

Infrastructure Facilities

KVK Farm

Krishi Vigyan Kendra, Narmada has 21.60 ha land. The fraction of land according to its use is as follows. Under Buildings 05.24 ha, under Demonstration Units 01.00 ha, under crops 10.46 ha, under orchard/agro-forestry 01.60 ha and under poly house, shed net house, vermi-compost unit 0.50 ha, Farm Pond 0.60 ha and Others (Bunds, Farms roads etc.) 02.00 ha is in use. Under demonstration unit, vegetable seedling production is carried out. Mango mother orchard is also available. Land under crop is used for seed production.

Administrative Building

The Krishi Vigyan Kendra has very well developed administrative building having class rooms, audio visual hall and computer E-KVK centre. The office is connected with internet and intercom facility.

Soil & Water Testing Laboratory

This well equipped laboratory analyses soil, water samples at reasonable rates. The laboratory is supported with computer software for more precise interpretation of results. Every soil sample is analyzed for eight parameters such as pH, Electric Conductivity, Organic Carbon, available Nitrogen, available Phosphorus & available Potassium, Exchangeable Sodium, Calcium & Magnesium content.

Farmer's Hostel

The Krishi Vigyan Kendra has a farmer's hostel that can accommodate more than 20 farmers at a time. The facilities are also available on nominal charges to outside farmers who visit us during study tours. The hostel has solar water heating systems & solar streetlights. It is also equipped with a generator.

Green & Net house

We have well established Green house, Net house and vermi-compost unit. We also have Nursery for raising vegetable seedlings. So, we have been used the vermi-compost produced in vermicompost production unit as a media for raising healthy vegetable seedlings. Moreover, we practically guide to farmers about vermi-compost preparation through vocational training and method demonstration.
