Placement e-Leaflet No.: 84/2022

Date: 01/08/2022

After facilitating
570+ Placement Interviews generating Job Offers for 1600+ Students of NAU
in Powerful Placement Programmes during the Golden Decade - 10 Years 2013-22,

we at the *University Placement & Counseling Cell* of our esteemed Navsari Agricultural University; are pleased to announce the **75th Campus Recruitment Drive of Placement Year-2022 for PG – Horti. / Agri. Students of NAU** to be held **during August, 2022**. The details are as follows:

Section-I: Let's Know the Recruiting Organization **Aranya Agri Biotech LLP (AABL)**

Kindly visit <https://www.aranyaagri.com/> for thorough understanding of your Prospective Employer...

- ☞ The Aranya Agri Biotech LLP (AABL) is a wholly owned Agri Biotech subsidiary of Span Divergent Ltd. (erstwhile Span Diagnostics Ltd.).
- ☞ It is in to manufacturing of tissue culture plants, hardening and selling of the same. It is also in trading business of biofertilisers.
- ☞ **It is establishing green house, net house for hardening of its tissue culture plants and also establishing warehouse for its biofertilizers at site near Maroli. AABL is interested to recruit sincere candidate who is willing to utilise his/her technical expertise and be part of the progressive organisation.**
- ☞ Aranya, although very young as an organization, has the unique privilege of borrowing rich heritage from two different organizations, each one of which was a gem in itself. Aranya was formed as the Agri-Biotech subsidiary of Span Divergent Limited (erstwhile Span Diagnostics Limited), under their diversification strategy after having become a name to reckon with in the Human-Biotech (or in vitro diagnostics) space with a successful track record of more than 4 decades. From Span, Aranya inherits the values like uncompromising ethics, unparalleled devotion to quality and an eagerness to strive for the betterment of the society at large.
- ☞ As a first step in the world of Plant Tissue Culture, Aranya Agribiotech acquired Sun Agrigenetics Pvt. Ltd. (SAPL) along with all its assets, intellectual property and human resources. The Bhattas (Dr. Prashant and Dr. Daksha) are rightly considered the pioneers of Plant tissue culture industry in India in general and Gujarat in particular. What this acquisition brought to Aranya is an extremely rich knowledge resource built

gradually over 3 decades by the Bhattas. To go along with this was the reputation of SAPL as an organization which produces top-notch plants due to their strength in research and development, which was testified by the recognition received from the Department of Biotechnology, Government of India and numerous research projects funding that they received over the span of 2 decades. From Sun Agrigenetics, Aranya inherits the attributes like strong fundamentals based in science and research and a frugal mindset – producing more per unit resource consumed, thus improving efficiency.

☞ Inheriting such strong value systems is certainly a big boon for any start-up; however, it also comes with a great deal of responsibility – to live up to the standards set by the predecessors. Aranya is aware of this and work to leave no stone unturned in order to beat the industry standards and delight the customers with our products and services.
