biogeographical classification of India. Importance and value of biodiversity. Biodiversity hot spots. Threats and conservation of biodiversity.

Environmental pollution. Definition, cause, effects and control measures of air pollution, water pollution, soil pollution, marine pollution, noise pollution, thermal pollution, light pollution. Solid waste management; classification of solid wastes and management methods, composting, incineration, pyrolysis, biogas production, causes, effects and control measures of urban and industrial wastes. Social issues and the environment. Urban problems related to energy. Water conservation, rain water harvesting, watershed management. Environmental ethics; issues and possible solutions, climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Environment protection act. Air (prevention and control of pollution) act. Water (prevention and control of pollution) act. Wildlife Protection Act. Forest Conservation act. Human population and the environment; environment and human health. Human rights, value education. Women and child welfare. Role of information technology in environment and human health.

Disaster management; disaster definition, types, natural disasters, floods, drought, cyclone, earthquakes, landslides, avalanches, volcanic eruptions, heat and cold waves. Man-made disasters, nuclear disasters, chemical disasters, biological disasters, building fire, coal fire, forest fire, oil fire, road accidents, rail accidents, air accidents, sea accidents. International and national strategy for disaster reduction. Concept of disaster management, national disaster management framework, financial arrangements, role of NGOs, community-based organizations and media in disaster management. Central, state, district and local administration in disaster control. Armed forces in disaster response. Police and other organizations in disaster management.

**Practical**

Visit to a local area to document environmental assets river/forest/grassland/hill/mountain. Energy; biogas production from organic wastes. Visit to wind mill / hydro power / solar power generation units. Biodiversity assessment in farming system. Floral and faunal diversity assessment in polluted and un polluted system. Visit to local polluted site urban/rural/industrial/agricultural to study of common plants, insects and birds. Environmental sampling and preservation. Water quality analysis; pH, EC and TDS. Estimation of Acidity, alkalinity. Estimation of water hardness. Estimation of DO and BOD in water samples. Estimation of COD in water samples. Enumeration of *E. coli* in water sample. Assessment of suspended particulate matter (SPM). Study of simple ecosystem, visit to pond/river/hills. Visit to areas affected by natural disaster.

**Suggested Reading**

1. Barucha E, 2004, Text book for Environmental studies, University Grants Commission, NewDelhi.
2. De AK, 2010, Environmental chemistry, New Age International Publishers, New Delhi. ISBN:13-978 81 224 2617 5. 384 pp

4. Parthiban KT, Vennila S, Prasanthrajan M, Umesh Kanna S, 2023, Forest, Environment, Biodiversity and Sustainable development. Narendra Publishing House, New Delhi.
5. Prasanthrajan M, and Mahendran PP, 2008. A text book on Ecology and Environmental Science, ISBN 81-8321-104-6. Agrotech Publishing Academy, Udaipur.
6. Prasanthrajan M, 2018, Objective environmental studies and disaster management, ISBN 9789387893825, Scientific publishers, Jodhpur.
7. Sharma PD, 2009, Ecology and Environment, Rastogi Publications, Meerut. -----Tyler M and Scot S, 2009, Living in the Environment (Concepts, Connections, and Solutions), Cengage Learning Publication, Belmont, USA.

**National Cadet Corps (NCC- II)****1 (0+1)****Objectives**

1. To develop qualities of character, courage, comradeship, discipline, leadership, secular outlook, spirit of adventure and sportsmanship and the ideals of selfless service among the youth to make them useful citizen
2. To create a human resource of organized trained and motivated youth to provide leadership in all walks of life including the Armed Forces and be always available for the service of the nation

**Practical**

Arms Drill- Attention, stand at ease, stand easy. Getting on parade. Dismissing and falling out. Ground/take up arms, examine arms. Shoulder from the order and vice-versa, present from the order and vice-versa. Saluting at the shoulder at the halt and on the march. Short/long trail from the order and vice- versa. Guard mounting, guard of honour, Platoon/Coy Drill. Characteristics of rifle (.22/.303/SLR), ammunition, fire power, stripping, assembling, care, cleaning, and sight setting. Loading, cocking, and unloading. The lying position and holding. Trigger control and firing a shot. Range Procedure and safety precautions. Aiming and alteration of sight. Theory of groups and snap shooting. Firing at moving targets. Miniature range firing. Characteristics of Carbine and LMG. Introduction to map, scales, and conventional signs. Topographical forms and technical terms. The grid system. Relief, contours, and gradients. Cardinal points and finding north. Types of bearings and use of service protractor. Prismatic compass and its use. Setting a map, finding north and own position. Map to ground and ground to map. Knots and lashings, Camouflage and concealment, Explosives and IEDs. Field defenses obstacles, mines and mine lying. Bridging, waterman ship. Field water supplies, tracks and their construction. Judging distance. Description of ground and indication of landmarks. Recognition and description of target. Observation and concealment. Field signals. Section formations. Fire control orders. Fire and movement. Movement with/without arms. Section battle drill. Types of communication, media, latest trends and developments.

**National Service Scheme (NSS-II)****1 (0+1)****Objectives**

- To evoke social consciousness among students through various activities, viz., working together, constructive, and creative social work, to be skillful in executing democratic leadership, developing skill in program, to be able to seek self-employment, reducing gap between educated and uneducated, increasing awareness and desire to help sections of society.

**Practical**

Importance and role of youth leadership. Meaning, types and traits of leadership, qualities of good leaders; importance and roles of youth leadership, Life competencies. Definition and importance of life competencies, problem-solving and decision-making, interpersonal communication. Youth development programs. Development of youth programs and policy at the national level, state level and voluntary sector; youth-focused and youth-led organizations. Health, hygiene and sanitation. Definition needs and scope of health education; role of food, nutrition, safe drinking water, water borne diseases and sanitation (Swachh Bharat Abhiyan) for health; national health programs and reproductive health. Youth health, lifestyle, HIV AIDS and first aid. Healthy lifestyles, HIV AIDS, drugs and substance abuse, home nursing and first aid. Youth and yoga. History, philosophy, concept, myths, and misconceptions about yoga; yoga traditions and its impacts, yoga as a tool for healthy lifestyle, preventive and curative method.

**Personality Development****2 (1+1)****Objectives**

- To make students realize their potential strengths, cultivate their inter-personal skills and improve employability

**Theory**

Personality Definition, nature of personality, theories of personality and its types. The humanistic approach, Maslow's self-actualization theory, shaping of personality, determinants of personality, Myers-Briggs typology indicator. Locus of control and performance. Type A and Type B behaviours, personality and organizational behaviour.

Foundations of individual behaviour and factors influencing individual behaviour. Models of individual behaviour. Perception and attributes and factors affecting perception. Attribution theory and case studies on perception and attribution. Learning; meaning and definition, theories and principles of learning. Learning and organizational behaviour. Learning and training, learning feedback. Attitude and values. Intelligence; types of intelligence, theories of intelligence, measurements of intelligence, factors influencing intelligence, intelligence and organizational behaviour, emotional intelligence. Motivation; theories and principles. Teamwork and group dynamics.

**Practical**

MBTI personality analysis. Learning styles and strategies. Motivational needs. Firo-B, Interpersonal Communication. Teamwork and team building. Group Dynamics. Win-win game. Conflict Management. Leadership styles. Case studies on Personality and Organizational Behaviour.

**Suggested Reading**

1. Andrews S, 1988, How to Succeed at Interviews, 21st (reprint), Tata McGraw-Hill, New Delhi.
2. Heller R, 2002, Effective Leadership, Essential Manager series, DK Publishing.
3. Hindle T, 2003, Reducing Stress, Essential Manager series, DK Publishing.
4. Lucas S, 2001, Art of Public Speaking, Tata McGraw-Hill, New Delhi.
5. Mile DJ, 2004, Power of Positive Thinking, Rohan Book Company, New Delhi.
6. Pravesh Kumar, 2005, All about Self- Motivation, Goodwill Publishing House, New Delhi.
7. Smith B, 2004, Body Language, Rohan Book Company, New Delhi.
8. Shaffer DR, 2009, Social and Personality Development, 6<sup>th</sup> edn, Wadsworth, Belmont, CA.

**Basic Techniques of Molecular Biology and Biotechnology****2 (0+2)****Objectives**

1. To provide hands-on training on isolation and purification of DNA. Measurement of nucleic acid concentration using spectrophotometer and gel electrophoresis. Designing of PCR primers, DNA amplification using PCR, elution of PCR products, SDS PAGE, staining and de-staining of proteins, Western blot.
2. To study bacteriological media, preparation of media for bacterial culture, preparation of competent cells and transformation, isolation of plasmids from bacteria, and preservation of bacterial clones.
3. To study basic computing. Introduction to UNIX, LINUX. Nucleotide information resource: EMBL, GenBank, DDBJ, unigene, protein information resource: SwissProt, TrEMBL, Uniprot; structure databases: PDB, MMDB. Search engines: Entrez, ARSA, SRS. Similarity searching: BLAST and interpreting results. Multiple sequence alignment: ClustalW; structure visualization of DNA and proteins using Rasmol.

**Practical**

Overview of molecular biology: DNA, RNA, proteins. Laboratory safety and basic techniques. Nucleic acid extraction. Principles of DNA and RNA extraction from various sources. Extraction methods: Phenol-chloroform, silica-based columns, quality assessment and quantification of nucleic acids. Polymerase Chain Reaction (PCR), Optimization of PCR conditions and troubleshooting, gel electrophoresis, analysis of PCR products, restriction digests, and DNA/RNA samples. Molecular cloning, DNA sequencing. Principles of DNA sequencing: Sanger sequencing, DNA sequencing reaction setup and analysis, interpretation of sequencing data and sequence alignment. Protein analysis techniques. Gene expression analysis. Practical project: students design and conduct a small-scale molecular biology project. They will choose a specific technique or experiment, perform the necessary procedures, analyze data, and present their findings.

**Suggested Reading**

1. Green MR and Sambrook J, 2012, Molecular cloning: A Laboratory Manual, 4<sup>th</sup> edn, Cold Spring Harbor.
2. Kreuzer H and Massey A, 2008, Molecular biology and biotechnology: a guide for students, 3<sup>rd</sup> edn, ASM Press.

- Rapley R and Whitehouse D, (Eds), 2015, Molecular biology and biotechnology, Royal Society of Chemistry.

### **Bioinformatics and Biocomputation**

**2 (0+2)**

#### **Objectives**

- To expose the students to the construction and use of computers, special algorithms, new complexity theories, computing science and related mathematics
- To understand the scientific and economic impact of bioinformatics
- To have a better understanding of organisms, their metabolism and their evolution
- To study their applications in health care and drug design, new (bio)materials and their engineering, food (engineering) and food production

#### **Practical**

Information search and data retrieval, genome analysis and gene mapping, alignment of pairs of sequences, alignment of multiple sequences and phylogenetic analysis, tools for similarity search and sequence alignment, profiles and hidden Markov models, gene identification and prediction, gene expression analyses, protein classification and structure analysis and visualization, protein structure prediction, computational methods for pathway and systems biology, technologies and strategies for drug discovery, biomarkers in drug development, computer-aided drug design.

#### **Suggested Reading**

- Laplante PA (Ed), 2004, Biocomputing, ova Biomedical.

## **Semester III**

### **Livestock Production and Management**

**3 (2+1)**

#### **Objectives**

To study the-

- history of livestock in India, animal husbandry and breeds of livestock
- management of livestock in terms of the housing system, health, and diseases
- economic importance of livestock

#### **Theory**

Livestock history in India: Vedic, medieval and modern era. Demographic distribution of livestock and role in economy. Introductory animal husbandry. Breeds of livestock, cattle, buffalo, sheep, goat and pig. Important traits of livestock. General management and feeding practices of animals. Handling and restraining of animals. Housing systems. Importance of grasslands and fodders in livestock production. Common farm management practices including disinfection, isolation, quarantine and disposal of carcass. Common vices of animals and their prevention. Diseases and parasite control and hygiene care.

History and economic importance of poultry. Poultry breeds. Reproductive system of male and female birds. Formation and structure of eggs. Important economic traits of poultry. Egg production, egg weight, egg quality. Fertility and hatchability, plumage characteristics and comb types. Care and management of chicks, grower and layers/broiler. Brooding management. Hatchery practices. Poultry Diseases, control and hygiene care.

### Practical

Visit to livestock farms/demonstration centres. Breeds of cattle, buffalo, sheep, goat and pigs. Familiarization with body parts of animals. Handling and restraining of cattle, buffalo, sheep, goat and swine. Male and female reproductive system and artificial Insemination. Feeding of livestock. Methods of identification: marking, tattooing, branding, tagging. Milking methods. Record Keeping. Visit to the poultry farm, poultry breeds, body parts of chicken, duck, quail and turkey. Housing, equipment, nesting and brooding requirements. Male and female reproductive system. Methods of identification and sexing. Hatchery layout and equipment. Identification of diseases and control of parasites. Vaccination and maintenance of farm records.

### Suggested Reading

1. Banerjee GC, 2020, A Textbook of Animal Husbandry, Oxford and IBH Publication.
2. Sastry NSR and Thomas CK, 2020, Dairy Bovine Production, Kalyani Publishers.
3. Thomas CK and Sastry NSR, 2020, Livestock Production Management, Kalyani Publishers.

### Recombinant DNA Technology

2 (2+0)

#### Objectives

1. The students will be trained on the principles of genetic engineering
2. To study the components like vectors, enzymes, and host cells
3. To study methods used for confirming cloning and expression

#### Theory

Recombinant DNA technology. Restriction endonucleases: types and uses. DNA manipulating enzymes, DNA ligases. Vectors: properties of an ideal vector, structure of vector, cloning vectors and expression vectors; plasmids, cosmids, phagemids, BACs, PACs, YACs, transposon vectors, shuttle vectors, co-integrating vectors. Competent cells. Gene isolation and cloning; Genetic transformation of *E. coli*, gel electrophoresis, preparation of probes, Southern blotting; Northern blotting; Western blotting, PCR and PCR based methods in recombinant DNA technology.

### Suggested Reading

1. Singh BD, 2021, Biotechnology Expanding Horizons, Kalyani Publishers.

### Classical and Molecular Cytogenetics

3 (2+1)

#### Objectives

This course aims at studying the-

1. basics of chromatin

2. chromosome, banding and chromosome variations
3. genome analysis through chromosome variations

### Theory

Introduction and history. Structure of chromatin. Chromosome structure and chromosome landmarks. Specialized chromosomes. Differential staining of the chromosomes - Q-banding, G banding, C banding, R banding. In situ hybridization-FISH, GISH.

Changes in chromosome number: aneuploidy - monosomy, trisomy and tetrasomy, haploidy and polyploidy- autopolyploidy and allopolyploidy. Methods of doubled haploid production. Structural aberrations of chromosomes: deletions, duplications, inversions and translocations. Locating genes on chromosomes. Genome analysis.

### Practical

Lymphocyte culture from blood for karyotyping. Fibroblast cultures from eggs for karyotyping. Preparation of metaphase chromosome spread. Staining techniques of chromosome spreads. Karyotyping and ideogram preparation, chromosome banding techniques: Q-banding, G banding, C banding, R banding

5. Popescu P, Hayes H and Dutrillaux B, 2000, Techniques in Aanimal Ccytogenetics, Springer Science and Business Media.

### Plant Physiology

3 (2+1)

#### Objectives

1. This course aims at introducing concepts of plant physiology and their importance in agriculture
2. To study the plant growth and metabolism
3. To study plant's response to stresses

#### Theory

Plant physiology, its scope in agriculture. Osmosis, imbibition, water absorption, water translocation and transpiration. Stomatal mechanisms. Physiological role and deficiency symptoms of major and minor elements. Absorption and translocation of minerals.

Concepts of photosynthesis, photorespiration, respiration and translocation of photoassimilates. Dynamics of growth. Stress physiology. Nitrogen and sulphur metabolism. Plant growth regulators.

Their biosynthesis and physiological roles, seed germination and seed dormancy, senescence, vernalization.

### Practical

Demonstration of processes of diffusion, osmosis, imbibition and plasmolysis. Ascent of sap, transpiration. Deficiency symptoms of nutrients in crop plants. Plant growth analysis. Quantitative and qualitative estimation of plant pigments. Experiments on photosynthesis and respiration. Effects of plant growth regulators on plant growth and seed germination. Experiments on seed dormancy. Relative water content and plant water potential. Proline estimation.

### Suggested Reading

1. Bhatia KN and Prashar AN, 1990, Plant Physiology, Trueman Book Company.
2. Salisbury FB and Ross CW, 1992, Plant Physiology, Wordsworth Publishing Company.
3. Srivastava HN, 2000, Plant Physiology, Pradeep Publications.
4. Taiz L and Zeiger E, 2002, Plant Physiology, Sinauer Associates; 3 Edition.

### Anatomy and Physiology of Livestock

3 (2+1)

#### Objectives

1. This course introduces the basic concepts in the anatomy and physiology of livestock
2. To study the structure and function of various tissues and organs
3. To study the physiological aspects of tissues and organs

#### Theory

Definition of terms used in veterinary anatomy, topography, contour, landmarks and functional anatomy of various organs in cow, buffalo, sheep and goat structural and functional classification of muscles.

Structure of animal cells and tissues: study of microscopic structure of organs from digestive, urinary, respiratory, reproductive, nervous, cardiovascular and endocrine systems. Gametogenesis, fertilization, cleavage, gastrulation and the development of fetal membranes in livestock, structure and types of mammalian placenta. Development of the organs of digestive, urogenital, cardiovascular, nervous and endocrine glands.

Introduction to blood physiology. Genetic and endocrine control of the reproductive system; maternal recognition of pregnancy. Introduction to physiology of mammary glands: structure and development, hormonal control of mammary growth, lactogenesis and lactation cycle.

### Practical

Hands-on training on the structure and function of the major body systems in livestock, including mammals such as cattle, sheep, goats, and pigs. Practical applications in livestock management and health.

### Suggested Reading

1. Dyce KM, Sack MO and Wensing CJS, 2016, Textbook of Veterinary Anatomy, 5<sup>th</sup> edn, W. B. Saunders Co.

2. Ghosh RK, 2013, Essentials of Veterinary Histology and Embryology, 3<sup>rd</sup> edn, Current Book International.
3. Ghosh RK, 2020, Primary Veterinary Anatomy (Systemic and Regional), 8<sup>th</sup> edn, Current Book International.
4. Hafez B and Hafez ESE (Eds), 2013, Reproduction in Farm Animals, 7<sup>th</sup> edn.
5. McGeady TA, 2017, Veterinary Embryology, 2<sup>nd</sup> edn, Wiley Blackwell, Singapore.
6. Reece WO, (Ed), Dukes' Physiology of Domestic Animals Ninth Edition.

### Fundamentals of Crop Protection

3 (2+1)

#### Objectives

1. To study insects, their classification, structure and incidences
2. To study pathogens, their classification, pathogenesis and disease development
3. To study the best practices of insect and disease management

#### Theory

Insects – their general body structure. Importance of insects in agriculture. Life cycle of insects. Insects diversity. Feeding stages of insects and kinds (modifications) of mouthparts. Concepts in population build-up of insects – GEP, DB, EIL, ETH and pest status.

Causes of insect-pests outbreak. General symptoms of insect attack. Principles and methods of insect-pests management. Integrated Pest Management concept.

Importance and scope of plant pathology. Concept of disease in plants. Nature and classification of plant diseases. Importance and general characters of fungi, bacteria, fastidious bacteria, nematodes, phytoplasmas, spiroplasmas, viruses, viroids, algae, protozoa and phanerogamic parasites.

Pathogenesis due to obligate and facultative parasites. Variability in plant pathogens. Conditions necessary for the development of disease epidemics. Survival and dispersal of plant pathogens. Management of key diseases and nematodes of major crops.

#### Practical

Familiarization with generalized insect's body structure and appendages. Life stages. Acquaintance with insect diversity. Identification of important insect pests of cereals, cotton, oilseeds, pulses, sugarcane, fruit and vegetables crops and stored-grains, and their symptoms of damage. Acquaintance with useful insects: predators, parasitoids, pollinators, honey bees and silkworms. Acquaintance with various pesticidal formulations. Principles and working of common plant protection appliances. Calculation for preparing spray material.

Acquaintance with plant pathology laboratory equipment. Preparation of culture media for fungi and bacteria. Demonstration of Koch's postulates. Study of different groups of fungicides and antibiotics and methods of their evaluation. Diagnosis and identification of important diseases of cereals, cotton, oilseeds, pulses, sugarcane, fruit and vegetable crops and their characteristic symptoms.

**Livestock Product Technology****3 (2+1)****Objectives**

1. To study the composition and value of milk
2. To study milk processing and milk standards
3. To study properties and values of the meet

**Theory**

Composition and nutritive value of milk and factors affecting composition of milk; current status of dairy industry in India. Physiochemical properties of milk. Milk Processing: milk collection, chilling, transportation, standardization, homogenization, pasteurization and packaging. Toxins and pesticide residues in milk and milk products. Organic milk food products. Bureau of Indian standards for milk and milk products; FSSAI standards for milk and milk products. Sanitation in milk plant.

Retrospect and prospects of the meat industry in India. Structure and composition of muscle (including poultry). Conversion of muscle into meat; nutritive value of meat. Meat adulteration, preservation of meat, physicochemical and microbiological quality of meat and meat products. Laws governing national, and international trade in meat and meat products, organic meat food products, and food products of genetically modified animals.

**Practical**

Sampling of milk, estimation of fat, solids-not-fat (SNF) and total solids. Determination of specific gravity of milk. Platform tests, cream separation. Microbiological quality of milk, meat and meat products. Visit modern milk and meat processing units.

**Suggested Reading**

1. Sharma BD, 1999, Meat and Meat Products Technology: Including Poultry Products Technology, Jaypee Bros Medical Publishers.
2. Sukumar D, 2001, Outlines of Dairy Technology, Oxford University Press.

**Biomathematics****2 (2+0)****Objectives**

1. This study the basic theories of mathematics
2. To study factor reduction and eigenvalues
3. To study the applications of biomathematics

**Theory**

Rolle's theorem, Lagrange's theorem, Taylor's and Maclaurin's series. Partial differentiation, Euler's theorem on homogeneous function, change of variable. Jacobian, maxima and minima of two or more than two variables eigen values and eigen vectors of a matrix. Reduction formulae, definite integrals and its applications.

Solution of ordinary differential equation of first degree and first order and their application for determination of the volume of blood and drug distribution. Epidemic models, simultaneous differential equation of first order and their applications to predator models. Linear differential equations of higher order and their applications to the simple biological problem. Numerical methods for solving algebraic and transcendental equations.

**Suggested Reading**

1. Grewal BS, 2013, Higher Engineering Mathematics, Khanna Publishers.
2. Rastogi SK, 2008, Biomathematics, Krishna Prakashan Media Pvt. Ltd.
3. Srivastava AC and Srivastava PK, 2011, Engineering Mathematics, Vol. I, PHI Learning Pvt. Ltd.
4. Srivastava AC and Srivastava PK, 2011, Engineering Mathematics, Vol.III, PHI Learning Pvt. Ltd.

**Physical Education, First Aid and Yoga Practices****2 (0+2)****Objectives**

1. To make the students aware about Physical Education, First Aid and Yoga Practices
2. To disseminate the knowledge and skill how to perform physical training, perform first aid and increase stamina and general wellbeing through yoga.

**Practical**

Physical education. Training and Coaching, meaning and concept. Methods of training; aerobic and aerobic exercises. Calisthenics, weight training, circuit training, interval training, Fartlek training. Effects of exercise on muscular, respiratory, circulatory and digestive systems. Balanced diet and nutrition; effects of diet on performance. Physiological changes due to ageing and role of regular exercise on ageing process. Personality, its dimensions and types. Role of sports in personality development. Motivation and achievements in sports. Learning and theories of learning. Adolescent problems and its management. Posture, postural deformities. Exercises for good posture.

Yoga; history of yoga, types of yoga, introduction to yoga. Asanas, definition and importance, Padmasana, Gaumukhasana, Bhadrasana, Vajrasana, Shashankasana, Pashchimotana, Ushtrasana, Tadasana, Padhastana, Ardhchandrasana, Bhujangasana, Utanpadasana, Sarvangasana, Parvatasana, Patangasana, Shishupalanasana – left leg-right leg, Pavanmuktasana, Halasana, Sarpasana, Ardhdhanurasana, Sawasana. Suryanamaskar, Pranayama (Definition and Importance), Omkar, Suryabhedana, Chandrabhedana, AnulomVilom, Shitali, Shitkari, Bhastrika, Bhramari. Meditation, definition and importance, Yogic Kriyas (Kapalbhati), Tratak, Jalneti and Tribandh. Mudras, definition and importance, Gyanmudra, Dhyanmudra, Vayumudra, Akashmudra, Pruthvimudra, Shunyamudra, Suryamudra, Varunmudra, Pranmudra, Apanmudra, Vyanmudra, Uddanmudra. Role of yoga in sports. Teaching of asanas, demonstration, practice, correction and practice.

History of sports and ancient games. Governance of sports in India. Important national sporting events. Awards in sports. History, latest rules, measurements of playfield, specifications of equipment, skill, technique, style and coaching of major games (Cricket, Football, Table Tennis, Badminton, Volleyball, Basketball, Kabaddi and Kho-Kho) and Athletics.

Need and requirement of first aid. First aid equipment and upkeep. First aid techniques. First aid related with respiratory system. First aid related with heart, blood and circulation. First aid related with wounds and injuries. First aid related with bones, joints, muscle related injuries. First aid related with nervous system and unconsciousness. First aid related with gastrointestinal tract. First aid related with skin, burns. First aid related with poisoning. First aid related with bites and stings. First aid related with sense organs. Handling and transport of injured traumatized persons. Sports injuries and their treatments.

### Methods in Recombinant DNA Technology

2 (0+2)

#### Objectives

1. Hands on training on good laboratory practices, media and stock preparation
2. To enable skill development by providing hands-on training on methods in recombinant DNA technology

#### Practical

Preparation of growth, media, stock solutions and buffers. Plasmid DNA isolation. Quality and quantity assessment of DNA. Restriction digestion of DNA. Agarose gel electrophoresis. Preparation of competent cells and genetic transformation of *E. coli*. Screening of recombinant DNA clones in *E. coli*. Confirmation of recombinant clones.

#### Suggested Reading

1. Carson S and Robertson D, 2005, Manipulation and Expression of Recombinant DNA, Elsevier.
2. Glick BR and Patten CL, 2002, Molecular biotechnology: principles and applications of recombinant DNA, John Wiley and Sons.
3. Green MR and Sambrook J, 2012, Molecular cloning: A Laboratory Manual, 4<sup>th</sup> edn, Cold Spring Harbor.

**Semester IV****Introductory Bioinformatics****4 (3+1)****Objectives**

1. To train the students on applications of computers on analyzing the biomolecules (DNA, RNA and protein)
2. To study various types of databases
3. To study various operations and algorithms in bioinformatics

**Theory**

Introduction to bioinformatics. Development and scope of bioinformatics. Applications of computers in bioinformatics. Operating systems, hardware, software, internet, www resources, FTP, application of bioinformatics in agriculture.

Primary databases: Nucleotide sequence databases (GenBank, EMBL), protein sequence databases; Secondary databases: SwissProt/TrEMBL, conserved domain database, Pfam; Structure databases: Protein Data Bank (PDB), MMDB, SCOP, CATH; File formats: GenBank, EMBL, FASTA, PDB, Flat file, ASN.1, XML.

Introduction to sequence alignment and its applications. Pairwise and multiple sequence alignment, the concept of local and global alignment; Algorithms. Dot Matrix method, dynamic programming methods (Needleman-Wunsch and Smith-Waterman). Tools of MSA: ClustalW, TCOFFEE. Phylogeny. Introduction to BLAST and FASTA; MSA and phylogeny. Assembly and annotation.

**Practical**

Hands-on training on databases, database construction and management, algorithms and analysis of DNA, RNA and proteins.

**Suggested Reading**

1. Baxevanis AD, Ouellette BFF, 2011, Bioinformatics: A practical guide to the analysis of genes and proteins, John Wiley and Sons.
2. Mount DW, 2001, Bioinformatics: Sequence and Genome Analysis, Cold Spring Harbor.
3. Xiong J, 2012, Essential Bioinformatics, Cambridge University Press.

**Molecular Marker Technology****2(2+0)****Objectives**

1. To study the importance and types of molecular markers
2. To study the mapping populations; development and analysis
3. To study the applications of molecular markers in mapping and breeding

**Theory**

Types of molecular markers - RFLP; PCR-based markers like RAPD, SCAR, SSR, STS, CAPS, AFLP, SNP and their variants. Uses of molecular markers. Application as a genetic tool for genotyping

and gene mapping. Mapping populations:  $F_2$ , DH, RILs, NILs. Bulk segregant analysis, linkage maps, physical maps.

Application of molecular markers. Assessing genetic diversity, variety protection. Introduction to genomic selection, marker-assisted breeding for accelerated introgression of trait/transgene and quantitative traits. Human and animal health. Association with genetic-based diseases. Paternity determinations. Parentage using SNP data. Forensic studies. DNA Fingerprinting.

### Suggested Reading

1. Gupta PK, 2015, Molecular Biology and Genetic Engineering, Rastogi Publication.
2. Manikanda Boopathi N, 2013, Genetic mapping and marker-assisted selection, Springer.
3. Manikanda Boopathi N, 2020, Genetic Mapping and Marker Assisted Selection: Basics, Practice and Benefits, Springer.
4. Schook LB (ed), 2020, Gene-mapping techniques and applications, CRC Press.
5. Verma PS, 2018, Cell Biology Genetics Molecular Biology Evolution and Ecology, Chaukhamba Auriyantaliya Publishers.
6. Watson JD, Levine M, Baker TA, Gann A, Bell SP and Losick, R, 2014, Molecular Biology of the Gene, Pearson.

### Biodiversity and Its Conservation

2 (2+0)

#### Objectives

1. To study the concepts of biodiversity
2. To study the methods of protecting biodiversity
3. To study regulations on biodiversity conservation

#### Theory

Concepts of biodiversity, bioresource and wildlife management, conservation strategies: in situ and ex-situ conservation. Wildlife conservation projects in India. Protection of biodiversity for its suitable utilization. Threats to biodiversity. WCU Red data book; Biodiversity hotspots in India. National bureaus of genetic resources. Biodiversity Mapping. Biogeographical regions.

Sustainable development. Diversification of cropping system. Diversity of indigenous livestock. Threats to biodiversity; WCU Red data book. Vulnerability and extinction of flora and fauna. Endangered species in various ecosystems. Germplasm banks. Environmental impact assessment. Bioremediation and biosafety. Introduction to regulatory agencies and legislation.

### Suggested Reading

2. Gaston KJ and Spicer JI, 2004, Biodiversity An Introduction, Blackwell Publishers.
3. Hopsetti BB. and Venketashwarlaru M, 2001, Trends in Wild Life Conservation and Management, Vol. 2, Daya Publishing House.
4. Singh MP and Singh BS, 2002, Plant Biodiversity and Taxonomy, Daya Publishing House.

*S. Anur*

**Basic Biochemistry****4 (3+1)****Objectives**

1. To study the structure and functions of biomolecules of living organisms
2. To study metabolism and bioenergetics
3. To study secondary metabolites and their applications

**Theory**

Introduction and importance. Biomolecules: carbohydrates, lipids, proteins and nucleic acids – structure, functions and properties. Acids, bases and buffers of living systems. The pK of biomolecules. Vitamins and hormones.

Bioenergetics. Metabolism – basic concept: glycolysis, citric acid cycle, glycogenesis, glycogenolysis, oxidative phosphorylation, fatty acid oxidation; Ketone bodies' metabolism.

Secondary metabolites: alkaloids, phenolics and their applications in food and pharmaceutical industries.

**Practical**

Qualitative tests for carbohydrates, amino acids, proteins and lipids. Extraction and characterization of lipids by TLC. Determination of acid, iodine and saponification values of oil. Extraction, quantitative estimation and separation of sugars by paper chromatography.

**Suggested Reading**

1. Nelson DL and Cox MM, 2017, Lehninger principles of biochemistry, 7<sup>th</sup> edn, W. H. Freeman.
2. Satyanarayana U and Chakrapani U, 2021, Essentials of Biochemistry, Elsevier.

**Human Ethics****1 (1+0)****Objectives**

1. To study the meaning and concepts of human behaviour
2. To study human ethical values
3. To study spirituality and attitude
4. To study the methods of stress management

**Theory**

Universal human aspirations. Happiness and prosperity. Human values and ethics. Concept, definition, significance and sources. Fundamental values. Right conduct, peace, truth, love and non-violence. Ethics: professional, environmental, ICT. Sensitization towards others particularly senior citizens, developmentally challenged and gender.

Spirituality, positive attitude and scientific temper. Teamwork and volunteering. Rights and responsibilities. Road safety. Human relations and family harmony. Modern challenges and value conflict. Sensitization against drug abuse and other social evils. Developing personal code of conduct (SWOT Analysis). Management of anger and stress.

**Suggested Reading**

1. Gaur RR, Sangal R and Bagaria GP, 2011, A Foundation Course in Human Values and Professional Ethics, Excel Books.
2. Mathur SS, 2010, Education for Values, Environment and Human Rights, RSA International.
3. Sharma RA, 2011, Human Values and Education -Axiology, Inculcation and Research, R. Lall Book Depot.
4. Sharma RP and Sharma M, 2011, Value Education and Professional Ethics, Kanishka Publishers.
5. Srivastava S, 2011, Human Values and Professional Ethics, S K Kataria and Sons.
6. Srivastava S, 2011, Environmental Science, S K Kataria and Sons.
7. Tripathi AN, 2009, Human Values, New Age International (P) Ltd Publishers.

**Agricultural Marketing and Trade****3 (2+1)****Objectives**

1. To understand the fundamentals of agricultural marketing and trade
2. To analyze the factors influencing supply and demand in agricultural markets
3. To explore different marketing channels and strategies in agriculture
4. To examine the role of government policies and regulations in agricultural markets

**Theory**

Agricultural Marketing: Concepts and definitions of market, marketing, agricultural marketing, market structure, marketing mix and market segmentation, classification and characteristics of agricultural markets; demand, supply and producer's surplus of agri commodities: nature and determinants of demand and supply of farm products, producer's surplus – meaning and its types, marketable and marketed surplus, factors affecting marketable surplus of agri-commodities; pricing and promotion strategies: pricing considerations and approaches – cost based and competition based pricing; market promotion – advertising, personal selling, sales promotion and publicity – meaning, merits and demerits; marketing process and functions: Marketing process concentration, dispersion and equalization; exchange functions – buying and selling; physical functions – storage, transport and processing; facilitating functions – packaging, branding, grading, quality control and labelling (Agmark); Market functionaries and marketing channels: Types and importance of agencies involved in agricultural marketing; meaning and definition of marketing channel; number of channel levels; marketing channels for different farm products; Integration, efficiency, costs and price spread: Meaning, definition and types of market integration; marketing efficiency; marketing costs, margins and price spread; factors affecting cost of marketing; reasons for higher marketing costs of farm commodities; ways of reducing marketing costs. Role of Government in agricultural marketing: Public sector institutions- CWC, SWC, FCI, CACP and DMI – their objectives and functions; cooperative marketing in India. Risk in marketing: Types of risk in marketing; speculation and hedging; an overview of futures trading. Agricultural prices and policy. Meaning and functions of price; administered prices; need for innovations in agricultural price policy. Trade: concept of international trade and its need, theories of absolute and comparative advantage. Present status and prospects of international trade in agri-commodities; WTO; Agreement on Agriculture (AoA) and

its implications on Indian agriculture; IPR. Role of government in agricultural marketing. Role of APMC and its relevance in the present-day context.

### Practical

Plotting and study of demand and supply curves and calculation of elasticities. Study of relationship between market arrivals and prices of some selected commodities. Computation of marketable and marketed surplus of important commodities; Study of price behaviour over time for some selected commodities. Construction of index numbers; Visit to a local market to study various marketing functions performed by different agencies, identification of marketing channels for selected commodity, collection of data regarding marketing costs, margins and price spread and presentation of report in the class. Visit to market institutions – NAFED, SWC, CWC, cooperative marketing society, etc. to study their organization and functioning. Application of principles of comparative advantage of international trade.

### Suggested Reading

1. Acharya, SS, and Agarwal NL, 2006, Agricultural Marketing in India, Oxford and IBH Publishing Co. Pvt. Ltd, New Delhi.
2. Chinna SS, 2005, Agricultural Economics and Indian Agriculture. Kalyani Pub, N Delhi.

### Agricultural Informatics and Artificial Intelligence

3 (2+1)

#### Objectives

1. To acquaint students with the basics of computer applications in agriculture, multimedia, database management, application of mobile app and decision- making processes, etc.
2. To provide basic knowledge of computer with applications in agriculture
3. To make the students familiar with Agricultural-Informatics, its components and applications in agriculture

#### Theory

Introduction to computers, anatomy of computers, memory concepts, units of memory, operating system. Definition and types, applications of MS-Office for creating, editing and formatting a document, data presentation, tabulation and graph creation, statistical

analysis, mathematical expressions, database, concepts and types, creating database. Uses of DBMS in agriculture, internet and World Wide Web (WWW); concepts and components.

Computer programming. General concepts, introduction to visual basic, Java, Fortran, C/ C++, etc. concepts and standard input/output operations.

e-Agriculture, Concepts, design and development, application of innovative ways to use information and communication technologies (IT) in agriculture, computer models in agriculture. Statistical, weather analysis and crop simulation models, concepts, structure, inputs-outputs files, limitation, advantages and application of models for understanding plant processes, sensitivity, verification, calibration and validation, IT applications for computation of water and nutrient requirement of crops. Computer-controlled devices (automated systems) for agri-input management, smartphone mobile apps in agriculture for farm advice. Market price, postharvest management etc. Geospatial technology; concepts, techniques, components and uses for generating valuable agri-information. Decision support systems; concepts, components and applications in agriculture. Agriculture expert system, soil information systems etc. for supporting farm decisions. Preparation of contingent crop-planning and crop calendars using IT tools, Digital India and schemes to promote digitalization of agriculture in India.

Introduction to artificial intelligence, background and applications, Turing test. Control strategies, Breadth-first search, Depth-first search, Heuristics search techniques: Best-first search, A\* algorithm, IoT and Big Data; Use of AI in agriculture for autonomous crop management, and health, monitoring livestock health, intelligent pesticide application, yield mapping and predictive analysis, automatic weeding and harvesting, sorting of produce, and other food processing applications; Concepts of smart agriculture, use of AI in food and nutrition science etc.

### Practical

Study of computer components, accessories, practice of important DoS Commands, Introduction of different operating systems such as Windows, Unix/ Linux, creating files and folders, File management. Use of MS-WORD and MS Power-point for creating, editing and presenting a scientific document, MS- EXCEL - Creating a spreadsheet. Use of statistical tools. Writing expressions, Creating graphs, Analysis of scientific data, Handling macros. MS-ACCESS, creating database, preparing queries and reports, demonstration of agri- information system, Introduction to World Wide Web (WWW) and its components, Introduction of programming languages such as Visual Basic, Java, Fortran, C, C++, Hands on practice on Crop Simulation Models (CSM), DSSAT/Crop-Info/Crop Syst/ Wofost, Preparation of inputs file for CSM and study of model outputs, computation of water and nutrient requirements of crop using CSM and IT tools, Use of smart phones and other devices in agro-advisory and dissemination of market information, Introduction of Geospatial Technology, Hands on practice on preparation of Decision Support System, Preparation of contingent crop planning, India Digital Ecosystem of Agriculture (IDEA).

### Suggested Reading

### Practices in Molecular Marker Technology

2 (0+2)

#### Objectives

- This course aims at imparting skills through hands-on training in the area of molecular markers and their applications
- To study the development of markers and marker systems, genotyping with various types of markers, mapping, diversity analysis, marker-assisted selection, DNA fingerprinting, diversity and cluster analysis, phylogenetic analysis

#### Practical

Overview of molecular markers: types, applications, significance. Principles of genetic variation and inheritance, DNA Extraction and quantification, PCR-Based molecular markers, RFLP (Restriction Fragment Length Polymorphism) analysis, AFLP (Amplified Fragment Length Polymorphism) analysis, SSR (Simple Sequence Repeat) analysis, SNP (Single Nucleotide Polymorphism) analysis. Principles of SNP detection, PCR-based SNP genotyping assays, SNP array and sequencing-based approaches. DNA sequencing and sequence analysis, interpretation of sequencing data and sequence alignment, Marker-Assisted Selection (MAS), genomic selection and marker discovery. Practical Project: students design and conduct a small-scale molecular marker project. They will choose a specific technique or experiment, perform the necessary procedures, analyze data, and present their findings.

#### Suggested Reading

## Semester V

### Microbial Genetics

4 (3+1)

#### Objectives

- To provide an understanding of using microorganisms for genetic analyses

2. To study genetic variability and recombination among microbes
3. To study plasmids, their types and use in recombinant DNA technology

### Theory

Microorganisms as tools for genetic studies. Genetic variability in microorganisms. Genetic analysis of representative groups of bacteria, fungi and viruses. Random and tetrad spore analysis. Recombination and chromosomal mapping. Complementation - intergenic and intragenic.

Bacterial plasmids. Structure, life cycle, mode of infection and their role in genetic engineering. Transfer of genetic material in bacteria. Conjugation, transformation and transduction. Genetics of bacteriophage: T4, lambda and M13, life cycle, mode of infection. Mutation: types, mutagens, DNA damage and repair. Transposable elements; Lac operon, yeast genetics.

Concept and application of recombinant DNA technology. Use of genetic tools to improve the microbial strains for industry, agriculture and health.

### Practical

Conjugation and transformation in bacteria. Spontaneous and auxotrophic mutation. Chemical and UV mutagenesis in fungi and bacteria. Complementation in fungi. Identification of mutants using replica plating technique. Isolation of genomic DNA from *E. coli*. Isolation and curing of plasmid. Identification of plasmid by electrophoresis / antibiotic plates.

### Suggested Reading

1. Michael RG and Joseph S, 2012, Molecular Cloning: A Laboratory Manual, Cold Spring Harbor Laboratory Press.
2. Reece RJ, 2013, Analysis of Genes and Genomes, Wiley.

### Molecular Genetics

**3 (3+0)**

#### Objectives

1. This course introduces DNA structure and function
2. To study DNA functions like replication and gene expression
3. To provide an understanding of gene regulation in prokaryotes and eukaryotes

#### Theory

Structures, properties and modification of DNA. Molecular mechanisms of DNA replication, repair. Types of mutation. Linkage and recombination. Molecular mechanisms of crossing over. Centromere and telomere sequences, and DNA packaging. Repetitive DNA sequences and transposable elements. Markers and QTL. Synthesis and processing of RNA and proteins. Regulation of gene expression.

Genetic code, properties of genetic code, structure of a gene, promoters and their isolation. Synthesis and processing of RNA.

Regulation of gene expression. Transcription factors – their classification and role in gene expression. Epigenetic control of gene expression. Analysis of gene expression. Small RNAs, RNA interference and its applications.

**Suggested Reading**

8. Tropp BE. 2012. Molecular Biology: Genes to Proteins, 4<sup>th</sup> edn, Jones and Bartlett Learning.

**Nanobiotechnology****4 (3+1)****Objectives**

1. To provide an understanding of the concepts and terminologies related to nanobiotechnology
2. To study nanosystems, their synthesis and application

**Theory**

Introduction to nanotechnology. Concepts and Terminology. Nano-Bio Interface. Biological-based nanosystems, molecular motors, biosensors and other devices.

Self-assembly of molecules for nanotechnology applications. Biomimetics, biotemplating and de novo designed nanostructures and materials. DNA-nanotechnology. Nanomanipulations, material design, synthesis and their applications.

**Practical**

Introduction to nanomaterials and their properties. Nanoscale characterization techniques. Scanning electron microscopy (SEM) and transmission electron microscopy (TEM). Atomic force microscopy (AFM) for nanoscale imaging and manipulation. Spectroscopic techniques (UV-Vis, fluorescence, Raman) for nanoparticle analysis. Nanoparticle synthesis and functionalization, chemical synthesis methods for nanoparticles (top-down and bottom-up approaches), surface functionalization techniques for controlling nanoparticle properties. Biomolecular interactions at the nanoscale, nanotoxicology and safety assessment. Project and presentations.

**Suggested Reading**

1. Gabor L, Hornyak J, Moore J, Tibbals, HF and Joydeep D, 2009, Fundamentals of Nanotechnology, CRC Press.
2. Kumar U, 2008, Nanotechnology: A Fundamental Approach, Agrobios

**Animal Biotechnology****3 (2+1)****Objectives**

1. To study historical developments in animal biotechnology

2. To study the biotechnological tools for improving animal health and products
3. To study the use of molecular markers for animal genome analysis

### Theory

History and development of animal biotechnology. Basic techniques in animal cell culture. Introduction to embryo biotechnology, oocyte collection and maturation. Sperm preparation. in vitro fertilization. Cryopreservation of oocyte, sperm and embryos. Embryo transfer technology.

Breeds of livestock and their characteristics. Marker-assisted breeding of livestock. Introduction to animal genomics: RFLP, RAPD, SSRs, QTL, SNP, STR, mitochondrial DNA polymorphism. Rumen and its environment. Rumen microbes - manipulation of rumen microbes for better utilization of feed. Introduction to nutrigenomics. Milk biome. Manipulation of lactation by biotechnological tools. Application of biotechnology in meat and meat products.

Genome and protein-based diagnostics of important animal diseases: FMD, brucellosis, PPR, mastitis, bluetongue, newcastle disease. Introduction to vaccinology, live attenuated vaccines, killed vaccines, cell culture-based vaccines, recombinant vaccines.

### Practical

Basic cell culture techniques, oocyte aspiration from ovaries, sperm preparation, in vitro fertilization. PCR-based detection of animal pathogens. PCR-RFLP. Immunohistochemical localization of protein marker in tissues/cells – meat species identification by PCR.

### Suggested Reading

1. Singh B, Gautam SK, Chauhan MS and Singla SK, 2015, Textbook of Animal Biotechnology, The Energy and Resources Institute, TERI.
2. Srivastava AK and Singh RK, 2018, Animal Biotechnology, CBS Publishers and Distributors, ISBN 9788120416482, 8120416481.

### Genomics and Proteomics

**3 (3+0)**

#### Objectives

1. To provide an understanding of genomics; structural and functional
2. To study comparative genomics and its applications
3. To study proteomics and related tools

#### Theory

Introduction to genomics. Functional genomics and proteomics. Structural genomics: classical ways of genome analysis. BAC and YAC libraries. Next generation sequencing. Genome analysis and gene annotation. Genome projects: *E. coli*, Arabidopsis, Bovine, Human. Comparative Genomics: orthologous and paralogous sequences. Synteny, gene order, phylogenetic footprinting.

Functional genomics: Differential gene expression techniques: ESTs, cDNA-AFLP, microarray, Differential display, SAGE, RNAseq, Real-time PCR

Introduction to proteomics. Analysis of proteome. Native PAGE, SDS PAGE, 2D PAGE. Edmann Degradation. Chromatographic techniques: HPLC, GC, Mass Spectrometry: MALDI-TOF, LC-MS, SWATH-MS. Post Translational modifications.

**Suggested Reading**

1. Andreas H and Samuel C, 2018, Wilson and Walker's Principles and Techniques of Biochemistry and Molecular Biology, Cambridge University Press.
2. Saraswathy N, Ramalingam P, 2011, Concepts and Techniques in Genomics and Proteomics, Elsevier Science.

**Enzymology and Enzyme Technologies****3 (2+1)****Objectives**

1. To study the basic structure, function and types of enzymes.
2. To study enzyme kinetics, regulation of enzyme activity and applications of enzymes.

**Theory**

Classification and nomenclature of enzymes. General characteristics of enzymes, active site, cofactors, prosthetic groups. Metalloenzymes; Isolation, purification, characterization and assays of enzyme and international units. Criteria for purity.

Enzyme kinetics, effect of pH, temperature, determination of  $K_m$  and  $V_{max}$ . Regulation of enzyme activity. Enzyme inhibition. competitive, non-competitive and uncompetitive. Isoenzymes, schizomers and isoschizomers. Ribozymes. Immobilization of enzymes. Applications of enzymes; biotechnology, industry, environment, agriculture, food and medicine.

**Practical**

Isolation, purification and assay of enzymes. Determination of optimum pH and optimum temperature of enzymes. Thermostability of enzymes. Activators and inhibitors of enzyme catalysis. Immobilization of enzymes. Isoenzymes analysis.

**Suggested Reading**

1. Nelson DL and Cox MM, 2017, Lehninger principles of biochemistry, 7<sup>th</sup> edn, W. H. Freeman.
2. Satyanarayana U and Chakrapani U, 2021, Essentials of Biochemistry, Elsevier.

**Immunology****3 (2+1)****Objectives**

1. To study the meaning and importance of immunology
2. To study the classes of antigens and antibodies
3. To study the immunological techniques and DNA vaccines

**Theory**

History and scope of immunology. Components of the immune system: organs, tissues and cells. Immunoglobulin structure and functions. Molecular organization of immunoglobulins and classes of antibodies. Antibody diversity; antigens, haptens, antigens antibody interactions. Immuno-regulation and tolerance.

Allergies and hypersensitive response. Immunodeficiency. Concept of Vaccines and Vaccinology. Conventional Vaccines. Recombinant subunit vaccines. DNA vaccines and vectored

307

vaccines. Immunological techniques. Immunological application in animal science, monoclonal antibodies and their uses.

### Practical

Preparation of buffers and reagents. Precipitation and agglutination test; HA, HI test; immunoblotting, immune electrophoresis and fluorescent antibody test; enzyme immunoassays including ELISA variants, Western blotting. Raising of antisera in laboratory animals. Collection and preservation of antisera – separation, filtration and aliquoting.

### Suggested Reading

1. Judy O, Jenni P, Sharon S and Patricia J, 2018, Kuby Immunology.

## Semester VI

### Molecular Diagnostics

3 (2+1)

#### Objectives

1. To understand the importance of molecular diagnostics
2. To acquaint with various methods of diagnostic methods
3. To compare the advantages of molecular diagnostic methods with those of conventional methods

#### Theory

Principle and applications of molecular diagnostic tests. Nucleic acid-based diagnostics for detection of pathogenic organisms. Application of restriction endonuclease analysis for identification of pathogens. Polymerase chain reaction (PCR) and its variants. Reverse transcriptase polymerase chain reaction (RT-PCR); isothermal amplification (LAMP); LCR, nucleic acid sequence-based amplification (NASBA); Real-Time PCR; DNA Probes; Southern blotting; Northern blotting. Protein-based assays: SDS-PAGE, Western Blot, Dot-blot, ELISA and lateral flow device.

Advantages of molecular diagnostics over conventional diagnostics, serodiagnostic, DNA array technology, Protein array, tissue array. Biosensors and nanotechnology. Development and validation of diagnostic tests.

#### Practical

Preparations of buffers and reagents. Collection of clinical and environmental samples for molecular detection of pathogens (bacteria/virus). Extraction of nucleic acids (DNA and RNA) from the clinical specimens. Restriction endonuclease digestion and analysis using agarose gel electrophoresis. Polymerase chain reaction for detection of pathogens in blood and animal tissues. RT-PCR for detection of RNA viruses. PCR based detection of meat adulteration in processed and unprocessed meats. PCR based detection of pathogens in milk, eggs and meat. Lateral flow assay, ELISA.

#### Suggested Reading

1. Lela B, 2019, Molecular Diagnostics: Fundamentals, Methods and Clinical Applications, FA Davis Company.
2. Singh BD, 2021, Biotechnology Expanding Horizons, Kalyani Publishers.

**Industrial Biotechnology****3 (3+0)****Objectives**

1. To understand various industrial bioprocesses
2. To acquaint with the production of primary metabolites and secondary metabolites
3. To study the industrial production of bioproducts

**Theory**

Introduction to industrial bioprocess. Fermentation- bacterial, fungal and yeast. Traditional and modern biotechnology- a brief survey of organisms, processes, and products. Basic concepts of upstream and downstream processing in bioprocess.

Production of primary metabolites. Primary metabolites- production of commercially important primary metabolites like organic acids, and alcohols.

Production of secondary metabolites. Secondary metabolites- production processes for various classes of secondary metabolites: antibiotics, vitamins and steroids.

Production of bioproducts. Production of biopesticides, biofertilizers, biopreservatives, biopolymers biodiesel. bheese, beer, and bushroom culture, bioremediation.

**Suggested Reading**

1. Balasubramanian D, Bryce CFA, Dharmalingam K, Green J and Kunthala J, 2004, Concepts in Biotechnology, Universities Press Pvt.Ltd.
2. Dubey RC, 2006, A Textbook of Biotechnology, S. Chand and Sons.
3. Kumar HD, 1998, A Textbook on Biotechnology, 2<sup>nd</sup> edn, Affiliated East West Press Pvt.
4. Ratledge C, and Bjorn K, 2001, Basic Biotechnology, 2<sup>nd</sup> edn, Cambridge University Press.

**Epigenetics and Gene Regulation****2 (2+0)****Objectives**

1. To have an understanding the epigenetics; its manifestation and consequences
2. To study the forms of DNA and histone modifications and their role in gene regulation
3. To study the influence of epigenetics on the small RNAs

**Theory**

DNA methylation and histone modifications. DNA methylases, methyl binding proteins and histone modifiers. Epigenetic changes in response to external stimuli leading to changes in gene regulation. Role of DNA methylation in plant development: mutant case studies.

Introduction to small RNAs. History, biogenesis. In silico predictions, target gene identification, methylation of heterochromatin by het associated siRNAs. Gene regulation by small RNA and other classes of siRNAs. Role in epigenetics. Jacob Monod model, RNA editing, genome imprinting.

**Suggested Reading**

1. Sambrook JF and Russell DW (Ed), 2001, Molecular Cloning: A Laboratory Manual, 3<sup>rd</sup> edn, Vols 1, 2 and 3, Cold Spring Harbor Laboratory Press.

2. Mohanpuria P, Kumar V, Mahajan M, Mohammad H and Yadav SK, 2010, Gene Silencing: Theory, Techniques and Applications: Genetics-Research and Issues, Nova Science Publishers.

### **IPR, Biosafety and Bioethics**

**2 (2+0)**

#### **Objectives**

1. To study the importance and forms of IPR.
2. To study the role of IPR in connection with biodiversity and research outcomes.
3. To study the biosafety guidelines for handling the GMOs.

#### **Theory**

Introduction to Intellectual Property, concepts and types. International treaties for the protection of IPRs. Indian Legislations for the protection of various types of intellectual property. Patent search, filing process. Material transfer agreements.

Biodiversity definition, importance and geographical causes for diversity. Species and population biodiversity, maintenance of ecological biodiversity hot spots in India. Convention on biological diversity. Cartagena protocol of bio-safety, and risk management for GMO's. Bio-safety guidelines, rules and regulations and regulatory framework for GMOs in India.

#### **Suggested Reading**

1. Deepa G and Shomini P, 2013. IPR, Biosafety and Bioethics, Pearson Education.
2. Singh BD, 2021, Biotechnology Expanding Horizons, Kalyani Publishers.

### **Computational Biology**

**3 (2+1)**

#### **Objectives**

1. To study the basics of web-based servers and software in genome analysis.
2. To study the procedure and steps in DNA/RNA/protein sequence submission
3. To study the methods of analysing the sequences for similarity and phylogenetics

#### **Theory**

Introduction to computational biology. Web-based servers and software for genome analysis. Ensembl, UCSC genome browser, MUMMER, BLASTZ. Sequence submission: sequence submission, whole genome sequence submission; NGS: basics and types. Introduction to bioprogramming; Perl, Python and R development of web server; basic concepts.

Protein interaction databases: BIND, DIP, GRID, STRING, PRIDE. Principles of Protein structure prediction. Fold Recognition (threading). Homology modeling. SCOP, CATH, PDB, PROSITE, PFAM. Methods for comparison of 3D structures of proteins.

Phylogenetic analysis. Evolutionary models, tree construction methods, statistical evaluation of tree methods; PHYLIP, dendroscope, MEGA; DNA barcoding database-BOLD.

#### **Practical**

Application of Genome browsers in genomic research. Exploring protein-protein interaction databases. Working with protein structural classification databases. SNP and SSR identification tools; PHYLIP.

**Suggested Reading**

1. Creighton TE, 1993, Proteins: Structures and Molecular Properties, 2<sup>nd</sup> edn, W. H. Freeman.
2. Dov S, 2003, Microarray Bioinformatics, 1<sup>st</sup> edn, Cambridge University Press.
3. Malcolm Campbell A and Laurie JH, 2007, Discovering Genomics, Proteomics and Bioinformatics. 2<sup>nd</sup> edn, Benjamin Cummings.
4. Mount D, 2001, Bioinformatics: Sequence and Genome Analysis, 2<sup>nd</sup> edn, Cold Spring Harbor Laboratory Press.
5. Setubal J and Meidanis J, 2004, Introduction to Computational Molecular Biology, PWS Publishing Company.

**Introduction to Animal Breeding****3 (2+1)****Objectives**

1. To study the developments and goals of animal breeding
2. To study population genetics
3. To study the methods of animal breeding

**Theory**

Population and population genetics; Hardy- Weinberg law; Hardy Weinberg equilibrium. Approaching to equilibrium for sex-linked trait; linkage equilibrium. Effect of linkage on HW-equilibrium. Stochastic and deterministic forces acting on population; mutation; migration; selection.

Dissection of phenotype into its components. Transmitting ability, substitution effect of allele. Breeding value. Definition, concept. Heritability: definition, concept, estimation of heritability from regression of offspring to parents. Resemblance among relatives. Repeatability. Definition, concept and estimation. Correlated traits. Phenotypic and genetic correlation, environmental correlation, selection index. Basic concept and types. Basis of selection. Selection differential and genetic gain.

Breeding strategies in large ruminants (cattle, buffalo), small ruminants (sheep, goat) and swine. Poultry breeding. Lab animal breeding. Breed improvement program conducted in India. Molecular breeding: complementation of traditional breeding strategies with molecular genetics.

**Practical**

Chi-squared test for determining goodness of fit for HW-equilibrium. Estimation of effect of allelic substitution. Estimation of heritability, regression of offspring on parents. Estimation of repeatability. Phenotypic correlation, genetic correlation, environmental correlation. Chi-squared test for determining goodness of fit for HW-equilibrium. Linkage analysis from pedigree data. Selection index.

**Suggested Reading**

1. Brah GS, 2014, Animal Genetics: Concepts and Implications, 2<sup>nd</sup> edn, Kalyani Publishers.
2. Mackay TFC and Falconer DS, 2009, Introduction to quantitative genetics, 4<sup>th</sup> edn, Pearson.

**Biostatistics****2 (1+1) Objectives**

1. To study the variables and descriptive statistics
2. To study various distributions
3. To study experimental data analysis and interpretation

**Theory**

Random variables: expected value and its variance; probability distribution of random variables. Conditional probability. Baye's theorem and its applications. Introduction to uniform, binomial, poisson, normal, exponential and gamma probability distributions.

Random mating populations, Hardy-Weinberg Law. Introduction to poisson process and Markov chains. Transition probability matrix, n-step transition probabilities, steady state. Random walk models. Sensitivity and specificity. Positive and negative predictive values.

Chi-square test: testing heterogeneity, use in the genetic experiment, detection of linkage, linkage ratios and its estimation. Analysis of variance. One-way and two-way classification with interaction. Analysis of covariance. Incomplete block designs. Estimation and significance of genotypic and phenotypic variation.

**Practical**

Expected value and variance of discrete and continuous distributions. Uniform, binomial, poisson, normal, nxponential and namma probability distributions. Hardy-Weinberg Law. Construction of transition probability matrix in Markov Chains. Calculation of sensitivity and specificity. Positive and negative predictive values. Detection and linkage using chi-square test; one-way and two-way analysis of variance. Analysis of covariance. Incomplete block designs. Estimation of heritability.

**Suggested Reading**

1. Gupta SC, Kapoor VK, 2007, Fundamentals of applied statistics, 4<sup>th</sup> edn, S Chand and Sons.
2. Kaps M and Lamberson WR, 2017, Biostatistics for Animal Science, 3<sup>rd</sup> edn, CABI.
3. Triola MM, Triola MF and Roy J, 2017, Biostatistics for the Biological and Health Sciences, 2<sup>nd</sup> edn, Pearson.

**Food Science and Processing****3 (2+1)****Objectives**

1. To study food and nutrition for good health
2. To study food spoilage, processing and preservation
3. To study the methods of assessing physical and chemical qualities

**Theory**

Definition: Food and nutrition. Food production and consumption trends in India. Major deficiencies of calories, proteins, vitamins and micronutrients. Food groups and concept of balanced diet. RDA, biotoxins, anti-nutritional factors and metabolites.

Causes of food spoilage. Principles of processing and preservation of food by heat, low temperature, drying and dehydration, chemicals and fermentation. Preservation through ultraviolet and ionizing radiations.

Post-harvest handling and technology of fruits, vegetables, cereals, oilseeds, milk, meat and poultry. Food safety, adulteration and food laws. Status of food industry in India

### Practical

Physical and chemical quality assessment of cereals, fruits, vegetables, egg, meat and poultry. Value-added products from cereals, millets, fruits, vegetables, milk, egg and meat. Visit to local processing units.

### Suggested Reading

1. Potter NN and Hotchkiss JH, 1995, Food Science, Chapman and Hall Publishers.
2. Swaminathan M, 2005, Handbook of Foods and Nutrition, Ganesh and Co. Pvt. Ltd.
3. Swaminathan M, 1990, Food Science, Chemistry and Experimental Foods, BAPPCO.
4. Vaclavik VA and Christian EW, 2003, Essentials of Food Science, 2<sup>nd</sup> edn, Kluwer Academic/Plenum Publishers, New York.

## Semester VII

### Elective Courses

#### Applications of Genomics and Proteomics

4 (3+1)

#### Objectives

1. To introduce the concepts of omics; genomics, transcriptomics and proteomics
2. To study the methods in genomics and their applications
3. To study the techniques in proteomics

#### Theory

Genomes of Arabidopsis, rice, tomato, pigeon pea, wheat. Mutants and RNAi in functional genomics. Site-directed mutagenesis. Transposon tagging. Transient gene expression: VIGS and FACS based, targeted genome editing technologies, introductory genome editing principle and concepts.

Protein 3D structure modelling (homology modelling and crystallography). Proteome analysis. Protein-protein interaction. FRET, yeast two-hybrid and co-immunoprecipitation, Bimolecular Fluorescence Complementation (BiFC). Applications of genomics and proteomics in agriculture, human health and industry. Metabolomics and ionomics for elucidating metabolic pathways.

#### Practical

SDS-PAGE; 2D Electrophoresis. Protein characterization through HPLC. Specialized crop-based genomic resources: TAIR, Gramene, Graingenes, Maizedb, Phytozome, C e r e a l d b, Citrusdb and miRbase.

**Suggested Reading**

1. Connor DO and Hames BD, 2007, Proteomics: Methods Express, Royal College of General Practitioners.
2. Pennington SR, Dunn MJ, 2001, Proteomics from protein sequence to function, BIOS Scientific Publishers Ltd.
3. Sangeetha J and Thangadurai D, 2015, Genomics and Proteomics: Principles Technologies and Applications, Taylor and Francis
4. Tropp BE, 2012, Molecular Biology Genes to Proteins, 4<sup>th</sup> edn, Jones and Bartlett Learning.
5. Verma PS and Agarwal VK, 2014, Cell Biology, Genetics, Molecular Biology, Evolution and Ecology, S. Chand and Company Pvt. Ltd.+

**Principles of Molecular Breeding****4 (3+1)****Objectives**

1. To introduce the concept of molecular breeding with reference to conventional breeding
2. To study the mapping populations, genotyping, phenotyping and mapping
3. To study the validation of genomic resources and their employment in breeding

**Theory**

Introduction to molecular breeding, advantages, requirements and methodologies. Limitations of conventional breeding. Development of specific mapping populations, association panels, MAGIC and NAM populations.

Phenotyping and genotyping of the populations, construction of the linkage maps, and linkage-disequilibrium maps. Analysing marker-trait associations, validation of QTL and markers, fine-mapping, and candidate gene discovery.

Marker-assisted selection (MAS) and marker-assisted backcross breeding. Foreground selection, background selection and recombination selection. MAS for major and minor genes, marker-assisted pyramiding, and marker-assisted recurrent selection.

**Practical**

Methodologies in phenotyping, genotyping, handling marker data, linkage analysis, candidate gene discovery, and fine-mapping. Software for linkage mapping and association mapping. Working on some genotyping and phenotyping datasets for linkage mapping using software such as Mapmaker, MapDisto and QTL mapping software such as WinQTL Cartographer.

**Suggested Reading**

1. Bharadwaj DN, 2019, Molecular Plant Breeding: Meeting the Challenge of Food Security, Apple Academic Press.
2. Xu Y, 2010, Molecular Plant Breeding, CABI, Science.
3. Singh BD and Shekhawat NS, 2017, Molecular Plant Breeding, Scientific Publishers.

**Principles and Procedures of Plant Tissue Culture****3 (2+1)****Objectives**

1. To understand the concept of totipotency and its applications in plant tissue culture
2. To study the composition of plant tissue culture media and the role of different components
3. To study the principles, procedures and uses of various types of cultures

**Theory**

History of plant tissue culture. Concept of totipotency. Concept of aseptic culture practices and sterilization techniques. Components of *in vitro* culture media and role of different macro and micronutrients, vitamins, plant growth regulators and growth supplements. Various plant cell, tissue and organ culture techniques and uses. Somatic cell cultures. Morphogenesis: organogenesis and somatic embryogenesis. Micropropagation; *In vitro* grafting. Meristem culture. Anther, pollen, embryo, ovule and ovary culture. Protoplast culture and somatic hybridization. Somaclonal variation.

**Practical**

Good laboratory practices. Media preparation and sterilization. Surface sterilization of explants. Establishment of callus/cell suspension cultures. Micropropagation. Embryo culture. Anther culture. Induction of plant regeneration. Hardening and transfer to soil.

**Suggested Reading**

1. Bhojwani SS and Razdan MK, 1996, Plant Tissue Culture: Theory and Practice, Elsevier.
2. Chawla HS, 2009, Introduction to Plant Biotechnology: Oxford & IBH Publishing Co Pvt. Ltd.
3. Dixon RA and Gonzales RA, 2003, Plant Cell Culture: A Practical Approach, Oxford University Press.
4. Razdan MK, 2008, Introduction to Plant Tissue Culture: Oxford & IBH Publishing Co Pvt. Ltd.

**Molecular Breeding in Field and Horticultural Crops****3 (2+1)****Objectives**

1. To study the principles and applications of molecular breeding in field and horticultural crops
2. To understand breeding objectives in field and horticultural crops
3. To study the success stories of molecular breeding in field and horticultural crops

**Theory**

MAS for specific traits with examples from field crops with success stories. Development, testing and release of improved genotypes developed using MAS. Specific case studies. Reproductive biology of major field and horticultural crops. Target traits in major field and horticultural crops. Breeding methods of self- and cross-pollinated field and horticultural crops. Pseudo test cross-mapping strategy in fruit crops. Molecular mapping in vegetable crops. Marker-assisted breeding in field and horticultural. Mutation breeding and characterization of mutants.

**Practical**

Use of gene-based and closely linked markers for foreground selection for target traits in target field crops. Hands-on training on MAS with a specific crop. Modifications in DNA extraction

methods for field and horticultural. Agarose gel electrophoresis, and DNA quantification. Mapmaker; Diversity analysis using UPGMA. Identifying repeat sequences using MISA. Standard gene cloning and expression methods.

### Seed Biology, Biotechnology, Production and Management

3 (2+1)

#### Objectives

1. To provide an overview of the aspects of seed biology
2. To study the principles and methods of quality seed production
3. To study the techniques and management for seed processing

#### Theory

Seed structure, seed development and maturation. Seed germination. Seed senescence- causes, quality characters.

Molecular seed biology: gene expression during seed development, molecular markers and seed quality, omics technologies in seed research and male sterility systems. Biofortification and seed enhancement, seed coatings and treatments, biopesticides and biofertilizers. Advances in seed biotechnology, sustainable seed production practices and future challenges and opportunities in seed science.

Principles of quality seed production. Factors affecting quality seed production. Causes of varietal deterioration and maintenance of genetic purity during seed production.

Post-harvest handling of seeds - threshing methods - drying methods - advantages and disadvantages. Seed processing principles and sequencing. Seed enhancement technologies (coating, priming, pelleting and hardening)

**Practical**

Seed production in rice varieties and hybrids. Seed production in sorghum varieties and hybrids. Seed production in pearl millet varieties and hybrids. Seed production in maize. Hybrid seed production in maize. Seed production in pulses (black gram and green gram and red gram). Seed production in groundnut and gingelly. Seed production in sunflower varieties and hybrids. Seed production in cotton. Seed production in solanaceous vegetables. seed production techniques of bhendi and onion. Seed production in cucurbits (snake gourd, bitter gourd, ash gourd, ridge gourd and pumpkin).

**Suggested Reading**

**Plant Genetic Transformation****3 (2+1)****Objectives**

1. To study the historical developments of plant transformation
2. To study the methods of plant transformation
3. To get acquainted with the methods used for analysing the transgenics

**Theory**

History of plant genetic transformation. Development of gene constructs. Methods of genetic transformation: *Agrobacterium*-mediated, biolistics, electroporation, liposome, polyethylene glycol, in planta methods.

Selection and characterization of transgenic plants using selectable and reportable markers. PCR; qRT-PCR; Southern and Northern hybridization, ELISA and Western blotting. Application of genetic transformation for improvement of important traits. Biosafety aspects of transgenic plants and regulatory framework.

**Practical**

Preparation of stock solutions. Construction of binary vector. Preparation of competent cells of *Agrobacterium tumefaciens* and transformation. Restriction analysis of plasmids, confirmation of transformed bacterial colonies. *Agrobacterium tumefaciens* mediated and biolistic plant transformation.

**Suggested Reading**

1. Gardener EJ, Simmons MJ and Snustad DP, 1991, Principles of Genetics. John Wiley and Sons, Inc, New York, USA.
2. Grierson D, 2012, Plant Genetic Engineering, Springer Netherlands.
3. Primose SB and Twyman RM, 2006, Principles of Gene Manipulation and Genomics, 7<sup>th</sup> edn, Black Well Publishing.

### Principles and Procedures of Animal Cell Culture

4 (3+1)

#### Objectives

1. To study the principles and importance of animal cell culture
2. To study the basic requirements for animal cell culture
3. To study the techniques in cryopreservation and applications of animal cell culture

#### Theory

History, importance and development of animal cell culture techniques. Basic requirements for animal cell culture. Sterilization procedures for cell culture work. Different types of cell culture media, growth supplements, serum-free media and other cell culture reagents.

Different cell culture techniques including primary and secondary cultures; continuous cell lines, suspension culture, organ culture etc. Commonly used animal cell lines: CHO, HeLa, BHK-21, VERO, Sf9, C636, their origin and characteristic, growth kinetics of cells in culture, differentiation of cells. Characterization and maintenance of cell lines. Applications of animal cell cultures.

Cryopreservation and revival of cells. Hybridoma technology. Scaling up methods, bioreactors. Overview of insect cell culture. Stem cell culture and its application, overview of induced pluripotent stem cells (iPSCs). Common cell culture contaminants and their management.

#### Practical

Basic equipments used in animal cell culture laboratories. Washing, packing and sterilization of glass and plastic wares for cell culture. Preparation of media and reagents for cell culture. Primary culture technique of chicken embryo fibroblast/any other animal tissue. Culture and sub-culturing of continuous cell lines. Viability assay by trypan blue dye exclusion method. Isolation and cultivation of lymphocytes. Cryopreservation of primary cultures and cell lines. Cytopathic effect of viruses on cultured mammalian cells.

#### Suggested Reading

1. Freshney I, 2016, Culture of Animal Cells: A Manual of Basic Technique and Specialized Applications.

### Animal Genomics

4 (3+1)

#### Objectives

1. To study the genome sequencing and organisation of the animal genome and chromosomal aberrations
2. To study the application of genomics in the development of molecular markers
3. To study the application of genomics and molecular markers in animals

## Theory

Genome organization in eukaryotes. Satellite DNA: VNTRs and families, LINE and SINE. Sex determination: chromosomal basis of sex determination, molecular markers for sex determination, environmental sex determination. Chromosomal aberrations: euploidy, chromosomal non-disjunction and aneuploidy, polyploidy, induced polyploidy, syndromes, structural aberrations. Robertsonian translocations, position effect, chromosomal mosaics, Philadelphia chromosome, chromosomal aberrations and evolution.

Molecular markers: markers, genetic markers: RAPD, STR, DNA fingerprinting, SSCP, RFLP, SNP, EST; SNP Analysis. Karyotyping. Somatic cell hybridization, SNP-array. Radiation hybrid maps. FISH technique. Major histocompatibility complex. Concept and its relevance in disease resistance and immune response. Quantitative trait Loci. Marker Assisted Selection: concept, linkage equilibrium, application in animal sciences. Genomic selection: concept, linkage disequilibrium. Methodologies of genomic selection. Mitochondrial DNA analysis and its application in livestock; applying DNA markers for breed characterization, molecular signatures.

## Practical

Extraction of genomic DNA from peripheral blood. Analysis of DNA by agarose or polyacrylamide gel electrophoresis. Checking the quality and quantity of genomic DNA. Restriction digestion and analysis. Sanger sequencing data analysis. Extraction of mitochondrial DNA. Extraction of RNA from PBMC. Quality checking of total RNA. cDNA synthesis.

5. Sue C, Heather BM, Scott DW and Melissa CS, 2019, Molecular Biology Techniques: A Classroom Laboratory Manual, Academic Press.

## Transgenic Animal Production

**3(3+0)**

### Objectives

1. To study the historical developments of developing transgenic animals
2. To study the methods of animal transformation
3. To get acquainted with the methods used for analysing the transgenics
4. To study the applications of transgenic animals

### Theory

History of transgenesis. Isolation of gene, preparation of gene construct. Methods of transgenic animal production. Calcium chloride mediated transfection, lipofection, electroporation, microinjection, nano delivery.

Production of gene knockouts: cre-lox, zinc finger nucleases; CRISPR; TALENs. Production of chimeric animals, gene silencing by lentivirus system.

Stem cell technology, isolation and characterization of stem cell lines from different sources: embryo, mesenchymal, induced pluripotent stem cell. Introduction to animal cloning. Application of stem cells in transgenesis and animal cloning.

Fundamental assays of transgenic products: confirmation of integration of transgene. Validation of transgenic products like isolation of transgenic protein from milk and characterization. Application of transgenics in production of disease resistance models and carcinogenesis. Regulatory issues associated with transgenic animal production.

### Suggested Reading

1. Pinkert CA, 2014, Transgenic Animal Technology.

### Molecular Virology and Vaccine Production

3 (2+1)

#### Objectives

1. To study the viruses to develop vaccines
2. To study the antigens and methods of producing the vaccines
3. To study the properties of ideal vaccines

#### Theory

Properties of viruses. Classification of viruses. Virus replication. Cell transformations, cultivation of viruses, assay techniques for detection/quantification. Important animal viruses. Virus-host interactions. Viral infections. Immune responses to viruses. Interferon and other cytokines. Bio-safety and bio-security principles.

Properties of an ideal vaccine. Classification of vaccines. Methods of inactivation and attenuation of viruses. New generation vaccines: subunit, synthetic, rDNA, marker and edible. Adjuvants and vaccine delivery systems. Novel immunomodulators and vaccine delivery using nanotechnology. Vaccine preparation. Stabilizers, preservatives and vehicles. Quality control and testing of vaccines. Sero-surveillance and sero-monitoring.

#### Practical

Outline of a virology lab and guidelines to work in a virology lab. Processing of clinical specimens for isolation of viruses. Cultivation of viruses in cell cultures and embryonated eggs. Harvesting of virus. Study of cytopathic effects. Titration of virus and estimation of TCID<sub>50</sub>. Haemagglutination and haemagglutination inhibition test. Detection of virus by SNT, AGID and ELISA.

### Suggested Reading

1. Maclachlan NJ and Dubovi EJ, 2016, Fenner's Veterinary Virology, 5<sup>th</sup> edn, Elsevier.

### Embryo Transfer Technologies

3 (2+1)

#### Objectives

1. To study the veterinary reproductive technologies used to obtain offspring from animals as an alternative to natural mating

2. To study the techniques in embryo transfer
3. To study gene transfer and biopharming in conjunction with embryo transfer

### Theory

History, advantages, limitations and scope of embryo transfer technology. Estrus cycle and its detection in animals. Methodology of superovulation. Ovum pick up (OPU). Preparation of sperm for in vitro fertilization (IVF). Embryo grading and culture. Micromanipulation and immunomodulation for enhancement of fecundity.

Different methods of gene transfer and their limitations; embryo splitting; embryo sexing by different methods; production of transgenic livestock by nuclear transfer and its application. Animal Biopharming, animal gene bank; regulatory issues (social, ethical, religious and environmental). Cloning of domestic animals. Conservation of endangered species. Characterization of embryonic stem cells and applications.

### Practical

Demonstration of estrus detection methods. Estrus synchronization. Superovulation. Oocyte collection from slaughterhouse ovaries. Grading of oocytes from slaughterhouse ovaries. Collection and preparation of semen samples. In vitro fertilization. Collection of embryos using non-surgical procedures. Grading and culture of embryos. Embryo sexing by different methods. Embryo splitting. Embryo freezing.

### Suggested Reading

1. Gordon I, 2004, Reproductive Technologies in Farm Animals, CABI.
2. Hafez ESE, 2000, Reproduction in Farm Animals, Lippincott, Williams and Wilkins.

### Animal Reproductive Biotechnology

**3 (2+1)**

### Objectives

1. This course aims to study the basics of animal reproductive technologies used to analyse, understand and enhance the fertility of animals
2. To study male and female reproduction and methods of checking the quality of gametes
3. To study the direct and indirect methods of checking pregnancy

### Theory

Follicle development, oogenesis, endocrinology of female reproduction, spermatogenesis, endocrinology of male reproduction, structure of spermatozoa and oocyte, semen: composition and contribution to semen by different accessory glands, capacitation of spermatozoa, acrosome reaction, estrus cycle, estrus detection.

Oocyte maturation analysis, methods of semen collection, semen analysis (morphological, microscopic, biochemical or molecular, computer assisted sperm analysis), semen extenders, cryopreservation of semen, oocytes and embryos (history and methods: slow, rapid/ vitrification), polyspermy. fertilization, embryo development, gastrulation, pregnancy diagnosis: different methods (direct and indirect).

Basic terms related to infertility, morphological abnormality in semen, male infertility: terms and causes (genetic and infectious), female infertility: terms and causes (genetic and infectious), artificial gametes, sex sorting of semen.

### Practical

Semen collection by artificial vagina, semen analysis (color, volume etc., live dead staining, mass motility, progressive motility, concentration of semen, HOST, abnormality in semen, TUNEL assay, Free Radical Assay). Preparation of semen extender, calculation for semen doses preparation, semen doses preparation, oocyte Maturation assessment.

### Suggested Reading

1. Dugwekar YG, 2006, Reproductive Biotechnology of Farm Animals, Agrotech Publishing Academy.
2. Hafez ESE and Hafez B, 2000, Reproduction in Farm Animals, 7<sup>th</sup> edn, Blackwell Publishing.
3. Yadav PS, Singh B, Singh I and Sethi RK, 2010, Reproductive Biotechnology in Buffalo, SSPH, ISBN: 8189304801.

### Fundamentals of Molecular Pharming and Biopharmaceuticals

4 (3+1)

#### Objectives

1. To provide a basic understanding and principles of molecular pharming
2. To study various hosts and techniques for molecular pharming
3. To study the biopharmaceuticals that are successfully pharming

#### Theory

Concept of molecular pharming and production of biopharmaceuticals. Mammalian cell culture manufacturing and microbial fermentation. Fermentation and cell culture processing. Protein purification and processing. Industrial fermentation: batch and continuous cultures, production of biopharmaceuticals, immobilization techniques.

Biopharmaceutical analytical techniques. Biopharma drug discovery and development; production of specific vaccines and therapeutic proteins, click chemistry/ bioorthogonal chemistry for application in plant science.

#### Practical

Isolation and purification of proteins from microbes and plants. Production of recombinant proteins in prokaryotes. Analysis of proteins by one and two-dimensional gel electrophoresis. Affinity chromatography. Immunoblotting. Cell culture and immobilization techniques. Visit to biopharmaceutical industry.

#### Suggested Reading

1. Brown TA, 2010, Gene Cloning and DNA Analysis: An Introduction, 6<sup>th</sup> edn, Wiley-Blackwell Publishing.
2. Kirkosyan A and Kaufman PB, 2009, Recent Advances in Plant Biotechnology, Springer.

3. Primrose SB and Twyman RM, 2013, Principles of Gene Manipulation and Genomics, John Wiley and Sons.

### Microbial Biotechnology

4 (3+1)

#### Objectives

1. To study the scope and methods of using industrially useful microorganisms
2. To study the applications of microbes in industry and agriculture
3. To study the methods used for improving the microorganisms

#### Theory

Microbial biotechnology, scope and techniques. Industrially important microorganisms. Gene transfer mechanisms in microbes. Transformation, transduction, conjugation and recombination. Genetic variability in microorganisms. Biotechnological tools to improve the microbial strains with respect to industry and agriculture.

Biotransformation and biodegradation of pollutants, biodegradation of lignocelluloses and agricultural residues. Biotechnological treatment of wastewater, sewage and sludge. Industrial production of alcohols, ethanol, acids (citric acid, acetic acid), solvents (glycerols, acetone, butanol), antibiotics (penicillin, streptomycin, tetracycline), amino acids (lysine, glutamic acid), single-cell proteins. Recombinant and synthetic vaccines.

#### Practical

Isolation and preservation of industrially important microorganisms. Microbial fermentation, production of proteins and enzymes using bacteria, yeast and fungus. Microbial biomass production, utilization of plant biomass by recombinant microorganisms. Production of secondary metabolites from microbes.

#### Suggested Reading

1. Glaze AN and Nikaido H, 2007, Microbial Biotechnology: Fundamentals of Applied Microbiology. 2<sup>nd</sup> edn, Cambridge University Press.
2. Mohapatra PK, 2006, Text Book of Environmental Biotechnology, International Publishing House Pvt. Ltd.

### Bioprospecting of Genes and Molecules

3 (3+0)

#### Objectives

1. To study the concepts of bioprospecting
2. To study the methods and techniques used for producing bioactive molecules
3. To study the IPR in relation to novel genes and molecules

#### Theory

Concepts and practices of bioprospecting. Traditional and modern bioprospecting. Gene prospecting. Isolation, synthesis and purification of new bioactive molecules; clinical and field trials; intellectual property rights and the legal framework. Patenting of new genes and/or novel biomolecules and their applications.

Principles of the Convention on Biological Diversity, biodiversity conservation and biotechnology. Development and management of biological, ecological, taxonomic, and related systematic information on living species and systems.

Bioprospecting of microorganisms and their components. Bioprospecting of biodiversity for new medicines. Identification and collection of material by random and traditional (medicinal) approaches. Screening for particular bio-activities. Elucidation of novel molecular form, process technology. Development of techniques for large scale industrial production of the bioactive product and developing market linkage.

### Suggested Reading

1. Mohapatra PK, 2006. Text Book of Environmental Biotechnology, International Publishing House Pvt. Ltd.
2. Sharma PD, 2012, Ecology and Environment, 11<sup>th</sup> edn, Rastogi Publications.

4. Upadhyay SK and Singh SP, 2021, Bioprospecting of Microorganism-Based Industrial Molecules, John Wiley and Sons.

### Molecular Ecology and Evolution

3 (3+0)

#### Objectives

1. To study the meaning and concepts of molecular evolution
2. To study the concepts of speciation and domestication in conjunction with evolution
3. To study the application of molecular tools for understanding molecular evolution

#### Theory

Molecular Evolution. Concept, molecular divergence and molecular clocks. Speciation and domestication. Evolution of earth and earlier life forms. Primitive organisms, their metabolic strategies and molecular coding. New approaches to taxonomical classification including ribotyping. Ribosomal RNA sequencing. Molecular tools in phylogeny, classification and identification.

Protein and nucleotide sequence analysis. Origin of new genes and proteins. Gene duplication and divergence. Genome evolution, components of genomes, whole genome duplications, chromosome rearrangements and repetitive sequence evolution.

Application of molecular genetics and genomics to ecology and evolution. Assessment of genetic diversity, phylogeny, inbreeding, quantitative traits using molecular tools. Mutations. Regulations of gene expression.

### Suggested Reading

1. Beebe T and Rowe G, 2008, An Introduction to Molecular Ecology, 2<sup>nd</sup> edn, Oxford University Press.
2. Brown TA, 2007, Genome 3, Garland Science Publishing.
3. Carvalho GR, 2002, Advances in Molecular Ecology, IOS Press Netherland.

**Food Biotechnology****3 (2+1)****Objectives**

1. To study the meaning and concepts of food biotechnology
2. To study the techniques in food processing and preservation
3. To study the application of microorganisms and genetic engineering in food biotechnology

**Theory**

Food Biotechnology. Introduction, history and importance. Applications of biotechnology in food processing; recent developments, risk factors and safety regulations. Food spoilage and preservation process. Food and beverage fermentation: alcoholic and non-alcoholic beverages, food additives and supplements.

Industrial use of microorganisms. Commercially exploited microbes: *Saccharomyces*, *Lactobacillus*, *Penicillium*, *Acetobactor*, *Bifidobacterium*, *Lactococcus* and *Streptococcus*; dairy fermentation and fermented products. Prebiotics and probiotics. Genetic engineering for food quality and shelf life improvement. Bioactive peptides. Labelling of GM foods.

**Practical**

Isolation, culture and maintenance of biotechnologically important micro-organisms. Use of laboratory and industrial scale shakers. Batch and continuous cultures. Use of fermentors. Detection of pathogens in food and feed. Detection of GM food. Visit to the food processing industry.

**Suggested Reading**

1. Hui YH and Khachatourians GG, 1995. Food Biotechnology: Microorganisms, Wiley-VCH
2. Shetty K, Paliyath G, Pometto A and Levin RE, 2006, Food Biotechnology, 2<sup>nd</sup> edn, CRC Press.

**Green Biotechnology****3 (2+1)****Objectives**

1. To study the meaning and concepts of green biotechnology
2. To study the methods and products for better plant growth
3. To study carbon sequestration and other biosafety approaches for a better environment

**Theory**

Green biotechnology: definition, concept and implication. Bio-fertilizers and bio-pesticides. Plant growth promoting rhizobacteria. Production of biofuels, biodiesel and bioethanol. Biomass enhancement through biotechnological interventions. Generation of alternate fuels in plants. Identification and manipulation of micro-organisms for biodegradation of plastics and polymers. GMOs for bioremediation and phytoremediation, their roles. Strategies for detection and control of soil, air and water pollutants, circular economy-based resource utilization for biofuel generation.

Carbon sequestration; methanogenic microbes for methane reduction. Microbes for phytic acid degradation. Genetic engineering for increasing crop productivity by manipulation of photosynthesis, nitrogen fixation and nutrient uptake efficiency. Marker-free transgenic development

strategies. Development of disease-resistant and pest-resistant crops through biotechnological tools. Biotechnology and sustainable development: sustainable agriculture practices and biotechnology, biotechnological solutions for food security, biotechnology in the context of climate change mitigation and policy and regulatory aspects of green biotechnology.

### Practical

Identification and efficiency assays of micro-organisms for biodegradation and bioremediation. Isolation of *Bacillus thuringiensis* and plant growth promoting rhizobacteria. Production of biofertilizers, biopesticides and biofuel. Assays for removal of oil spillage.

### Suggested Reading

1. Kirkosyan A and Kaufman PB, 2009, Recent Advances in Plant Biotechnology, Springer.
2. Kumar A, 2004, Environmental Biotechnology, Daya Publishing House.
3. Murray DC, 2011, Green Biotechnology, Dominant Publishers and Distributors.

### Programming in Bioinformatics

4 (2+2)

#### Objectives

1. To study the importance and essentials of programming in bioinformatics
2. To study the operating system, algorithms, languages and functions for bioinformatics with hands-on practical
3. To study programming language

#### Theory

Introduction: operating systems, programming concepts, algorithms, flow chart, programming languages, compiler and interpreter. Computer number format: decimal, binary, octal and hexadecimal.

C-Language: history, constant, variables and identifiers, character set, logical and relational operators, data input and output concepts. Decision making: if statement, if-else statement, for loop, while loop and do-while loop. Arrays and functions, file handling. Program related to arithmetic operations, arrays and file handling in C.

### Practical

PERL-Language: introduction, variables, arrays, string, hash, subroutines, file handling, conditional blocks, loops string operators and manipulators, pattern matching and regular expressions in PERL; sequence handling in PERL demonstrating string, array and hash. Shell Programming: concepts and types of UNIX shell, Linux variables, if statements, control and iteration, arithmetic operations, concepts of awk, grep and sed; Sequence manipulations using shell scripting.

### Suggested Reading

1. Balagurusamy E, 2008, Programming in ANSI C, Tata McGraw-Hill Education.
2. Christiansen T, Foy BD, Wall L and Orwant J, 2012, Programming Perl, 4<sup>th</sup> edn, O'Reilly Media.
3. Kanetkar Y, 2013, Let Us C, BPB Publications.
4. Tisdall J, 2003, Mastering Perl for Bioinformatics, O'Reilly Media.

**Bioinformatics Tools and Biological Databases****3 (2+1)****Objectives**

1. To study various tools of bioinformatics for sequence analysis
2. To study biological data, databases and their applications
3. To study algorithms and methods for bioinformatic analysis, and visualization of results

**Theory**

Introduction: biological data types, collection, classification schema of biological databases. Biological databases retrieval systems. Sequence and molecular file formats.

Biological databases: nucleotide database, protein database, structural database, genome databases, metabolic pathway database, literature database, chemical database, gene expression database, crop database with special reference to BTISNET databases.

Bioinformatics tools: concept of alignment, scoring matrices, alignment algorithms, heuristic methods, multiple sequence alignment, phylogenetic analysis, molecular visualization tools.

**Practical**

NCBI; ExPasy: SwissProt; EBI; Search engines: ENTREZ and SRS; Perform local alignment using all BLAST variants. Multiple sequence alignment using ClustalW. T Coffee. phylogenetic analysis by PHYLIP. MEGA.

**Suggested Reading**

1. Baxevanis AD and Ouellette BFF, 2001, Bioinformatics: A practical guide to the analysis of genes and proteins, John Wiley and Sons.
2. Mount DW, 2001, Bioinformatics: Sequence and Genome Analysis, Cold Spring Harbor.
3. Xiong J, 2006, Essential Bioinformatics, Cambridge University Press.

**Structural Bioinformatics****3 (2+1)****Objectives**

1. To acquaint the students with the creation of new methods of analysing and manipulating biological macromolecular data in order to solve problems in biology and generate new knowledge
2. To study the analysis and prediction of the three-dimensional structure of biological macromolecules such as proteins, RNA, and DNA

**Theory**

Introduction to structural databases of macromolecules, natural and synthetic small molecules. Structure of amino acids. Protein structure classification, Ramachandran plot. Experimental structure determination methods. Motifs, domain, profiles, fingerprint and protein family databases.

Structural features of RNA, RNA secondary structure predictions. RNA folding. Small RNA prediction.

Structure prediction; basics of protein folding, protein folding problem, molecular chaperons. Secondary structure prediction methods and algorithms: homology, ab initio and folding-based tertiary structure prediction. Structure validation tools, energy minimization techniques. Introduction to molecular dynamics and simulation, Monte-Carlo methods, Markov chain and HMM. Structure visualization and comparison methods.

### Practical

Protein structural classification databases, 3D-Structural databases searching and retrieval, Ramachandran Plot, structural visualization tools, tools for protein secondary and tertiary structure prediction; RASMOL, Cn3D, CHIMERA, SWISSPDBviewer, CPH, MODELLER, SWISS Model, EasyModeler, Procheck. GROMAC. SANJIVNI. BHAGIRATH.

### Suggested Reading

5. Setubal J, and Meidanis J, 1997, Introduction to Computational Molecular Biology, PWS Publishing Company.

### Pharmacogenomics

3 (2+1)

#### Objectives

1. The students are exposed to develop strategies for individualizing therapy for patients, to optimize outcomes through knowledge of human genome variability and its influence on drug response
2. To study the research on genes and medications which has advanced the understanding of the genetic basis of individual drug responses

#### Theory

Basic concepts of pharmacogenomics, clinical application and challenges in pharmacogenomics. Human Genome Project, genetic diseases, personalized medicine and pharmacogenomics necessity in drug designing. Prediction of structural changes among sequence variants and genetic analysis. Microsatellites for studying genetic variations. Drug databanks. Gene therapy.

Drug Design: study of important drug targets and their variations. Pharmacophore designing, prediction of ADME properties. Computational tool for toxicity prediction. SAR and QSAR techniques in drug designing. Drug receptor interactions. Structural-based drug design. Lipinski's rule in drug design.

### Practical

Receptor-Ligand interactions, pharmacophore development. OSDD. DrugBank. PubChem. Molecular representation using SMILES. ChemsSketch: 2D and 3D structure. Structure analyses using Chimera/VMD. Detection of the active site of proteins using various software; bioavailability using Mol inspiration. Docking using HEX and AUTODOCK.

**Suggested Reading**

4. Lisa B, 2014, Combinatorial Library Methods and Protocols, Humana Press.

**Metabolomics and Systems Biology****4 (3+1)****Objectives**

1. To comprehensively identify and quantify all endogenous and exogenous small molecule metabolites in a biological system in a high-throughput manner.
2. To study the model and discover emergent properties, properties of cells, tissues and organisms functioning as a system.

**Theory**

Introduction to metabolomics, metabolomic databases, metabolite architecture, metabolic footprinting, enzyme discovery, *E. coli* metabolomics, fungal exo-metabolome, and diagnostic biomarkers in metabolomics.

Introduction to systems biology, transcriptome analysis, simple synthetic networks, noise in gene expression, structure of biological networks, pathway architecture, applications of systems biology in the discovery of disease signatures, drug targeting and design, and metabolomics in systems biology.

**Practical**

Metabolic pathway databases KEGG, BRENDA, Biosilico, Protein-protein interaction databases, Swiss 2D PAGE, E-PCR. Creating networks using Cytoscape, DAVID, MAS3; in silico functional annotation using GO, AGRIGO, PANTHER, BLAST2GO.

**Suggested Reading**

**Computational Methods for Data Analysis****3 (2+1)****Objectives**

1. To apply statistical analysis and technologies to data to find trends and solve problems
2. To introduce students to some of the key computational techniques used in modelling and simulation of real-world phenomena
3. To study the applications of computational methods in biology using sequence data

**Theory**

Introduction to UNIX/LINUX operating system. Knowledge discovery and data mining techniques. Machine learning and pattern recognition, hidden Markov models. Artificial neural networks, support vector machines.

Principal component analysis, ANOVA. AMOVA and different clustering methods. Gene prediction algorithms and phylogeny algorithms. Basics of R statistical package.

**Practical**

Gene prediction: FGENESH. R statistical package installation and configuration, GUI for R: R-commander, R Studio, RKWard. Analysis of gene expression using R; GNU PSPP, Scilab, QtiPlot.

**Suggested Reading**

1. Gareth J, Daniela W, Trevor H, and Robert T, 2013, An Introduction to Statistical Learning: with Applications in R, Springer.
2. Mathur KS, 2010, Statistical Bioinformatics with R, Elsevier.

**MOOCs/ONLINE COURSES (10 credits)**

The students will register for online courses of 10 credit hours (as per UGC guidelines for online courses) as a partial requirement for the comprising one or more courses at the approved portals during the third and fourth years with prior approval from the Head of the institution.
