Dear Sir/Madam

Greetings from National Institute of Agricultural Extension Management (MANAGE), Hyderabad

Sub; Invitation of registrations for online training program on “Agricultural Extension policies for risk mitigation in Agriculture (MOOCS)”

Risk and uncertainty are integral components of agriculture system. Farmers are confronted with risks at various levels of farm operations. The most common sources of risk in farming can be divided into five areas – production, marketing, financial, institutional and human. All these sources of risk in agriculture affects the faming decisions on daily basis. A better understanding on sources of risk and its implication on the yield and production can help farmers to adopt appropriate strategy for avoidance, mitigation or transfer.

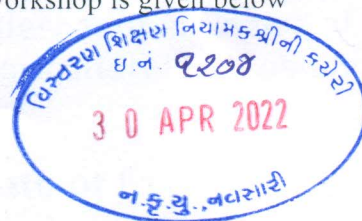

Therefore, a basic knowledge of risk management becomes imperative for all the stakeholders of agricultural system. Risk management is the systematic application of management policies, procedures and practices to the tasks of identifying, analyzing, assessing, treating and monitoring risk. Agricultural extension workers can help farmers to improve their risk management skills. Agricultural extension help familiarize producers with the consequences of risk and help them adopt strategies to deal with risk.

In view of the above, an online training program on Agricultural Extension policies for risk mitigation in Agriculture (MOOCS)” has been scheduled during 24-31 May 2022 through MOOCS mode with an objective to focus on various extension approaches to mitigate risks involved in production to marketing of farm produce. The training will help the participants to equip about the various extension techniques in dealing with risk mitigation strategies in agriculture.

Hence, I request all the officials working in the agriculture and allied departments to register for this one-week training programme. The registration link for the workshop is given below
