

INTRODUCTION

Genesis

Polytechnic in Agriculture, Vyara is a polytechnic college located at Vyara, Dist. Tapi which providing basic agricultural education and research in the Gujarat state under the **Navsari Agricultural University**. This college was started in October, 1982 as the Diploma School of Agriculture under the scheme of Agriculture School, Gujarat Agricultural University, with aim to provide agricultural knowledge to the students of tribal people of South Gujarat. With the formation of Navsari Agricultural University as a separate university on May 1, 2004, the Diploma School became an affiliated Polytechnic college of Navsari Agricultural University. In 2010, This college was initially established with the name “Polytechnic in Agriculture, Vyara” with the vision to bring out trained human resource and research in field of agriculture.

Our institute is dedicated to strengthening India’s agricultural future by providing quality education, practical skills and value based learning. We offer diploma level agricultural education designed to help students understand farming through a scientific and modern approach. Along with core agricultural studies, we encourage extracurricular learning, entrepreneurship development and hands on training that prepares students for real world challenges. Our aim is to empower young learners, uplift farming communities and contributes to the overall welfare of farmers by nurturing skilled, confident and future ready agri professionals.

Vision

To become centre of agricultural education that nurtures skilled, innovative and socially responsible individuals who contribute to the progress and prosperity of farming communities.

Mission

Our mission is to provide practical, science based agricultural education that empowers youth and aspiring farmers to build sustainable livelihoods. We aim to develop strong entrepreneurial abilities, promote value based learning and encourage responsible farming practices. Through hands on training, field exposure and holistic development, we prepare students to face future agricultural challenges with innovation, confidence and a commitment to the welfare of farming communities.

Mandate

Its mandate is to provide practical training, modern scientific knowledge and hands on experience in farming and allied sectors. The institution aims to prepare competent professionals to support rural development, sustainable agriculture and food security. It fosters innovation, research and community engagement to strengthen the agricultural economy and empower farmers.
